

# RECIPROCIITY BILL ALMOST SURE TO PASS THE SENATE

### Vote on Reciprocal Tariff With Canada Will Be Taken To- morrow—Favorable Pre- dictions Made.

**History of the Measure.**  
 March 19, 1911—President Taft meets Canadian Minister of Finance Fielding at Albany, N. Y.  
 January 26, 1911—Agreement is transmitted to congress.  
 February 14, 1911—Agreement passes the house by a vote of 222 to 92, 87 Republicans and 6 Democrats voting against the bill.  
 February 24, 1911—Agreement is reported to the senate, which takes no action on the bill.  
 April 4, 1911—Special session of congress is convened.  
 April 21, 1911—Agreement passes the house by vote of 267 to 88, 78 Republicans and 11 Democrats opposing.  
 July 22, 1911—Final vote in the senate will be taken.

**(United Press Leased Wire.)**  
 Washington, July 21.—The Canadian reciprocity bill will be voted upon in the senate tomorrow, and probably will be passed. Votes on the wool revision bill and farmers' free list will be taken July 27 and August 1, following which will come the house apportionment and stretched bills, August 3 and 7, respectively. Adjournment is expected to be made shortly afterward.  
 At the reciprocity debate today, 58 senators in all were present. Following the rejection of the Townsend amendment for a deep waterway between the

# MADERISTS JOIN LIBERAL FORCES

### Hundreds Enlist With Party That Professes Adherence to Socialism.

**(United Press Leased Wire.)**  
 Monterey, Mex., July 21.—Hundreds of former Maderists today are joining the forces of the Magonists, or Mexican liberals who profess adherence to socialism, throughout Coahuila, Durango and San Luis Potosi provinces, according to messages received here today which declare a state of anarchy prevails.  
 Telegrams from San Luis Potosi say that 200 Magonists there attacked the homes of the Madero faction and that a general riot resulted.  
 Advisors to many of the Mexican states declare that, as a result of the presidential campaign in progress, the situation is critical and that open revolt may break out any moment.

**San Antonio, Texas, July 21.**—Foreigners arriving here today in large numbers from Mexico report that a state of anarchy exists in Terreon and the state of Coahuila. They say that the situation is critical, and that they will not return until some foreign power intervenes.

**Great Lakes and the St. Lawrence river.** Senators Crawford and La Follette both vigorously denounced the agreement on the ground that it would prove disastrous to the farmers, although La Follette stated that it is impossible successfully to oppose legislation upon which the entire press of the country is practically united.

**It is believed the reciprocity measure will be passed by the senate in the same form as it came from the house.** Senators Penrose and McCumber, the latter the most ardent opponent of the bill, predicted today that the bill will pass by 2 to 1. Senator Stone said the vote would be in the proportion of 57 to 34. Senator Bristol declared that 45 per cent of the Republicans would support the measure.

# LABOR TROUBLE ON MT. HOOD LINE REACHES CRISIS

### Temporary Injunction Allowed Against Electrical Workers' Brotherhood; Imported Men Here, Alleged.

The labor trouble between the Mount Hood Railway company and the union electrical workers has assumed such dangerous proportions that a temporary injunction was allowed this morning in the circuit court against the International Brotherhood of Electrical Workers, and several men alleged to have been imported to cause trouble. This action on the part of the railway company is the most drastic that has been taken in the local court for years, and promises to involve all union men working for the company.

**Strikers Imported, Alleged.**  
 Attorneys W. D. Fenton and C. W. Fulton represent the railway company, and in connection with the injunction filed a suit against the electrical workers in which a permanent injunction is asked. The hearing to make the temporary restraining order permanent has been set for Tuesday morning at 9:30 o'clock before Presiding Judge Kavanaugh. The sheriff's office is busy today serving the notices of the temporary order on the imported strikers and officers of the electrical union. The names of 13 men are known to the railway company, and there are nine men alleged to have been imported to do picket duty.

Those enjoined are C. Edmonds, J. J. Solhaug, C. D. Conaly, C. S. Merrill, C. A. Jordan, M. F. Ide, John Morgenthaler, H. Peters, A. F. Dodge, Fred Payne, R. G. Templeton, D. McKay, F. Christopher, and the imported men, whose names are not known, but will be served with "John Doe" papers. The persons named constitute the officers and board of directors of the International Brotherhood of Electrical Workers.

