

Topic of Interest in the Realm Feminine

IN SOCIETY

Women Are Invited.

Members of the committee in charge of the reception to be given this evening by the Commercial club to the officers of H. M. S. Shearwater are most anxious that it should be understood that the women of the household were invited to be present. Invitations have been sent to members of the Arlington, University, Concordia and Press clubs, army and naval reserve, national guards and other organizations. Invitations are not confined strictly to the personnel of the clubs, but are rather generally extended. British Consul James Laidlaw and Mrs. Laidlaw, with Mr. and Mrs. Harry Burckwith, will receive with the officers of the Shearwater. The reception is from 9 to 11.

Gives Farewell Tea.

About 60 of Miss Ruth Teal's young girl friends responded to her invitations yesterday for a farewell tea before Miss Teal's departure for the east, where she will enter Miss Spence's school in New York. Pink gladioli were used in the reception room, red dahlias in the living room and pink asters in the dining room, where Miss Rhoda Rumelin, Miss Nancy Zan, Miss Helen Ladd and Miss Sara McCully presided at the table. Miss Hildreth Humason with Miss Maurine Campbell served punch in the living room, and the young hostess and her mother, Mrs. J. N. Teal, was Miss Elaine Carroll, of Baltimore, who has been a guest in the Benage S. Josselyn home this summer.

Pretty Home Wedding.

Last evening at 8 o'clock Dr. J. R. Wilson read the marriage lines which made Miss Edna the bride of Charles Whitney Morden. The ceremony was performed at the home of the bride's parents, Mr. and Mrs. Louis Burke, in the presence of about 40 relatives and intimate friends. Green and white were the attractive floral colors carried out in the living room in palms, smilax, lilies and clematis. The bride and groom were in white and green. The bride, who was given in marriage by her father, wore a lovely gown of white satin, rich with old lace. She carried a shower of bride roses and wore a wreath of orange blossoms in her hair. Her mother was her matron of honor. Mrs. Burke wore a dress of blue and white over satin with silver lace. Following the wedding a reception was held, when many friends called to extend their good wishes. Mr. and Mrs. Burke, with Mr. and Mrs. C. A. Morden, parents of the bridegroom, presided at the receiving line. The hall carried the same white and green decorations and in the dining room pink roses were used. At the table Mrs. Edwin Caswell and Mrs. Edward Northrup presided, while Mrs. E. L. Harmon and Mrs. Robert F. Hall served ices. Mrs. H. C. Holmes and Mrs. Dwight Edward presided over the punch bowl. Assisting about the rooms were Mrs. M. A. M. Ashley, Mrs. Charles E. Rumelin, Mrs.

Miss Blanche Stuart Scott, who aspires to become the second licensed woman aviator in the country. Miss Scott, who has done some remarkable feats of flying, is one of the most skilled of the aviators performing at the Minocla, Long Island, aviation field. The first licensed woman flyer is Miss Harriet Quimby, who is also a member of the Minocla aviation colony.

A. W. Payne, Mrs. E. W. Crichton and Mrs. E. S. Jackson.

Reception for Bride.

Mrs. C. A. Coolidge entertained with a reception yesterday afternoon for her niece, Mrs. John R. Brophy (Miss Letta Minkler). The home was beautifully decorated with shaggy pink and white asters. In the receiving line with the hostess and guests of honor were Mrs. H. Brophy, mother of the groom, Mrs. A. C. Finkler, sister of the groom, Mrs. E. M. Baker, the bride's godmother, Mrs. Arthur Camm of San Jose, Mrs. Coolidge's niece, and Miss Laura Brophy, who was maid of honor at the wedding. In the dining room Miss Jean Allison, Miss Naydine Baker and Miss Mabel Camm of San Jose served. Over 100 invitations were sent out for the affair. Mrs. Coolidge was gowned in green crepe with overdress of black chintilly lace.

Eminent Visitors.

The Society of Archeology last evening enjoyed a scholarly lecture on "Herod the Hellenite and the Ruins of His Age," by Professor Benjamin Bacon of Yale. Professor Bacon arrived Friday and left last evening for California where he will also lecture. He went in company with Professor Joseph Wickham Roe of the Yale Scientific School, who has been up on the Bering Sea making a geological survey for the government. Professor Roe was the guest of Mr. and Mrs. J. N. Teal during his Portland stay.

