

NERVOUS GERMAN NEVER COMES BACK

Alarmed by Right of Way Man, He Locks Cabin Door and Flees.

(Special Dispatch to The Journal.)
White Salmon, Wash., March 30.—No trace can be found of Charles Frick, a German, who disappeared from his five-acre tract three miles up the White Salmon three weeks ago. Frick always feared that some one would "steal his place," and even menaced people when they walked upon his land to see the "Narrows," one of the picturesque spots of the valley.

The little five-acre tract sloping down to the edge of the precipice was Frick's very life. From the Underwood station, three miles away, he wheeled out all his goods in a barrow and picked out the little place that no one else wanted. He hand-picked it for stones, did his own grubbing and had several one-year-old trees out. The Pacific Power & Light company came along and approached him for right of way, willing to pay liberally for his acreage, but no sooner had the right of way man left than Frick dropped his grubbing hook, locked the cabin door and fled, evidently believing that by keeping out of sight he will not have to give up his land.

Frick recently lost \$100, all the money he had, and which he worked out for. The loss of the purse worried him.

HOUR MORE DAYLIGHT PROJECT IS REVIVED

(Special Dispatch to The Journal.)
Pendleton, Or., March 30.—Pendleton is to have one hour more of daylight each day if a plan being fostered materializes. An attempt was made last spring to inaugurate the innovation and the high school really put it into practice, but the merchants could not all be persuaded to make the change in opening and closing their establishments, and as unanimity of adoption is necessary for success of the plan, the attempt failed. This year, however, the advocates of the daylight conservation idea feel they will be able to make the citizens generally see the advantage of going to work an hour earlier and closing an hour earlier.

Leon Cohen, prime mover in the plan, proposes to have the entire populace of Pendleton set watches and clocks an hour ahead from May 1 until October 1, thus giving them Huntington time. This deception is absolutely necessary, he states, as man is by habit a creature of clocks with all his actions regulated by the hands on the dial.

BIG FEET AND BIG BRAINS "GO HAND IN HAND," SAY SAVANTS

(United Press Leased Wire.)
Paris, March 30.—All men with big feet can take comfort in the fact that the big foot indicates an equally abnormal growth of brain, and that large pedal extremities and genius go hand in hand, as nearly as feet and gray matter can reach that happy condition.

The savants of the Paris academy of science have discovered this to be the truth, and today they attest the discovery with their signatures, accompanied by letters that show the degrees of their erudition.

The same indications of genius apply to women also. They laid their tape on the feet of 100 women, and only 18 showed that they wore a shoe larger than size 4, but each of the women with big feet has distinguished herself by some achievement in the fields of science, art or literature.

Home for Wayward Girls.
(United Press Leased Wire.)
Victoria, B. C., March 30.—At a protracted meeting of the provincial executive a decision was reached to establish an industrial home for wayward and incorrigible girls, for whose reclamation facilities are urgently required on lines parallel to those adopted and which are proving so successful in the operation of the boys' reformatory and school at Vancouver.

Folk at Hood River April 15.
(Special Dispatch to The Journal.)
Hood River, Or., March 30.—Governor Folk of Missouri, will be in Hood River on April 15, and deliver a lecture to the citizens under the direction of the Hood River Commercial club.

POLVIKA FUNERAL TO BE HELD TOMORROW

The funeral of Joseph Polvika, 715 Corbett street, who died at his home yesterday morning at breakfast, will be held from the family residence at 2:30 o'clock tomorrow afternoon. Rev. Thomas L. Elliot of the First Unitarian church, will officiate. The Masons will take part in the service.

Mr. Polvika came to Portland from Vienna, Austria, 60 years ago, and had been one of the leading tailors of the city for 31 years. When he first came to Portland in 1880, the city's population was only 17,500.

Mr. Polvika leaves a widow and two children, Miss Polvika and Mrs. Victor Hugo Jorgensen. Mr. Polvika was treasurer of Columbia lodge, No. 14, A. F. and A. M. Members are requested to attend the funeral. Interment will be at River-view cemetery.

