Alveolar Dentistry

In a majority of our advertisements we lay great stress on our specialty, Alveolar dentistry, replacing missing teeth without a plate or bridge work, and the curing Pyorrhea (loose teeth). The work is so remarkable in its character that it is apt to overshadow these other cases which come to us—the simple cases. We don't want the idea to obtain that we are Alveolar specialists slone. We are that, but something more—general practitioners of the first class. We do dentistry in all its branches, from the simple piece of filling up. It's a boastful statement to make, but we can do anything that is possible in dentistry, and what we do is always of the very highest class. Our booklets Alveolar Dentistry and examinations are free. There are 12 Alveolar Dental Co. offices in the west. About 50,000 people are wearing our Alveolar teeth. About 2000 people in this city and state have teeth supplied by this office. Ninety-nine per cent, if not every single one—will tell you if asked that it's the best investment they ever made in dentistry. In many cases where bridgework is impossible and all cases where it is possible, we can replace your teeth with beautiful, artistic, comfortable, cleanly and everlasting teeth that we will defy anyone, dentist or layman, to tell from natural teeth. For full information see our Sunday ads.
