

### FOREST RANGERS FOR INVALIDS

Government Requires Men of Ability and Stamina for the Work.

Washington, Oct. 7.—Various are the accomplishments required of the men who take examinations provided by the civil service commission for candidates who take the examination for forest rangers. Examinations will be held on October 21 and 24 in 14 middle west and Pacific coast states, New Mexico, Arizona and Alaska.

The entrance salary of an assistant forester is \$1150 a year. When special trouble, rangers must be citizens of the state or territory in which the national forest on which they are appointed is situated. Candidates, therefore, have small chance of getting jobs.

There are many things a ranger must be and know. A ranger of any grade must be thoroughly sound and able-bodied, performing severe labor under trying conditions. He must be able to take care of himself and his horse in regions remote from settlement and supplies. He must be able to build trails and cabins, ride and lead pack horses and mules. He must know something of land surveying, estimating and scaling timber, logging, land laws, mining and the livestock business.

Invalids, seeking light out-of-door employment, need not apply. For duty in some parts of Arizona and New Mexico, the ranger must know enough Spanish to conduct forest business with Mexicans. Where saddle horses or pack horses are necessary in the performance of their duty, rangers are required to own and maintain them.

Rangers' duties include patrol to prevent fire and trespass, estimating, surveying and marking timber, the supervision of cuttings and similar work. They issue minor permits, build cabins and trails, oversee grazing business, investigate claims, report on applications and report upon and arrest for violation of forest laws and regulations.

The examination will consist of questions regarding the use of the forest, supplemented by a field test. Horses for the tests in riding and packing will be provided by the forest service.

## Two Associations Combine to Hold Child Welfare Exhibit

Mothers' Congress and Parent Teachers' Association Will provide Interesting Entertainment for Five Days, Beginning November 1—Exhibit to Be Held at Armory—All Societies Are Interested.

Top, left to right—Mrs. R. H. Tate, president Oregon Congress of Mothers; public swimming pool. Lower picture—Girls at play in one of Portland's playgrounds. Such scenes as these will be prominently displayed at the exhibit to be held in November.

Inspired by the remarkable success that has attended the Child Welfare exhibits in several of the large eastern cities the members of the Oregon Congress of Mothers of which Mrs. R. H. Tate is president, and the Parent-Teachers' associations are planning a conference and exhibit to be held in this city November 1, 2, 3, 4, 5, which will embrace every organization and activity dealing with child life. Every phase of childhood will be illustrated beginning with the parents before the child is born.

While the local exhibit cannot by any means be as large or as complete as those in Chicago and New York, it will be of great interest to all who are interested in children.

The Portland exhibit is a new adventure and has not the backing of the city government or of wealthy philanthropists as the eastern exhibits have. The Portland exhibit, however, is gaining support every day and the women who are behind the movement are very enthusiastic over the prospects.

The exhibit will be held in the Armory and booths will be maintained by every club, society and organization which is in touch with the children in any way. In these booths will be illustrations of the activity carried on by the association maintaining the booth and literature and talks will be given explaining what is being done, the methods used and the results accomplished.

Among other subjects that will be discussed and of which illustrations will be given are: Homes, Schools, Churches, Libraries, Museums, Settlements, Work and Wages, Health, Recreation, Law, Clubs and Philanthropy. Illustrations will be made by working models with men, women and children showing how the work is carried out.

At each of the booths conferences will be held and talks given from time to time. There will be demonstrations for parents, teachers and others to whom the custody of children is entrusted. In these demonstrations the attempt will be made to explain in simple terms the bearing of the exhibits on treatment of children in actual, everyday life in order to gain the best results.

Among the subjects which are to be taken up in this way are the care of the new born child, especially with a view to the prevention of blindness; the various aspects of infant and child feeding, plays and games for the boys and girls in their homes, suitable books for home reading, and the work of the juvenile court.

Beside these talks, general meetings will be held at which addresses will be made by speakers prominent in the various phases of child life who will interpret the claim of child life and child care to the interest, support and service of the whole city.

### GOTHAM IS HOLDING BIG REAL ESTATE SHOW

New York, Oct. 7.—Including as it does the varied list of exhibits which made up the two previous shows of the kind given here, together with a new section devoted to apartment houses and building materials, the third real estate and ideal homes show, which opened in Madison Square Garden this afternoon, is the largest and most comprehensive exposition of its kind ever held in America. The display embraces every type of building from the bungalow to the skyscraper apartment house, illustrated in models, photographs and drawings, as well as samples of every building material which enters into their construction. Equipment, decorations and furnishings are shown also.

Potatoes that show a violet tint are said to be the highest in nutritive value.

## No One Need Remain Fat Now

Physician Banishes Fat by New, Marvelous, Simple Method After Drugs, Medicines, Advertised Remedies and Starvation Diets Had All Failed.

"REDUCED MY WEIGHT 100 POUNDS"

This picture tells plainer than all words the marvelous improvement to be made in a woman's appearance when superfluous flesh is removed.

**USE THE FREE COUPON TODAY**

On Nov. 1, Dr. F. Turner, a well-known Philadelphia physician, was one of the fattest men in that great city. He weighed 244 lbs. His waist measured 48 inches and he wore a 17 1/2 collar. His health was miserable, he was weak and tired all the time, dull, heavy and listless, was unable to work to sleep nights, or to digest his food. He had just been refused life insurance because of his excessive weight. He was told that his very life was in grave danger, and that unless he got rid of his fat he might drop dead at any moment.

He had previously tried all the methods of flesh reduction known to medical science, starvation diets, purging, violent exercise, etc., but they had done more harm than good.

With practically a death sentence staring him in the face and a wife and family to support, Dr. Turner thought hard. He worked, experimented, studied on a plan entirely original and different from any he had used, and finally made a most wonderful scientific discovery by means of which he has actually reduced his weight 100 lbs. gaining in strength and general health with every pound lost.