COMPOSER'S WIDOW TO PAY PORTLAND VISIT

The coming of Mrs. Edward MacDowell, widow of America's greatest composer, is of intense interest to all musicians. Mrs. MacDowell will be presented by Trinity Mission guild at Unitarian chapel Saturday evening, April 1. She will tell of the MacDowell Memorial movement, which has established the composer's old residence in the New Hampshire hills as a home for artists and students. A stereopticon review of last year's pageant at this home will be presented. Mrs. MacDowell will also play a number of her late husband's compositions. She has with her also Miss Zeilna Bartholomew, a charming singer, who will give a number of MacDowell songs.

NORTHERN MINERS TO WALK OUT SATURDAY

(United Press Leased Wire.)
Fernie, B. C., March 30.—A mass-meeting of the Coal Creek and Fernie miners held last night endorsed the position taken by representatives at the Calgary conference, thus making it certain that the mines here will be closed down on Saturday. The same action was taken last night at Homer, and a meeting at Michel today is expected to follow suit.

J. D. McNeven, fair wage officer of the department of labor at Ottawa, is in town but is taking no part in the proceedings. Some men are leaving the camp and this exodus will increase as soon as the mines are closed. The minister of labor at Ottawa has offered to intervene in the hope of settling the dispute.

ST. JOHNS TAX-PAYERS OBJECT

Land Owners Want More Time in Which to Make Sewer Connection.

There was a full attendance of the St. Johns council at the regular weekly meeting Tuesday evening. Mayor Hendricks presided. A communication was received from the city engineer, stating that in view of the fact that the preponderance of Jersey street property owners were in favor of laying westrumite, he had decided to waive the objections he had previously upheld against this hard surface material, provided that the company would file a good and sufficient bond that they would keep the street in repair for five years, and hand it over to the city at the expiration of this period in first class condition. The withdrawal of the engineer's objections relieves the present council of an embarrassing situation.

The city attorney, who still remains firm in his original decision with regard to the illegality of any bond, was directed to prepare a resolution and ordinance adopting the specifications for laying westrumite after certain minor changes have been made in the original draft by the city engineer.

Three more arc lights were ordered installed in the East St. Johns district, at the corner of Olympia street and Macrum avenue, Swift street and Macrum avenue, and Mears and Oregonian streets respectively.

A time and manner ordinance to improve Chicago street from Jersey to Portland boulevard, received the unanimous approval of the council and on the

certificate of approval from the engineer the improvement on Oswego street was accepted.

W. J. Chaney addressed the council, urging that the apportionment of sewer assessment No. 3 was inequitable and unjust. The matter was referred to the street committee.

A resolution that received final passage aroused considerable discussion when its purport was fully understood by the citizens yesterday. It provides that every householder within 100 feet of a sewer shall be compelled to connect up with that sewer within 60 days after receiving notice from the city through the chief of police. Inasmuch as a not inconsiderable number of residents are paying for their homes by small installments the short time allowed them will work a distinct hardship on many people and the glutting of the plumbing market by the simultaneous request of so many householders will no doubt raise the prices for the work, it is said. A period of at least 12 months should be allowed them, say the small taxpayers.

WILL USE 200 BELLS IN ENTERTAINMENT

The sixth number of the Alumnae entertainment course promises to be a popular one, as the entertainment presented by the Dunbar company is a versatile one. They will appear April 4 at the Masonic Temple, and will give a program of bell ringing, quartet singing, chamber music and monologues.

During the 12 years they have been on the Lyceum platform they have toured not only America many times, but Europe as well, having traveled more than three hundred thousand miles, equal to 12 times around the world. In this time they have given over two thousand concerts.

Their set of bells numbers 200, ranging in weight from 12 ounces to 24 pounds, and they give a demonstration of bell ringing the like of which has never been heard here.
