# STATISTICS SHOW 2 INLAND EMPIRE CITIES' GROWTH

Bureau of Census Gives Out Summary of Reports on Manufactures for Spokane and Walla Walla.

Washington, July 12 .- A preliminary statement of the general results of the ufactures of the cities of Spokane and Walla Walla, Wash., was issued today by Acting Census Director Falkner.

It contains a summary comparing the figures for 1904 and 1909, by city totals, factures, bureau of the census. The figures are subject to such revision as may be necessary after a further examination of the original reports.

## Summary for Spokane.

The summary for Spokane shows persentages of increase as follows: 204 per pent in the capital invested; 118 per cent in the cast of materials used; 114
per cent in the value of products; 109
per cent in the value added by manufacture; 100 per cent in the salaries and wages; 96 per cent in the miscellaneous expenses; 68 per cent in the number of salaried officials and clerks; 64 per cent in the average number of wage sarners and 52 per cent in the number

of establishments. In this connection it is proper to call attention to the fact that Spokane, since the census of 1904, has so greatly extended its corporate limits that the city now covers nearly twice the area in-cluded in 1904. In that year it had a total land area of 12,960 acres, but at the date of the thirteenth census enumeration the city limits comprised 23,-840 acres. Hence the rates of increase shown in the summary are to a considerable extent due to annexation of populous suburbs in which manufacturing establishments already existed. Increases Heavy.

There were 286 establishments in 1909 as compared with 188 in 1904, an in-

crease of 98, or 52 per cent. The value of products in 1909 was crease of \$10,049,000 or 114 per cent. The average per establishment was approximately \$66,000 in 1909 and about \$47,000 in 1904.

The summary for Walla Walla shows percentages of increase as follows: 120 and wages: 67 per cent in the value ing on the fire fighters near Lake City, and their friends.

added by manufacture; 60 per cent in and that town, too, is in danger.

Rainler and Cl the average number of wage earners; 56 per cent in the value of products; 49 per cent in the cost of materials used; 49 per cent in the miscellaneous expenses, and 45 per cent in the number of establishments.

Extended Its Limits.

In this connection it is proper to call attention to the fact that Walla Walla, since the census of 1904, has extended its corporate limits so that the city now covers nearly one-sixth more area than was included in 1904. In that year it had a total land area of 1986 acres, but at the date of the 13th census enumeration the city limits comprised 2297 acres. Hence the rates of increase shown in the summary are to some extent due to annexation of populous suburbs in which manufacturing establishments already existed. There were 48 establishments

as compared with 33 in 1904, an increase of 15, or 45 per cent.

# Value of Products.

The value of products in 1909 was \$2,317,000 and \$1,486,000 in 1904, an increase of \$831,000, or 56 per cent. The average per establishment was approximately \$48,000 in 1909, and about \$45,000 in 1904. preliminary totals for steam

laundries for Spokane, in 1909, show: Number of establishments, 23; capital invested, \$400,000; cost of materials used, \$109,000; salaries and wages. \$376,000; miscellaneous expenses, \$91,-060; value of products, \$680,000; number of salaried officials and clerks, 48; and average number of wage earners employed during the year, 575,

The preliminary totals for steam laundries for Walla Walla in 1909 are: Number of establishments, 4; capital invested, \$53,000; cost of materials used, \$16,000; salaries and wages, \$63,-000; miscellaneous expenses, \$8000; value of products, \$96,000; number of salaried officials and clerks, 6; average number of wage earners employed during the year, 103.
