#### Is the Council Trustworthy?

What is commonly known as the competitive paving amendment to the city charter, which will be voted on next Monday, is being attacked in the press. The central idea of the commission form of government, Portland does not now have the commission form of government, but one of the chief virtues of its present charter and one which in purpose would be preserved by a commission charter, is the fixing and concentrating of responsibility in the letting of street improvement contracts. The competitive paving amendment does not require the council to let street improvement contracts to the lowest bidder, but to the "lowest responsible bidder." This "responsible" would give the city council discretionary powers that could readily be turned to graft. The council now merely has a part in instituting improvement proceedings. The improvement petitions signed by the property owners to be benefited are now given to the council, which then calls on the kind of pavement by the council, and the executive board awards the contracts. So the question involved in this: Shall the right of the property owners to select the character of pavement be laid and the right to the executive board to award the contracts be taken away and both be vested wholly in an openly distrustful body.—Oregonian editorial, June 1, 1911. (Paid advertisement.)

#### Esperantists Picnic Today.

In July Portland will have a large gathering of Esperantists when the conventions of the local northwest branch of the Universal Esperanto association and the Esperanto association of the Pacific northwest meet here in annual convention.
