

PORTLAND, OREGON, SUNDAY MORNING, MAY 28, 1911.

Sole Agents "Free" Sewing Machines, \$1.00 Weekly—Window Shades Made to Order—Visit Our Wall Paper Department—New Ideas in Summer Draperies

Sound Advice for the June Bride

THIS is the season of newly married couples and of couples about to be married. Into the hands of many a young woman has been placed the savings accumulated by some young man for the purpose of furnishing his home, and he depends on her good judgment to take these dollars to the market where they will bring the maximum of satisfaction in return.

Then let us remind the young women to whom this important task has been intrusted that in Powers' fine new store will be found the largest and most complete as well as the most moderately priced stock of Housefurnishings in Portland. At no other store in the city can be obtained everything that is needed for the home at the reasonable range of prices which prevails at Powers—no other firm offers such liberal credit or extends it in such a dignified and courteous manner. Young couples just making a beginning are given special consideration, and, no matter how small your "starting fund" may be, it is plenty large enough to entitle you to select a complete outfit for your home from our immense stock.

Don't commit the folly of renting a furnished flat, thus helping to pay for someone's else furniture—take a house or flat and let us equip it for you. The savings effected in rent during the first year will pay for the furniture and at the end of that time you will have something you can call your own. Come in and let us demonstrate it to you.

Grand Opening Tomorrow of the New Department Devoted to the "South Bend Malleable Range"

It is with a great deal of pleasure and gratification that we make this announcement. We have been desirous of adding "The Malleable" to our other lines for a long time, but were unable to do so, as its sale was controlled by the large and reliable house of Tull & Gibbs. As soon as their retirement from business was announced we made application for "The Malleable" agency and secured it in the face of strenuous competition indeed. We took this agency—went to a great deal of trouble and cost to secure it—because we knew "The Malleable" to be the very best range on the market in every way. They cost more to build and a little more to buy, but the extra money is a good investment, as it secures a range that will outlast two to one any other range on the market, and saves money every day in its use because it not only saves fuel, but also gives better service. "The Malleable" means Economy and Best Service.

30 Days' Trial Given Free

The flues around the oven of "The Malleable" are larger than on other ranges—giving more heat—better draft.

Copper pocket in reservoir is so arranged that oven and reservoir can be heated at same time.

Closet door drops in place of rolling up—hence it's clean.

A heavy flange at front and back fortifies smoke collar plate—hence no danger of warping.

The end draft insures an equal combustion of fuel from end to end of fire base. There are many other reasons why "The Malleable," made at South Bend, is superior to any other range on the market.

The four plates are riveted to "malleable" angle frames—making airtight joints. Other ranges are only bolted.

There is a space of 18 inches between the top of range and bottom of high closet—plenty of room for large boiler or large vessels.

The cogs operating grate are on the outside, away from ashes or heat—therefore always in order.

Body of range has double wall—the outer of polished steel, the inside of coiled rolled steel, between them asbestos mill board. Other ranges lack the inside wall, and as asbestos is exposed it rubs off. At joining points the steel of the "Malleable" is reinforced with angle iron and riveted. Other ranges have the steel sheets simply lapped and bolted. Ours is much the strongest, of course.

Terms Are \$5.00 Monthly

We Invite You to Inspect the "Marshall Ventilated" Mattress

These are the last word in Mattress construction. In a nutshell, the "Marshall" is not only the best bed, but it is the most lasting article of its kind made, and better still, it is sanitarily clean and hygienically pure. Above is shown a "Marshall" Mattress with enough cut away to give you an interesting inside glimpse. Study it very carefully. Above and below the "Honeycomb" are pads of Black South American Horsehair, likewise along the sides and ends. The curled hair is sterilized free from all impurity. Hair is a non-conductor of heat, making a cool and reposing mattress. It is also a non-absorbent, rendering it absolutely sanitary. The outside ticking is of the best 8-oz. per yard quality, and comes in pleasing designs. In those rings along the end and side of the mattress—there are brass tubes that go into the "core," with gauze over the mouth to keep out all vermin. The body of a full size Marshall mattress contains more than 1000 highly tempered coppered steel springs, so ingeniously incased in specially woven fabric pockets and arranged without rigid fastenings that each works independently without coming into contact with the others, thus insuring absolute freedom from noise and rendering it impossible for the springs to get out of order or to become disarranged.

Fully Guaranteed for 5 Years

Full 4-4 Size . \$40.00 Full 3-4 Size . \$36.00

This \$28 Leather Rocker

\$15.75

Cash or Credit Terms to Suit

How we came by these rockers so that we can sell them so cheaply is really a trade secret. They and the table we advertised two weeks ago and the table we advertise today were shipped by mistake to a house going out of business—the manufacturer sacrificing heavily rather than pay freight on them both ways. These rockers are large and massive, have mahogany finished frames, are upholstered in genuine brown and maroon colored Spanish leather and have spring seats.
