One private cable claimed no injury in the south of Russia from the recent weather and another cable reports damage from that quarter.

The trade gave more attention to legitimate bear news in the domestic situation. Minneapolls had a run of 230 cars, showing that spring wheat farmers regard the new crop position as greatly improved and are selling reserves. The chief bearish influence was the additional rainfall over a good portion of the spring wheat country and the press reports from that quarter saying that moisture is now nearly sufficient to run the crop to maturity. saying that moisture is now nearly sufficient to run the crop to maturity. Next in importance for sellers was the purchase of 100,000 bushels of new wheat by a local cash house for early July shipment.
