

SPRAY PLANT KEPT OUTSIDE LIMITS

Hood River Council Listens to Objections of Susceptible Noses.

(Special Dispatch to The Journal.)
Hood River, Or., May 17.—The Hood River Spray Manufacturing company asked the city council for a permit to build a spray factory southwest of the business section of the city, but in view of the filling of objection to the odors of the plant, the city council refused to grant the permit.

The night marshal, who now receives \$60 per month, asked a raise and the matter was referred to a committee. The Hood River heights section will have a marshal during the strawberry season. Councilman S. C. Smith resigned as he intends to leave the city.

Third street, one of the main streets in the city, was ordered graded on petition of the property owners.

Hood River Business Change.
(Special Dispatch to The Journal.)
Hood River, Or., May 17.—Smith Bros., who have been conducting a grocery store in Hood River, have sold their interests to H. L. Huggins, who was formerly in the dry goods business here.

FLY IS MORE TO BE DREADED THAN TIGER

"A terrible jungle tiger that stealthily steals upon and rends his victim is not so much to be dreaded as the Portland house fly," said Dr. Calvin S. White, state health officer, speaking in the Medical building auditorium last night.

Shown upon a screen, the jaws and hairy legs of the fly looked much more formidable than the fangs and claws of the tiger. Dr. White said that people would engage in nightmarish and other unpleasant things if they thought a wild beast had escaped even from a circus, but they let flies buzz around the food or the baby's bottle, having no concern for the fact that the same flies might just have come from the consumptive or victim of typhoid.

The fly, said Dr. White, and he illustrated each assertion with views—is a walking and flying arsenal of germs. If the odor attracts he alights on any substance, no matter how repulsive or diseased; there he feeds, taking germs into his system, gathering them upon his legs, catching them upon his wings, and then spreading them in places where the germs grow and multiply and deal death.

Food exposed for sale, said Dr. White, should be kept covered away from flies. A law prohibiting access by flies to food should be rigidly enforced. Flies should be killed by any one of a number of simple means. The places where they breed should be destroyed.

Last night's meeting was for the public. It was held under the auspices of the Consumers' league. The auditorium was crowded. The pure food committee of the Consumers' league announced this morning that arrangements would be made to give the lecture in every school auditorium, in the churches and at other places where the people gather.

SALMON FOR KLAMATH LAKES IS SUGGESTION

(Special Dispatch to The Journal.)
Keno, Or., May 17.—Commercial salmon fishing on the Klamath lakes is a possibility that may follow establishment of a salmon hatchery on the Klamath river. It is being demonstrated that enough salmon come up the Klamath to make such a hatchery a success. There have been few salmon in the lakes because the obstructions in Klamath river kept them from getting up. The proposed hatchery would be below this place.

For years a rock dam has been maintained below Keno for sawmill purposes, and this has greatly obstructed free access of salmon in their attempts to reach the waters above. This has been partially alleviated by the construction of a fish ladder over the dam, but it is said not to allow the salmon to climb over in large quantities.

C. F. Stone, a Klamath county member of the new fish and game commission, suggests that the Klamath Rod and Gun club take the salmon part of the fish industry up and ascertain whether or not enough of these commercial fish would come to these waters to make it worth while to establish a salmon hatchery.

With the lakes and Klamath river full of salmon, canneries would be established.

FIRE LOSS AT ASYLUM SATURDAY NIGHT, \$11,676

(Salem Bureau of The Journal.)
Salem, Or., May 17.—Official estimates of the loss by fire to wards 16, 17 and 18 of the building for female patients at the state asylum for the insane last Saturday night were given out by State Architect W. C. Knighton yesterday afternoon as follows: Building, \$6294.33; contents, \$5382.20; total, \$11,676.53.

Are you looking for a farm or a piece of acreage? If so, see today's classified columns and you will be able to make a choice selection.

Effective Home Remedy for Tuberculosis

It is a serious matter when the lungs are affected. A trip away or to a sanatorium expensive and involves separation from home. Eckman's Alternative is effective—no leaving home necessary. 231 S. Atlantic ave., Haddonfield, N. J. Gentlemen: "In the fall of 1906, I contracted a very serious cold which settled on my lungs. My physician then told me I must go to California at once. Being advised to take Eckman's Alternative, I stayed at home and commenced the last week in October. The first week in January, 1907, I resumed work, fully restored to health. It is now five years since my cure has been effected."

(Signed) W. M. TATEM.
Fuller details of above case on request.