W. C. T. U. Meeting.

Central W. C. T. U. will meet as usual tomorrow afternoon at 2:30 in room 302 Goodnough building. The annual election of officers will be held and delegates elected to the state convention to be held in Medford October 5 to 8. All members are urgently requested to be present.

Random Notes of Interest.

Miss Dorothy Morrison and Miss Susan Clarke returned Sunday from an interesting stay in the north.

Mr. and Mrs. W. H. McVay, 527 East Seventeenth street north, are being felicitated upon the advent of a daughter this morning.

Mr. and Mrs. Robert McMath have returned to their home in Westport, after a visit of 10 days in British Columbia.

Mr. and Mrs. Harlan Klaber have taken up their residence at the Bowers for the winter. Mr. Klaber is a prominent hop man.

The Misses McBride are visiting relatives at Shiskine, Arran, Scotland.

Miss Luella Haight, who has been enjoying three months of ranch life in eastern Oregon, returned to Portland yesterday.

How to Banish Wrinkles Quickly

(From Guide to Beauty.)

If the average woman only knew it is not so difficult to preserve the youthful contour and velvety smoothness of complexion. Every woman hates to see her face wrinkled or baggy, and practically every one has experimented with some sort of patent remedy in the effort either to remove such condition or ward it off.

As a matter of fact, the most effective remedy in the world is one that any woman can easily make up herself at home, in a moment's time. Let her take one ounce of pure powdered paxalite, which she can purchase at any drug store, and dissolve it in a half pint of witch hazel. Apply this refreshing solution to the face every day. The results are surprising and instantaneous. Even after the very first application a marked improvement is apparent. The wrinkles are less in evidence and the face has a comfortable, snug feeling of firmness that is most delightful.

Grows Hair on Bald Heads

Resorcin is one of the latest and most effective germ-killers discovered by science, and in connection with Beta Naphthol, also a powerful antiseptic, a combination is formed which destroys the germs which rob the hair of its nutriment, and thus restores the healthy condition of the scalp, which prevents the development of new germs. Pilocarpine is a well known agent for restoring the hair to its natural color, where the loss of color has been due to a disease. Yet it is not a coloring matter of dye.

The famous Rexall "93" Hair Tonic is chiefly composed of Resorcin, Beta-Naphthol and Pilocarpine, combined with pure alcohol, because of its cleansing and antiseptic qualities. It makes the scalp healthy, nourishes the hair, retards the roots, supplies hair nourishment and stimulates a new growth.

We want you to try a few bottles of Rexall "93" Hair Tonic on our personal guarantee that the trial will not cost you a penny if it does not give you absolute satisfaction. That's proof of our faith in the remedy and it should indisputably demonstrate that we know what we are talking about when we say that Rexall "93" Hair Tonic will grow hair on bald heads, except, of course, where baldness has been of such long duration that the roots of the hair are entirely dead, the follicles closed and grown over and the scalp is glazed.

Remember, we are basing our statements upon what has already been accomplished by the use of Rexall "93" Hair Tonic, and we have the right to assume that what it has done for hundreds of others it will do for you. In any event, you cannot lose anything by giving it a trial on our liberal guarantee. Two sizes, 50 cents and \$1.00. Remember, you can obtain Rexall Remedies only at the Owl Drug Co., Inc., corner Seventh and Washington streets.

GIRL TO BE RAFFLED OFF; PROCEEDS TO CHURCH

(United Press League Wire.)

St. Louis, Mo., Sept. 12.—A young lady, whose identity is "shrouded in mystery" but who is guaranteed to be beautiful, sweet tempered and a good cook and housekeeper will be raffled off at the carnival of the Immaculate Conception church at Maplewood today. There has been a great rush for tickets, which are sold only to marriageable young men.

MISS A. ROBBINS TO LECTURE ON MANILA

Miss Annie A. Robbins, a national lecturer of the Woman's Christian Temperance union, will deliver a lecture on Manila at Tabernacle Baptist church, Forty-first and Holgate streets, Friday evening, September 15, at 8 o'clock. Miss Robbins served as chief nurse in United States army hospitals in the Philippines, and has an interesting collection of curios which will be displayed. No admission will be charged, but a free will offering will be taken, which is hoped may be generous. The lecture is under the auspices of Woodstock Woman's Christian Temperance union, which secured 30 new members during the recent membership contest.

