MINISTER WANTS JOB WITH SOME REAL CASH

(Denver, Colo., May 27.—Rev. W. H. Pinkham, a Baptist minister, today wants a job connected with some real money.
"I want a job," says an advertisement he inserted in a newspaper, "where I can make lots of money."
The brand of heresy which I dispense at Sunday meetings at the Bethany Baptist church is not relished by my congregation. Methinks I am not a watchful pastor nor am I an efficient parish administrator. Consequently my stipend is not sufficient to permit the indulgence of my insatiable appetite for new books—to say nothing of automobiles and trips to San Francisco, New York and Europe. Ergo, I want to be a wage slave, and I am looking for a master."

THE HAND THAT FEEDS THE LOAN SHARKS.

BY HOMER DAVENPORT. Copyright, 1911, by C. J. Mar, Publishers' Press.

More power to the movement which has for its purpose the breaking of the grip of the loan sharks on the unfortunates which necessity forces into their clutches.

The burden of legitimate debt is hard to bear. When this burden means the payment of interest running from 100 to 500 per cent it becomes intolerable, and if the facts were known as to the number of victims of those usurious man-eaters who have been

driven to suicide by their exactions it would appal.

The Sage foundation has undertaken a splendid work in fighting this evil and both the managers of the Foundation and those who are cooperating with it deserve the thanks of the community.

McNamara Supporters' Case Against Burns Probably Will Be Dropped.

Indianapolis, May 27.—Collapse of the charges by labor leaders here that John J. McNamara was kidnaped when he was taken to Los Angeles to face a murder charge in connection with the dynamiting of the Los Angeles Times, it is believed, will be the result of the filing of a motion by Prosecutor Frank P. Baker to dismiss the action of the McNamara supporters seeking to set aside the decision of Police Judge Collins holding him a fugitive from justice.

McNamara was taken before Judge Collins after his arrest by William J. Burns and was turned over to the Los Angeles authorities on extradition papers signed by Governor Marshall.

MILWAUKEE TRAINS ON NORTH COAST FATAL SHOOTING FOLLOWS ROW AT HUNTINGTON, OR.

Trackage Arrangements for Entry into Portland Said to Be Agreed on.

(Special Dispatch to The Journal.)
Seattle, Wash., May 27.—That the North Coast line of the O.-W. R. & N. company, the cut-off of the Harriman system, that will shorten the distance between Spokane and Portland several hours, will be the line over which the Chicago, Milwaukee & Puget Sound will have direct service into Portland seems to be an opinion nursed by many prominent railroad men.

This cut-off is now being built as rapidly as possible and it is hinted that negotiations for joint trackage arrangements have already been started. The cut-off and the Harriman line down the Columbia river would give the Chicago, Milwaukee & Puget Sound an excellent routing into Portland.

The new steel passenger train of the C. M. & St. P. which attracted such tremendously favorable comment yesterday when on display here, was taken to Tacoma this morning for public inspection. With the train went all the company officials here, headed by President H. R. Williams, Traffic Manager R. M. Calkins and General Passenger Agent George W. Hibbard. District Freight Agent J. R. Veitch, with headquarters at Portland, also went with the train to Tacoma this morning.

The twenty trains that will operate between Tacoma and Seattle and Chicago, two each way each day, and two held in reserve, one at each end of the run, will leave mornings and evenings, the first leaving Chicago tomorrow and the first departing from the Puget sound cities Monday. The Olympian will be the first to leave, the Columbian following in the evening. It is said that reservations for every train for more than a week have already been booked.

Of the several thousands who inspected the train on display at the Harriman depot yesterday all were amazed at the wonderful equipment. Without question it was pronounced the finest train in the world without exception, the fine cars having been provided with every modern invention for the comfort of the traveling public. The train measures 718 feet including the length of the engine, and the net weight of the cars, exclusive of the locomotive and tender, was estimated at 536 tons.