Eckman's Alternative is for Bronchitis, Asthma, Hay Fever, Throat and Lung Affections. For sale by the Owl Drug Co. and other leading druggists. Ask for booklet of cured cases, and write to Eckman's Laboratory, Philadelphia, Pa. for additional evidence.

Pneumatic Water Lift at Blalock, Or., Said to Raise 800 Gallons 65 Feet

Machine lifts water 65 feet and at six turns a minute a ten inch pipe with four foot head could not take care of the flow. The machine will discharge 3000 gallons a minute at 22 revolutions.

(Special Dispatch to The Journal.)
The Dalles, Or., May 17.—In an effort to solve the irrigation problem in the Columbia river valley, and in fact in all valleys of large rivers where the water supply is abundant, a pneumatic water lift, a contrivance manufactured in this city by the Pneumatic Water Lift & Land company, a corporation with its office and principal place of business here, has been invented.

The company recently installed one of its lifts at Blalock, Gilliam county. In a test made by the officers of the company a week ago Sunday, by operating the device at a speed of six revolutions to the minute it was possible to raise 800 gallons of water 65 feet a minute. At a speed of 25 revolutions a minute the device threw so much water that it could not be carried off through the mains that had been put in place leading from the machine on the bank of the river to the ground sought to be irrigated. At present the machine is driven by a gasoline engine, but it is the purpose of the company to attach a current wheel to it and utilize

TAKES HORSE, SELLS IT, TO GET WAGES OVERDUE

(Special Dispatch to The Journal.)
McMinnville, Or., May 17.—Alfred Oth was arrested by Sheriff Henderson for having stolen a horse belonging to R. Chilcott, who lives near Dayton. Oth had formerly worked for Chilcott, who still owed him for his work, and he said in order to get a part of his pay he took the horse and sold it to Mr. Petersen, living near McMinnville, who paid \$15. Oth is 23 years old and a native of Switzerland, having been in this country two years. He was arraigned before Justice Hopfield and bound over to the grand jury under \$200 bonds. Mr. Chilcott got his horse back.

Cloverdale, Or., Woman Insane.

(Special Dispatch to The Journal.)
McMinnville, Or., May 17.—Mrs. Jennie R. Cox of Cloverdale, Or., has been committed to the asylum, having been adjudged insane by County Judge Pearce. She was demented over religion and the officers had a struggle to get her aboard the train. She was brought here from Newberg, where she had been staying for a few days.

Royal Arcanum Meets.

ANCIENT LAKE BED GOES INTO FRUIT

Geological Changes of Many Centuries Can Be Seen on Bonebon Tract.

(Special Dispatch to The Journal.)
Dee, Or., May 17.—The Bonebon tract, two miles south of here, is being cleared and set to fruit trees. The tract consists of 1000 acres of logged off land. A mammoth steam engine with one mile of steel cable is used, bringing out stumps as large in diameter as six feet. The work is so well systematized that stumps and small brush three-fourths mile from the engine are pulled easily. Centuries before the disturbance that made the cracks in the rock where now flows the melted snow from Mount Hood, known as the east, middle and west forks of Hood river, this land was a lake bottom and the sediment of thousands of years is deposited there. The forming of the rivers mentioned drained the land and later it was covered with dense forests of fir and cedar timber, some reaching a diameter of nine feet.

Twenty years ago the Oregon Lumber company acquired 18,000 acres of this land, and during the past four years has logged off about 4000 acres, which has been disposed of to those desiring to plant orchards.

The Mount Hood railroad from Hood River to Parkdale passes through portions of the old lake bed and a visit to the cut made by the railroad

The Druggist Knew From Experience

I have been selling Dr. Kilmer's Swamp-Root for the past three years and those of my customers who buy it, speak favorably regarding it. I have used it in my own family with good results, and I believe the preparation has great curative value. You may use this as you like.

Very respectfully,
C. B. RUPE & SON,
By C. B. Rupe, Mgr.,
Seymour, Ind.

Personally appeared before me this 20th day of July, 1909, C. B. Rupe, Druggist, who subscribed the above statement and made oath that the same is true in substance and in fact.
R. C. JAMES,
J. P. and Ex-Officio.

Letter to Dr. Kilmer & Co., Binghamton, N. Y.

Prove What Swamp-Root Will Do For You
Send to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. It will convince anyone. You will also receive a booklet of valuable information, telling all about the kidneys and bladder. When writing, be sure and mention The Portland Daily Journal. Regular fifty-cent and one-dollar size bottles for sale at all drug stores.

A Poor Weak Woman

As she is termed, will endure bravely and patiently agonies which a strong man would give way under. The fact is women are more patient than they ought to be under such troubles.

