Weather Conditions.

The disturbance yesterday over the Canadian northwest has developed into a storm of decided character and moved southeastward to the Dakotas. A new high pressure area is forming over the northern Rocky mountain states and the barometer is again falling along the Oregon-Washington coast. During the last 24 hours precipitation, generally in the form of snow, has occurred in the northern states east of the Rocky mountains and fair weather has continued in the southern states and on the Pacific coast. It is warmer in the eastern states, while to the west of the Rocky mountains the temperatures have remained nearly stationary.

The conditions are favorable for fair and colder weather Sunday east of the Cascade mountains and for threatening weather followed by rain in western Oregon and western Washington.

He is at present employed as an instructor in the Portland Business college, conducted by A. P. Armstrong, a member of the civil service commission.

Portland's Business Far Bigger Than That of Much Larger Cities East.

Reports from the registered letter desubject of a lecture by Professor D. L. partment of the Portland postoffice for Kiehle, of the University of Minnesota, the fiscal year 1910 show that Portland's registered letter business exceeds that of Jersey City, Milwaukee, Rochunder the direction of John Claire Mon- ester, St. Paul and many other eastern cities with much larger population.

Portland is not alone in this large

Practically every Pacific coast city of 100,000 population or over shows the same remarkable total in this department, the figures for the western cities in many instances exceeding those of cities of the 500,000 class in the east. Portland for the year registered 156,-478 packages. Indianapolis registered but 99,000, though it has 233,000 population; Milwaukee with 375,000 population registered 145,295; St. Paul had less

than one-third as many registered packages and letters. Cleveland with 560,-000 population had but 238,000 pieces of registered matter. Assistant Postmaster Williamson says he is at a loss to explain the great difference between the number of reg-

istered letters in the east and west unless it is that the more frequent train and mail service between eastern cities obvistes the need for such frequent use of the registry department. Anyway it is to the west and to the Pacific coast especially that Uncle Sam looks for fat returns on the books of that part of his business.

STUPENDOUS CUT ON JEWELRY

For an Honest Reason

Not the kind the adman turns out with a sharp pencil, or the sales agents work off with a blare and a flare. We never allow any part of our business to go beyond us, never cover mistakes with the divided responsibility racket. Our customers have rendered us a service by trading with us these many years—we'd never hold them up any sooner than we'd think of holding up a friend in our own home.

The monumental cut on Jewelry, Silverware, Diamonds, China, Cut Glass, etc., is made prior to our removal a few weeks hence to the Yeon Building. We've always carried standard high grade goods and sold them at popular prices, so these removal prices compel your appreciation. In fact, did they not come from our store you might doubt their worth. Everything must go. We do not expect to hire a wagon as big as a street urchin's limited express to move us. It's a case of the cream of this big, fine stock going to the person who acts quickly. Buy now. Take time to congratulate yourself and thank us afterward.