**Trouble at St. Johns.**  
 It is alleged in the complaint, upon which the injunction is asked, that the electrical union entered into a secret agreement June 15 with certain men outside the state to come to Portland to help the union strikers. It is set forth these men largely came from California, and have acted as pickets at various points along the line now being con-

structed by the railway company. Much of the trouble has been experienced at St. Johns, where a transmission wire is being put across the river, and many men are required to work.  
 The complaint further recites that the imported pickets congregate near the workmen now in the employ of the company, and harass them to such an extent that they are afraid to work. It is alleged that threats are made by the union pickets against the workmen, and that frequent outbreaks of violence have occurred. The case of F. Christopher is recited in particular in which he was recently arrested and thrown in the county jail in one of these brawls.  
 The trouble between the Mount Hood Railway company and the union electrical workers has been on for five weeks. It was occasioned over a disagreement on the wage scale.

# RAILROAD OFFERS \$7500 REWARD FOR 3 BANDITS

**(United Press Leased Wire.)**  
 Minneapolis, July 21.—A reward of \$7500 was offered here today by the Northern Pacific railroad for the capture and conviction of the three masked bandits who held up and robbed passengers on the North Coast limited train near Tower City, North Dakota.  
 Three suspects so far have been captured at Castleton, North Dakota; three more at Melrose, Minnesota, and three Jellen brothers are held by the authorities at Tolna, North Dakota.

# SAN FRANCISCO SEES MEXICAN FLAG IN BAY

**(United Press Leased Wire.)**  
 San Francisco, July 21.—For the first time in a dozen years, the Mexican flag is flying from the mast of a Mexican warship anchored in San Francisco bay. The gunboat Genera Guerrero is here, preparatory to an overhauling in dry-dock at Hunter's Point.

**News Items From Chitwood, Or.**  
 (Special to The Journal.)  
 Chitwood, Or., July 21.—Hay harvest is still in full blast in the vicinity of Chitwood with a bumper crop. The fruit crop is rather light this season. The black bears are coming around occasionally trying to scrape up acquaintance with the sheep. Alvin Cook shot and killed a huge one a few days ago.

**A French Invention.**  
 Reinforcing a colloid membrane with fine wire netting, two French scientists made a filter that extracted even salt held in solution by water with which it was used.

# An Endless Chain of Sickness.

There are upwards of one million deaths each year in the United States. In 90% of cases the people who die are less than sixty-five years old. The evils that lead to disease can be escaped just in proportion as the conditions and habits that bring on disease become more widely understood.

Then too a chronic disease which may baffie the skill of the general practitioner may yet be permanently cured by the Physician who has made one line of disease a specialty.

It would be just as absurd for the Professor in a medical college to presume to lecture on all subjects as for the Physician to presume to understand the nature and cure of every disease.

That is why Dr. R. V. Pierce established the Invalids' Hotel and Surgical Institute many years ago. He is a graduate of the Physicians and Surgeons—who though educated to practice in all departments of medicine are here assigned to a special department only—to which each specialist devotes his entire time, study and attention.

The sick who have been treated at Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., have much to say in regard to this wonderfully equipped Sanitarium, where all electrical apparatus, as well as electric water-baths, Turkish baths, static electric machines, high-frequency current, and other most modern and up-to-date apparatus are used for the cure of chronic diseases. The treatment of chronic diseases that are peculiar to women have for many years been a factor in the cures effected at the Invalids' Hotel and Surgical Institute.

The physicians and surgeons employed are among the most experienced and skillful in the country, men who have made these diseases their life study, and whose highest ambition is to excel in their treatment.

How well they have succeeded may be judged from the fact that their practice embraces cases from every State and Territory of the Union as well as from foreign lands. Many thousands are annually treated, either through correspondence or at Dr. Pierce's Institution. It is an old and famous fact, "Experience makes perfect," and the skilled specialists in this field of practice cure thousands of cases which have been abandoned as incurable by general practitioners.

One of the most wonderful electrical appliances is the X-ray used at the Institute which may be used both in the treatment of various diseases and in the diagnosis of many obscure conditions. With its aid the interior of the human body is rendered transparent, and has been heretofore. Abnormal states of the bones, gall stones, stone in the bladder or in the kidneys, are shown plainly by what are known as X-ray photographs. Internal tumors, and the enlargement of the deep-seated organs are discovered by this means and in the diagnosis of tuberculosis of the lungs this agent has proven a most valuable aid. When applied to some of the less fatal chronic ailments of germ origin it has proven very effective as a curative agent.

