

HOOD RIVER BERRY CARS ICED AT HOME

Four Tons Made at Once at New Plant; Five Cars Go Out Last Night.

(Special Dispatch to The Journal.)
Hood River, Or., June 15.—One of the largest chemical ice manufacturing plants in the state has been installed in the Davidson Fruit company's cold storage plant. In one section of the chemical department 2000 large slabs of ice, each one foot in diameter and 10 feet in length, are manufactured simultaneously. The mass of ice weighs over four tons when it is hoisted from the receptacles by the large steel cranes. All the cars that are being loaded with berries are iced here, and ice is now being stored for iced cars for next apple season.

The largest shipment of strawberries to go forward this year in a single day from Hood River went out last night, four cars in car lots and one car distributed by express. If the weather remains warm the berry shipments will reach their best this week.

Auto trucks and rough roads do not work well together in the transportation of strawberries. A. O. Hershey, who has a large truck, has been hauling berries from the upper valley, but with the bad roads to come over, the berries sometimes come in poor shape and are turned down at the receiving office.

ATTACK ON ROCKEFELLER

(Continued From Page One.)
evade the law and make it conform to their business. What excuse can any sworn official give the people for failure to enforce the law when they daily exert themselves to punish other transgressors with less money and influence at their command? What respect have the oil and tobacco men for the law?

"The history of the men of the Standard Oil company has been a continuous record on their behalf and on the behalf of their officers, including Rockefeller, to monopolize the oil business and to destroy competitors by means fair or foul. But it is said he is not responsible, he retired from active life 10 years ago. Do you mean to tell me that a man can organize a band of law violators, furnish them with the sinews of war, serve as captain, mark out and guide their course for a generation and then, when he has grown tired, can continue in the same way, can receive a greater portion of the earnings and yet not be responsible for their acts civilly and criminally?

"They ought not to be above the law. Is the government frightened at its own victories?"

HEAD OF MORMONS CALLED

(Continued From Page One.)
again exceedingly poor. He was unable to tell any of the details of the organization of the American Sugar Refining company, but talked freely about the tariff. He said unless it was protected the best sugar industry would perish.

"Do you think a prohibitive duty is necessary to keep the sugar industry

going?" asked Representative Fordney of Michigan.

Makes Negative Answer.
"No," Helke replied, "I would give them 20 years to adapt themselves to free trade."

Then Fordney exploded. "Oh, I—," he exclaimed. "We would all be dead by that time."

Lovell Palmer was the next witness. He testified that before he became a director of the trust he had been in charge of contracts and agreements with railroads. He admitted that the trust had received rebates from railroads prior to 1891, and added:

"After that time I made an arrangement whereby the sugar refining company was supposed to pay the full rate, because the payment of the full rate was of greater a theory than a fact."

He declared that rebates were necessary because of the fierce competition of those days.

Helke was on the stand for five hours yesterday. He said he "knew nothing" about subjects of importance. He did not know anything about the inner workings of the trust or its history, he said.

WILL ACCEPT INCINERATOR

(Continued From Page One.)
seek the roof of this structure with water to minimize the danger.

A fire that broke out in the plant of the Portland Wood Pipe company, situated near the crematory, may have been started from a stray spark blown from the crematory smoke stack. The Public Works company is required by its contract with the city to provide a durable spark extinguisher, but the company has failed thus far to do so.

The specifications for the new crematory provide that the plant shall burn 150 tons of garbage in 24 hours. It has never done so, but the contracting company's president, A. B. Manley, says that the plant could burn that much refuse if it were delivered.

"The plan will never be able to meet this part of the test," declared Superintendent Napier today. "It burns with fair success when from 90 to 100 tons of refuse per day are delivered, but even then it smokes badly and is otherwise defective. When 110 or 120 tons of garbage are delivered the furnaces become choked because these are not adequate provisions for handling garbage delivered rapidly. The specifications say that ten wagons shall be able to dump into the furnaces at one time. On one occasion there were 24 wagons lined up at once because only one was emptied at a time. This necessitated the last man in line waiting two hours to get rid of his load. Yet the specifications require that the plant shall handle garbage as fast as it is delivered and without any being placed on the dumping room floor. I have noted as high as 12 tons of refuse on the dumping floor at one time." Following are a few samples of the daily reports made by Mr. Napier:

June 13.—Plant has smoked heavily all day. The fumes from this smoke are severe on the men. Residents of Nicolai street have made complaint. Sparks from the smokestack are endangering nearby property. I am using every precaution and extinguishing small fires about my woodpile and barn.

"The plant is falling far below the guarantee and conditions while operating are very unsatisfactory.

Conditions Terrible.
June 12.—The plant is very unsatisfactory and does not fulfill the contract.

"June 2.—Conditions terrible. Much worse than in old plant when the old furnace was working far beyond its capacity. Scavengers lined up on driveway waiting for engine to subside."

