Mr. Wentworth's plaything is his farm, a fine tract of land 50 miles south of Chicago just over the Indiana

line. When he bought it years ago the soil was exhausted and the people had

given up raising wheat. He began a

course of systematic development of

the soil, rotating clover with other crops

until the ground was in fine condition.

Now he is raising 35 bushels of wheat

Weather Conditions.

The Idaho disturbance has moved outheastward to Texas and the north The Idaho disturbance has moved southeastward to Texas and the north Pacific high pressure area has moved north to western Washington. A new high pressure area has made its appearance over Alberta. Showers and thunderstorms have occurred in the Rocky mountain states and in Kansas, Nebraska and the Dakotas. The rains have ceased in the middle Atlantic states and no precipitation of consequence has occurred in the last 24 hours on the Pacific slope. It is much cooler in the upper Missouri valley and in the Canadian northwest and generally slightly warmer in the Pacific states. In the Mississippi valley and the Atlantic states the temperatures are slightly, above normal and in Texas they are decidedly above normal.

The conditions are favorable for fair weather in this district Sunday. It will be warmer in southeastern Idaho and continue moderately warm elsewhere.

Object to Compromise—Property owners on the west side of Seventh street, from Burnside to the union depot, are strongly objecting to the proposed com-promise in the matter of widening Seventh street. It was first proposed to widen the street from 60 feet to 80 feet. Then a compromise was presented to widen it only 10 feet, which would be taken off of the west side of the street. It is to this that the objections are being made. E. Henry Wemme presented a strongly worded objection to the city council yesterday.

To Build Estiroads—Three short spurs of railroad will be built by the Oswego. Dallas & Roseburg Railroad company, which filed incorporation papers Friday. The company has a capital stock of \$300,000, which is held by the Portland Cement company of this city. SAYS BUSINESS OF COUNTRY IS UNSATISFACTORY--DUE TO POLITICS WRECK, ALL RECOVERING

President of Portland Bank on Visit Here Says Portland Prosperous, However.

Little encouragement can be found in the present business situation, and there s no prospect of improvement for a year at least, in the view of G. K. Wentworth, president of the Lumbermens National Bank. Mr. Wentworth believes that a large part of the country's business troubles arise from political causes, and he says that thousands of business men he has talked to incline to the same belief.

"There is no use denying that business generally throughout the country is unsatsifactory," said Mr. Wentworth. "Conditions so plain must be admitted. I must say, however, that Portland appears better off commercially than any other city in the country. Slack times have been noticed but very little here.' Mr. Wentworth owns large holdings of Oregon timber and has been coming to this city for 25 years. Besides being president of the Lumbermens National Bank he is president of the Portland Lumber company. He is interested in iron mines in the lake region and been sugar factories and banks in Michigan He is a large owner of Chicago real estate, and makes his headquarters in that city. He illustrated the situation

Recites Incident.

by reciting an incident.

"A friend of mine owns 250,000 tons of iron ore on the dock at Duluth," he said. "Recently he made a trip through the iron manufacturing district of Ohio to dispose of his ore, and the best he could do was to get orders for 30,000 tons. He thought this was better than nothing, so he went home and prepared to ship, when he received a message from his buyer reading about like this: 'Please ship ore as slowly as you know how; keep deliveries down to absolute minimum. The purchaser did not quite cancel the order, but apparently he winted to

to the acre, and neighbors on all sides of him are following his lead. "Virtually the same situation prevails in every important industry. It is the same with lumber. When the iron trade is slow, everything else is slow; when iron takes a start, other business responds.

"The money situation in Chicago has hardened somewhat. There has been no decline in the interest rate, but the banks are a little more particular whom they lend to now than they were. They do not want to start any new business The rate is 31/2 and 4 per cent for 60 and 90 day loans.

17ot Good for Public.

"The recent consolidation of some of east side. Lots 50x100 at \$550, and the strongest Chicago banks has been the subject of comment in the financial world. In my opinion, these great banks are not a good thing for the public. Such banks have no use for the business of the small man and he does not get great consideration from them. they are a grand thing for the big corporation. If a corporation is big enough and it wants \$3,000,000 or \$4,000,000 it can get the money.

"I have absolutely no patience with Sunday. Inquire 4527 E. 45th street President Taft's reciprocity program. Farmers who are reported to be in favor of the reciprocity bill can have no conception of what it means. The Canadian government is importing farm laborers from Europe and paying their railroad fares to the wheat fields of the Canadian northwest. This gives the Canadian wheat growers a decided advantage over the farmers this side of

"The lumber industry throughout the country has been in a bad way for a The manufacturers have been losing money right along. The trouble is, they have owed too much money; to pay their debts they have been obliged to sacrifice prices, and the result has been demoralizing. The yellow pine lumber manufacturers of the south have been suffering with the rest: but very recently they have been able to squeeze an average increase of about one dollar a thousand feet out of prices, and they are now on a fairly good basis compared with the past.

Exposition to Help.

"Here in the Pacific northwest the umber industry will doubtless receive much benefit from the San Francisco exposition. A large amount of our lumper will be used for construction of frame structures in and about the fair grounds, and there will be a demand for emporary buildings all over the city. The prospect of early completion of the Panama canal is what is holding the price of timber up. Men who own timber are straining every nerve to hold it because they feel that the opening of the canal will be a boon to the lumber

industry. "Although my trips to Portland are frequent I can see remarkable changes in the city every time I come. I think that Portland will outstrip San Fran cisco and become the greatest city on the Pacific coast. It has the resources back of it to build a city on.

"To me Chicago is the greatest city in the world. It is the greatest market

RUSH PLANS FOR

Executive Board Orders Consulting Engineer to Prepare Plans.

Apparently all obstacles to the speedy construction of the Broadway bridge were cleared away yesterday morning when the bridge committee of the city executive board recommended that Consulting Engineer Ralph Modjeski pro-ceed to prepare plans for the superstructure so that bids for the steel to be used in it can be invited and a contract awarded in time for the material to be delivered in Portland as soon as the substructure is completed early

next spring.

By advertising for bids this fall the board will be able to get steel while the cheap market at present prevailing is still in effect.

The executive board will confirm the action of the bridge committee when the board holds its next regular meet-

Engineer Modjeski was instructed by Mayor Rushlight and the bridge committee to draw the plans for the superstructure so that every bascule draw company may bid, the purpose of the instructions being to provide the utmost competition.

According to a rough estimate made by Engineer Modjeski the cost of the superstructure will be in the neighbor-hood of \$800,000, but will not exceed

CREASONS, HURT IN AUTO

(Special to The Journal.)
Marshfield, Or./ July 22.—Mr. and Mrs. Al. Creason, of Roseburg, who were injured yesterday afternoon when their auto went down a bank into Coquille river, are being cared for at the Myrtle Point hotel at Myrtle Point. It would not be necessary to bring them to the hospital at North Bend, Or. Last evening it was thought Mrs. Creason might not recover, but today she was better. Her ankle and four ribs were broken and she suffered internal injuries, but her condition is not regarded dangerous. Mr. Creason had his shoulfer dislocated and his face bruised. Miss Creason escaped inpury. The accident happened near Myrtle Point.