On Jan. 1st of this year Dr. Turner weighed 150 lbs.; his waist measured 37 1/2 inches and he wore a 16 1/2 collar. His health is perfect, he is capable of hard work as at 25 years of age, and his mind is clear and buoyant.

Dr. Turner's wonderful success has amazed his friends and fellow physicians. His method is simple, yet thoroughly scientific. There are no medicines or drugs to be taken, nothing to wear, no physical culture or violent exercise, no Turkish baths, sweating, purging, starvation diets or weakening methods of any kind. On the contrary, the system, which any person can readily practice in their own home, without medical assistance of any kind, is designed not only to remove superfluous flesh at the average rate of about one pound a day, but to strengthen the entire body and benefit the general health right from the start.

**Free Flesh Reducing Coupon**

This coupon entitles you to one copy of "HOW I REDUCED MY WEIGHT 100 LBS." by Dr. F. Turner, as explained in the announcement above. Cut out this coupon. State that you have cut it from The Portland Journal, and send it direct to Dr. F. Turner, Suite 1020P Clark building, Syracuse, N. Y., and the book will be sent you by return mail.

### BAY CITY IS READY FOR FAIR CEREMONY

San Francisco Prepared for Ground-Breaking Services to Be Held Oct. 14.

San Francisco, Oct. 7.—All is in readiness for the ground-breaking ceremonies which are to be held in the Stadium, Golden Gate park, October 14. The committee on ground-breaking and parade has practically completed its arrangements and the day's celebration will mark an epoch in the history of San Francisco.

President Taft is expected here on Friday, October 14. He is to be banqueted the night of his arrival and the following day will break ground for the 1915 exposition. He will use a solid silver spade and the first shovel of dirt will be placed in a handsome casket made of redwood burl, glass and decorated in silver. Both the shovel and casket were donated by George Lewis, of Shreve & Co.

The banquet is to be held at the Palace hotel. It is doubtful whether the committee can find accommodations for the hundreds of citizens who wish to pay \$20 per plate to break bread with the chief executive of the nation. Many novel decorative features are promised at the banquet, which will be one of the most exclusive functions ever given in this city.

Following is a correct itinerary of the president's stay in this vicinity:

Friday, October 13—3:30 p. m., arrives in Oakland; 4:30 p. m., lays cornerstone of Oakland city hall; 5:30 p. m., leaves Oakland; 6 p. m., arrives in San Francisco, escorted to headquarters in St. Francis hotel; 7:30 p. m., citizens' banquet to the president at the Palace hotel.

Saturday, October 14—Noon, president breaks ground for the exposition in the Stadium in Golden Gate park; 4 p. m., conclusion of ground-breaking ceremonies; 8 p. m., carnival and illuminations of downtown streets.

Sunday, October 15—11 a. m., president attends church; noon, president met by committee of exposition directors and taken for automobile trip inspecting the exposition site; 1 p. m., lunch at the Cliff house; 5 p. m., president pays official visit to the Pacific squadron.

The special rates made by the Southern Pacific, Santa Fe, Western Pacific and Northwestern Pacific railroads and steamship companies for the ground-breaking celebration will bring thousands of visitors to San Francisco. It is expected that it will far exceed the number that attended the Fortia celebration. The visitors from the interior of the state will have an opportunity of seeing the president of the United States, the ground-breaking in the Stadium, the great parade, carnival, Pacific squadron in the bay, and other interesting features of the three days of festivities.

### MUNICIPAL LIGHTS PLEASE ASHLAND

Streets Now Well Illuminated While City Plant Draws the Private Business.

Ashland, Or., Oct. 7.—The municipal street lighting system, which was put in operation this week has more than come up to the standard promised for it. For the first time in many years the streets of Ashland are properly and creditably illuminated. The street lighting contract with the Siskiyou company, which has just expired, called for 20 candlepower lights. The ones now in operation are of 100 and 200 candlepower and give a light almost equivalent to daylight. North and East Main streets, Fourth street and Oak street, are equipped with three light electrolera, carrying a total of 230 candlepower each; the Boulevard is lined with single light electrolera carrying 200 candlepower each. It required 55 horsepower to run the street lights and the peak load on Saturday nights for the entire city was 175 horsepower. It has been claimed by opponents of municipal ownership that the city plant would be insufficient for the demands of the system, but the normal capacity of the plant is now 400 horsepower.

About half the citizens have connected up with the city plant and others are daily switching from the old company. So unanimous is the approval of the new plant that the Siskiyou company has made overtures to the city for a purchase of the municipal plant. It is doubtful, however, if the city will consent.

The deputy state factory inspector was in the city a few days ago and pronounced the plant the best small one in the state.

### HARNEY VALLEY FARMERS NEED MORE THRESHERS

Burns, Or., Oct. 7.—The farmers in Harney valley are having trouble to get their grain threshed, as there are only three machines in the field. The crop is so large this year that three outfits are not enough to handle all the grain. Harvest has been going on six weeks and the crops around this city are not all threshed yet and there are large crops of grain at Harney City, Sunset valley, Silver Creek and Harman. Some of the farmers are uneasy about their crops, for if stormy weather sets in the grain will probably be lost or used for stock feed. Several localities will have new machines next year.

### ECZEMA

PIMPLES, and all other SKIN DISEASES, including SCABIES (ITCH), safely and permanently cured with ANTI-ZEMA, the great SKIN MEDICINE. Send today for a FREE trial Treatment, and be convinced that ANTI-ZEMA is a positive cure for all SKIN DISEASES. The ANTI-ZEMA COMPANY, Lock Drawer No. 11, Alhambra, Mich.