HETTY GREEN'S SON GETS 6242 PROPOSALS

(United Press League Wire.)

New York, Sept. 12.—The total completed today by Colonel E. H. R. Green's private secretary, shows that 6242 proposals have been received by mail, wire and wireless since the son of Hetty Green announced that he was in search of a wife.

A MAN SAINT

Written for The Journal by Darra More.

HERE are a lot of fine men in the world. I saw one at close range the other day. He was a good looking, well put up man of 50 or more. He was a successful man from the worldly standpoint; he was the president of a bank and the owner of a town and country house.

When I saw the man he came in late at a matinee to join his wife and his sister-in-law from out Iowa way. And this is what I heard as the man slipped into a seat beside the wife:

"Well, I'd like to know where you've been all afternoon. It wasn't business that kept you. I know that. Esther and I have been sitting here for a whole act alone. Out with it. What were you doing?"

"I shall I describe her to you, or does the woman's conversation bring to your mind a be-spectacled, sour-faced, large-browed, jealous-eyed old dame in a fright of a white dress and a hat that Bridget-just-over would scorn to wear?" She was the most unpleasant looking party I think I ever saw.

and so on ad lib. I didn't know there were so many questions in the world. But he answered them all gently and intelligently.

During an intermission something all fluffy and smily and fetchy floated up the aisle. As is perfectly natural when one sees a usually good looking, silver haired man, the vision let her eyes rest a moment upon him. It was a treat to see such handsomeness. But, viola! the woman with the jealous eyes was on guard. I won't attempt to tell what words were there spoken, but the blowing up of the Maine could not have been more picturesque.

And the husband took it all without so much as a slap on her wrist. He didn't even deny that the vision had let her eyes rest for a moment upon him. He simply sat like the gentleman that he was and said nothing. And when the curtain fell on the last act, I saw him pilot that woman and her sister through the crowd to the waiting automobile, and put her into the machine as if she were the queen of his heart, the light of his life.

What is the answer? Where is the woman who slaves for her husband, trembles at his every word, looks into his eyes with undying devotion, and always pins a rose in her hair?

A Wife's Vacation

First day—

Dear John: I got here safe and sound. Not yet had time to look around. Please get up to the attic floor. And snap the lock on the roof trap door.

Second day—

Dear John: There is not much to tell. Except that I am feeling well. Please look at my fur coat and muff. The moths are in them, like enough.

Third day—

Dear John: I took a walk today. Things here are not so very gay. Please look around down stairs. I think the water's dripping in the sink.

Fourth day—

Dear John: Although it's quiet here I am not resting much, I fear. Is there a mouse trap in the house? Before I left I heard a mouse.

Fifth day—

Dear John: I cannot sleep at night. I'm afraid my nerves are not just right. Please shut the maid's room window down.

Sixth day—

Dear John: I was up when I left town.

Dear Wife: Your letters I have read. And I conclude from what you said that for your health it would be best if you'd come home and take a rest.

When You Make Jelly

July fruits, after preparing and washing, should be placed in a preserving kettle with as little water as possible to prevent burning, heated, and cooked through with such occasional mashings and stirrings as necessary. The hot juice and fruit should be then transferred to a jelly strainer and the juice should be strained into a receiver receptacle without squeezing.

Less juicy fruits, such as apples, quinces, etc., must be prepared by cutting into pieces and covering with water. With the extracted juice at hand, the housekeeper has had occasion to learn that success or failure depends almost entirely upon the proportion of sugar used. The correct proportion of sugar to the juice in hand means success, while an under-proportion means a tough jelly and an over-proportion means more or less of a failure, depending upon how great the overproduction is. Probably more good jelly making material is spoiled through the use of an over-proportion of sugar than from all other causes combined, says Good Housekeeping. And this because the would-be jelly maker follows the old rules of a measure of juice to a measure of sugar.

