SALITHOL is the most wonderful hair remedy in the world. Not a mere pleasantly perfumed hair wash like the drugstore advertised "tonics," not a greasy pomade, but a marvelous original scientific discovery that genuinely and actually grows new hair on the haldest heads where roots are not totally destroyed, in thirty days or less, and quickly ends hair and scalp trouble of every form and description. I will prove this to 500 readers of this paper by sending them a full size 50c package of SALITHOL absolutely free to use on their own head.

of SALITHOL absolutely free to use on their own head.

The SALITHOL treatment has as its base, the juice of the rare and little known Pernambuco Shrub of South America, which grows new hair with utterly amazing rapidity. Hundreds of people, living in every corner of the United States, testify to its marvelous qualities.

United States, testify to its marvelous qualities.

One lady writes to say: "My husband has been bald for 25 years and has used everything. The first week after using your treatment his hair began to come in and what hair he did have is turning back to its original color." A lady user says, "I have been terribly tortured with itching scalp and dandruff. Your treatment stopped them quickly." Another user says, "My hair was coming out in handfuls with every combing. One application ended all trouble,"

all trouble."

I want 500 readers of this paper to step forward and send me the free coupon below—readers with any form of hair and scalp trouble. I want baldheaded people—the balder the better—folks who wear wigs—who think their hair roots are dead and that nothing can help them. The hair roots rarely die and merely lie dormant beneath locked folicles waiting for a true stimulant and scalp food to set them to work again.

Here is the test that tells. Use SALITHOL one week. Then take your mirror and note the countless tiny hairs that have sprung up on every bald and thin spot. Watch them grow. Be careful not to apply where hair is not desired.

and called our family physician who at once pronounced the disease eccema. The little fellow was under his treatment for about three months. By the end of that time, he seemed no better, became discouraged. I dropped the doctor's treatment, and commenced the use of Cuticura Soap and Ointment, and in a few days' noticed a marked change. The eruption on his cheeks was almost healed, and his shoulders, arms and breast were decidedly better. When he was about seven months old, all trace of the eccema was gone.

"During his teething period, his head and face were broken out in boils which I cured with Cuticura Soap and Ointment. Surely he must have been a great sufferer. During the time of teething and from the time I dropped the doctor's treatment, I used the Cuticura Soap and Cuticura Ointment, nothing else, and when two years old he was the picture of health. His complexion was soft and beautiful, and his head a mass of silky curis. I had been afraid that he would never be well, and I feel that I owe a great deal to the Cuticura Remedies."