The health board, at its last meeting,

announced that its members would make a trip of inspection through the furnaces of the crematory, providing the contractors would shut those down so they might cool off in time for the trip to be made some Sunday afternoon. Since the announcement was made, according to Superintendent Napier, the contracting company has had from one to three men doing repair work for seven days.

In spite of the fact Superintendent Napier has called attention on numerous occasions to the failure of the Public Works Engineering company to remedy minor defects and to supply equipment called for by the contract, these defects are still unrepaired. One of the more important defects is the ash car system. The tops of the cars are too short to receive all the ashes that fall from the furnace waste exits. The consequence of this shortening is that an extra man is required to pick up the debris that falls on the car tracks.

ROOSEVELT SWINGS UPON

(Continued From Page One.)
and economic betterment—just as he has shown himself a consistent enemy of men in California who have dared resolutely to stand against corruption and in favor of honesty.

Gompers' Article Fair.
"The article by Samuel Gompers in the American Federationist offers the

most striking contrast, in tone and temper, to the article of General Otis. Gompers' editorial is a fair and honorable statement of his position, with which I only in part disagree, and is couched in language which warrants respectful and careful attention.

"The attitude of General Otis in his paper affords a curious instance of the anarchy of soul which comes to a man who, in consequenceless fashion, defies propriety at the expense of human rights—no less surely than it comes to a man who, in the name of human rights, wars upon all men of property, good or bad."

Roosevelt then quotes Gompers' invitation to read current trade union literature to secure first-hand information on the labor union situation, and says:

Honorable Invitation.
"This is an honorable invitation, expressed in an honorable way, and I shall certainly take advantage of it. Gompers says that trades unionists only want a fair trial. That is all I wish. Let us find out who is guilty and who is innocent. Now, let me earnestly ask Gompers and those associated with him in the cause of labor that they, in turn, make it equally evident that they do not intend to stand by the men, right or wrong; that they wish them to have an absolutely fair chance to prove their innocence, but will join with every other citizen in hearty condemnation of them and will endeavor to bring them to punishment if they are guilty. No

feeling of hostility to the Los Angeles Times must be allowed to interfere with this.

"It may be quite true that this paper has again and again shown itself to be as much an enemy of good citizenship, honest, decent government and every effective effort to secure fair play for workmen and women as any anarchist could show himself; but that has nothing to do with the case. If the paper dynamited had been the Socialist paper in Milwaukee, I should strive just as hard to bring to justice the wrongdoers as now when the paper dynamited happens to be the capitalist paper of Los Angeles."

ASTORIA TODAY GETS CENTENNIAL \$50,000

(Salem Bureau of The Journal.)
Salem, Or., June 15.—The controversy between Clatsop county and the state over back taxes and the Centennial appropriation of \$50,000 has been settled in so far as the appropriation is concerned. Dr. D. Henderson, chairman of Astoria's Centennial committee, will come to Salem this afternoon to receive the appropriation.

WOMAN RESENTS HUG WHILE HUSBAND WAITS

In addition to getting a thrashing at the hands of a woman whom he attempted to hug at First and Market streets last night, W. D. Lewis, a real estate man at 553 Second street, was fined \$10 by Judge Tarwell this morning.

Lewis accosted a woman walking with her husband and when he attempted to throw his arms around her, the woman struck him in the face, knocking him into the street.

Lewis went across the street and the woman, angered because her husband had not resented the insult, turned on her husband and gave him a beating. Patrolman Fuller arrested Lewis on a disorderly charge, but could not get the name of the woman.

Americans Alarmed.
San Diego, Cal., June 15.—Anti-American demonstrations at Ensenada are on the increase to such an extent that the American citizens are growing seriously alarmed, according to advices brought from Ensenada by Captain Paul Wimer of the Sandoval Fishing steamer Teddy.

OREGON STATE LANDS MADE GAME REFUGES

(Salem Bureau of The Journal.)
Salem, Or., June 15.—Governor West is issuing a proclamation today for setting aside all the state lands in Oregon as game refuges. There are in all about 2000 acres of this land. Game birds of all kinds will hereafter have a haven of rest, when pursued by relentless hunters, in tracts of state land wherever located. In season and out of season no hunting will be allowed on these lands.

DISEASE LADEN BARN TO BE BURNED BY STATE

Salem, Or., June 15.—Fire will be set to the old barn which has stood on the farm at the state tubercular hospital for over 30 years. The foul old barn has been condemned by the state board of health. The tuberculosis commission has concurred in the condemnation and has pronounced the lumber disease laden and unfit for use anywhere. The new barn will probably be ordered built by the building board.

Here is a new idea: A Shoe Shop up high; A clean, quiet place, that is close to the sky. You step from the streets to an uplifting car. And reach the Shoe Shop without any jar!