Another interesting proceeding is the violet-ray treatment produced by concentrating the violet or chemical rays from an arc light with a specially prepared carbon upon any portion of the body that may be the seat of pain. Sufferers from neuralgia, sciatica, rheumatism, strains, sprains, also from those obscure exhausting pains (the origin of which cannot at present be accurately determined) frequently find immediate relief from a single treatment and usually with a little persistence in the use of this aid, comfortable health or perfect recovery is obtained.

The incandescent light bath, consisting of a cabinet in which the patient is bathed in the combined rays of electric light globes, has produced really wonderful results in diabetes, sciatica, rheumatism, obesity, anemia, and some forms of kidney and heart trouble. It has also proven valuable in chronic chills, bronchial asthma and various skin diseases. As a general hygienic measure its efficiency can scarcely be over-estimated.

Hundreds are brought to this Institution from far distant states and they go home in a few weeks well and strong. Quite as marvelous are the thousands of cures annually accomplished through correspondence, while the patient remains quietly at home. Others come in person, and after being examined are provided with especially prepared medicines and return home to carry out the treatment.

Everyone who consults the specialists, whether by letter or in person, receives the most careful and considerate attention. Great care is exercised not to over-encourage those who consult the specialists of this institution that no false hopes may be raised.

Consultation by letter or in person is absolutely free—no charge whatever—so that the public when afflicted are invited to write Dr. Pierce at the Invalids' Hotel and Surgical Institute, Buffalo, N. Y.

# SWITCHMAN-ESCAPES IN EXPLOSION OF GAS

An explosion of gas at 3 o'clock this morning at East Second and Washington streets, under the Cudahy warehouse railroad spur, caused by a leaking gas main, caused considerable consternation in the neighborhood. J. H. Hober, a switchman for the O-W. R. & N. R. Co., escaped injury. The fire company was called to extinguish the blaze that resulted.

Hober was walking along the tracks with a lantern, and was about to turn a switch when the explosion, caused by the escaping gas being ignited by the flame of the lantern, occurred. The lantern was shattered, sod, planks, sticks and other debris were hurled into the air and showered down on the thoroughly frightened switchman.

Special Patrolman Andrew and Patrolman Stark heard the explosion and made an effort to find the place, but, being unable to do so, telephoned to police headquarters and motorcycle men were sent to investigate.

The damage done is nominal, but Hober's escape is said to be miraculous.

# MASKED MEN HOLD UP AND ROB AUSTRIAN

The first report received at police station in several months of an invasion of masked highwaymen into a building was received at 10 o'clock last night when Patrolman Hilton telephoned to police headquarters that two men wearing handkerchiefs had walked into a back room at 9 East Third street, and at the point of guns had robbed Jaun Parapet of \$140 and Mat Bobjoly of \$100. Three other Austrians in the room had nothing.

The affair happened so suddenly that a good description of the men was not obtainable. Both men wore dark clothes, stiff hats, and were about five feet eight inches tall.

# DECLARES PLUMBING ORDINANCE WON'T PASS

"The new plumbing ordinance has not passed the council yet, and I do not believe it will," said Councilman James A. Maguire today, as he finished glancing over a letter of protest against the proposed measure. The letter was signed by Walter Adams, Greenwood representative of a local plumbing shop.

"The ordinance has been drafted in the interests of master plumbers and the plumbing supply houses, I believe," said Councilman Maguire. "It is too sweeping. What we want is not so much the regulating of the kind of material to be used, but the establishment of a better system of inspection."

Mr. Adams, in his letter to the committee declares that the ordinance proposes to increase the cost of plumbing material to the benefit of supply houses and to the detriment of the already overburdened home builder.

# WOMAN DARES MAN TO STEP "OUT" TO FIGHT

At the close of the divorce hearing of Nellie Royal against C. C. Royal Court Judge Kavanaugh, a sister of the woman invited Royal from the courtroom to fight. She even dared him to step into the hall. Court Bailiff Scott interfered to protect the man. The bailiff escorted Royal several blocks from the courthouse, acting as his bodyguard.

The father, brother and sister of Mrs. Royal were exceedingly bitter against Royal for allegations he made about Mrs. Royal. In deciding the case this morning Judge Kavanaugh gave the wife a decree and one third of the property, located on Lexington Heights. The couple was married last April and separated in June.

A double-ended tooth brush, especially designed to reach the inner surfaces of the teeth, has been invented by a dentist of Memphis, Tenn.