The important point then is the proportion of sugar to juice. This has been determined at the University of Illinois by repeated experiment with increasing amounts of sugar to the amount of juice until the place was reached where the product was this: That a given quantity of fruit juice of a certain kind contained a certain amount of the jellying principle known as pectin in solution. This was capable of using only a certain amount of sugar; too little sugar gives a tough jelly; too much and the juice refuses to harden or "jelly." When this occurs to amount of cooking can rectify the trouble and adding more sugar with further cooking only makes the jelly more like sirup. The remedy is more pectin, and this can only be added by more fruit juice.

Whether or not pectin is present in a juice, the housekeeper can readily ascertain by a simple test: Add a given volume of the juice (say one or two tablespoonfuls in a glass), an equal amount of ethyl alcohol (ask at the store for ethyl alcohol, 95 per cent), mixing thoroughly and cooling; if pectin is present a gelatinous mass will appear in the liquid which may be gathered up on a spoon. The housekeeper using this test will soon discover that apparently different juices contain different proportions of pectin; hence, probably one reason for the wide difference in different fruits for making jellies. The quantities of sugar used can be governed accordingly.

The cause of the crystallizing of jelly is an over-proportion of sugar.

La Follette's Advice to Suffragettes

In "Getting Out the Vote," the woman suffrage article in the September American Magazine, Helen M. Todd tells of an interview with Senator La Follette of Wisconsin. She writes:

"What would you do, Senator La Follette," I asked, "if you were disfranchised because you were a man? How would you feel if you were not merely not represented but were misrepresented as we women are in Illinois?" "What would I do?" he repeated, and paused. "It is almost impossible to put oneself in such a position. Do women feel it as keenly as men would?" "Just exactly the same as a man of her same type would," I answered. "Then," said Senator La Follette, "I should be eternally and everlastingly fighting until I got it changed. The trouble with women is the trouble with all idealists," he said, "you don't understand political human nature. You believe that if you can convince people that a thing is right they will act upon that conviction. We men have learned differently. We know that the machine politician seldom acts from conviction, but because we can give him his job or take it away from him. Women must make the politicians of Illinois understand that they can punish and that they can reward. Stop talking to your churches, societies and women's clubs. Suffrage is a great democratic principle. Take your cause to the people. Talk at Chautauques, state fairs, in the streets, in tents, anywhere where you can reach the common people. You must get a conviction."

The Invalid's Tray

Small quantities only should be placed before the invalid. The serving should be as dainty as possible. A sprig of parsley adds much to the appetizing appearance of any savory dish, and the variety should be as large as the prescribed diet will permit. Never let the patient feel faint for the want of food. Do not consult the invalid about meals if it can be avoided; an unexpected dish will sometimes create a relish for food. Beef tea and soups should always be free from grease. Warm food is more easily digested than cold.

Everything should be the freshest procurable, particularly fish, milk and eggs. Barley water is a nourishing diluent for milk when the latter is not easily digested.

On Both Sides of the Counter

Whether you're shopper or clerk the result's the same --- weariness, nervousness, thirst. Store din, vitiated air, pushing crowds, heat, stuffiness---on your feet for hours. No wonder that by the time you get away from it all you're half dead with fatigue.

solves the problem. It will relieve your fatigue ---calm your quivering nerves---refresh you---drive away your thirst. And you'll enjoy it---every drop.

Delicious---Cooling---Wholesome

Send for our interesting booklet, "The Truth About Coca-Cola" Whenever you see an Arrow think of Coca-Cola

This Kitchen Heater Insures a Warm Kitchen

Can be attached to your gas range. Has adjustable legs and will fit any style gas range.

This Kitchen Heater is equipped with a gas kindler for starting the fire.

It is made to burn wood, coal, bricketts, sweepings, rubbish, paper and garbage.

It is compactly built and takes up very little room.

Only the material which experience has proven to be the very best has been used in the construction of this heater.

The fire box and general construction are similar to that of a good coal range.

This Kitchen Heater may be utilized for cooking or boiling as the cast top plate has two eight inch holes.

By using this heater you can cook on your gas range in a warm kitchen all winter.

We have a special proposition to offer on this Kitchen Heater that will be of interest to you.

You can see this heater in operation at our Display Room, 5th and Yamhill Sts.

ROYAL BAKING POWDER
Absolutely Pure

The only Baking Powder made from Royal Grape Cream of Tartar
NO ALUM, NO LIME PHOSPHATE

Portland Gas & Coke Company