Every woman ought to know that she may obtain the most experienced medical advice free of charge and in absolute confidence and privacy by writing to the World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y. Dr. Pierce has been chief consulting physician of the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y., for many years and has had a wider practical experience in the treatment of women's diseases than any other physician in this country. His medicines are world-famous for their astonishing efficacy.

The most perfect remedy ever devised for weak and delicate women is Dr. Pierce's Favorite Prescription.

IT MAKES WEAK WOMEN STRONG.

SICK WOMEN WELL.

The many and varied symptoms of woman's peculiar ailments are fully set forth in Plain English in the People's Medical Adviser (1008 pages), a newly revised and up-to-date Edition of which, cloth-bound, will be mailed free on receipt of 31 one-cent stamps to pay cost of mailing only. Address as above.

SCHOOL LAND NOW TO SELL AT VALUE

State Land Agent Rhinehart Announces Intention to Appraise It All.

Salem, Or., May 17.—The department is going to wage a vigorous campaign to get all state school lands in Oregon appraised so sales at true valuation will be made possible in all cases," said State Land Agent T. A. Rhinehart, who left today for the headwaters of Santiam river in Linn county, where he will look after some school lands. There is not much school land being sold at present. For the next few months the land agent will be traveling over the state working on the appraisements.

Weather Retards Berries.
Hood River, Or., May 17.—Cold weather in the Hood River valley for

the past 10 days has greatly retarded ripening of strawberries. It is expected the first ripe Hood River berries will reach the market about May 25. While the berries will be a little later than last year, the fruit will be very large this year, weather having conduced to growth.

Wisconsin Gas Association.
Milwaukee, Wis., May 17.—The annual meeting of the Wisconsin Gas association was begun at the Hotel Pfister today with President W. H. Winslow of Superior presiding. The association will spend two days in the reading and discussion of papers on technical subjects.

Often Exhausted

When Spring Comes On, But Never Since Taking Hood's Sarsaparilla.

Mrs. A. Hopkins, 225 East Ragle St., East Boston, Mass., writes: "Years ago I learned what a good medicine Hood's Sarsaparilla is. When spring came on I was thoroughly exhausted and obliged to take my bed. I thought I would rather die than be so tired. I began taking Hood's Sarsaparilla, and before long was perfectly well. Since then, spring has never come without my having Hood's Sarsaparilla."

Get it today in usual liquid form or chocolate tablets called Sarsatabs.

Charpitting Puts This Land Within Reach of All Men

Charpitting, the new economy land-clearing method which has solved one of Oregon's greatest problems, makes it possible for us to put you in possession of a superb orchard or garden tract near Portland for a very small figure.

Figure for yourself: It has always in the past cost on an average of about \$5 to get out each stump from fertile logged-off lands in Oregon. And logged-off lands have been developed into our richest producing districts.

Even if a poor man got a cheap strip it cost him a snug sum in labor before he could get his orchard or garden into use. To be sure, Independence came in the end; but it was a stiff game to play.

Now the order of things suddenly changes. Charpitting is discovered, experimented with and finally perfected so that you can charpitt big stump for about 50 cents. And it's more like fun than hard work.

Naturally, until these logged-off districts are grabbed up, as they will be, the man of limited means has a chance to get in.

We seized Charpitting as soon as it was perfected, learned the whole knack thoroughly and put it to use on a big scale in an incomparably fertile tract tributary to the Portland market. It is this district that we are now offering you and that makes up our BEAVER HOMES orchard and garden tracts at

REDLAND

This land being fertile, having plenty of fine water, being in ideal surroundings and at an easy distance from the city, has an assured future. It is near Goble, an hour's ride from Portland down the Columbia.

But for CHARPITTING it would have been cleared by the old blast-and-grub method and sold at fancy prices.

Thanks to CHARPITTING, the clearing is but a minor problem. So we are going to recruit several hundred producers by SELLING AT \$25, \$30, \$35, \$37.50, and up to \$80 per acre.

And every acre is good land. Prices are regulated, not by the quality of the soil, but by desirability of location. The \$25 land of today will be the \$50 and \$80 land of tomorrow, as the district is settled up by producers.

You can make small payments monthly, quarterly, semi-annually, or annually, if you wish. In TRACTS OF 5, 10, 15, 20 and up to 40 acres.

We want you to see this land. There is no test the expert can apply that the matchless soil will not meet. Water competition makes it possible for you to ship your products to Portland for the smallest possible rate.

School, network of good roads, best of conditions in every regard. It's the place to select for YOUR HOME.

COME IN TODAY and Arrange With Us to SEE THIS DISTRICT
