St. Rogatien Arrives at Astoria in 15 1-2 Days From Hawaiian Port; Averaged for Week 300 Miles Daily.

A record, for the last two years at least, was made by the French bark St. Rogatien, which arrived at Linnton last night, when she made the run from Kahulul to Astoria in 151/2 days, which is half a day better than the passage made last month by the lumber schooner Ariel, which arrived from the same port in 16 days.

While this is not the record for the run of about 2800 miles from the Hawalian port, it is said to be the best in several years and Captain Louis Miaguer says that he would have made the passage in 12½ days but for the fact that the St. Rogatien was three days off the mouth of the Columbia river because of adverse winds.

Leaving Kahului at 4 p. m., November 7, with 1200 tons of sand ballast, says Captain Miaquer, the St. Rogatien got the slant of a good breeze and with every stitch of canvas drawing legged it along at a fine clip, having a big bone in her teeth until the last three days of the passage. For five or six days on the latter part of the run she averaged 300 miles a day, her best run being November 17, when she made

The voyage from London was not so good, says Captain Miaquer, the passage requiring 150 days in practically con-tinuous bad weather and ending with the injury of Victor Sergent, the first mate, just before the vessel reached Sergeant was so badly inospital at that port suffering from internal injuries.

When the bark reached the Horn on her voyage from London she ran into terrific gales, accompanied by snow, which soon become ice on the decks and in the rigging and it was two months before she succeeded in beating her way around the Horn to the Paci-fic. From that time she had bad weather until within three days of Kahulul, when she got into a fierce gale in the northeast trades. It was during this gale that a mountainous wave broke over the decks of the bark and was picked up and carried along with it striking something on the way which injured him badly and he was picked up unconscious after the wave had passed over the vessel.

Captain Miaquer was here last 11 years ago, when he was mate in the French ship St. Donatien, which was lost four years ago with all hands on a voyage from Bordeaux to Adelaide. She was never heard from after leaving the former port. This is the first voyage of the St. Rogatien to Port-

After discharging ballast at Linnton the St. Rogatien will come up to the local harbor to load a cargo of wheat for the United Kingdom for M. H. Houser,

REPAIRS TO MANZANITA

Lighthouse Tender Is Here to Have Work Done on Derrick. Repairing beacons and exchanging old

ornout lanterns while on her way up the river, the lighthouse tender Man-zanita arrived in the harbor this morning to have her derrick repaired. She docked at the Ainsworth wharf, where she discharged a gas buoy and some spar buoys that are to be repaired and afterward proceeded to the Vulcan iron works at Alaska dock, where the derrick will be repaired.

The tender Columbine, which has been in Alaska during the summer, is now her way down to the sound. She put in at Port Townsend yesterday for a supply of water, as that in Seattle could not be used. She will visit some

that other warnings might have to be ordered later in the day. The report from North Head this morning gave the wind as south 35 miles. Rain and fog and a moderate sea. The channel was

The forecast for Portland and vicinity is rain this afternoon, tonight and Sun-day, with southerly winds.

STANLEY DOLLAR DELAYED Trouble in Engine Room Holds Port-

land-Bound Vessel at Bay City. When the steamer Stanley Dollar under charter to the California-Atlantic Steamship company, was about to sail from San Francisco for this port Friday night she had a breakdown in the engine room which necessitated her remaining in the Bay City until re-pairs could be made. She is expected to get away from the Golden Gate next Monday carrying a full cargo of cement for this port. After discharging here she will load a full cargo of 1 400,000 feet of lumber which she wi transport to Panama, going to Ba bon direct from here.

RICHARDSON ROCK WILL BE LIGHTED

Scene of Many Shipwrecks to Be Made Safe by Whistling Buoy and Gas Light.

Washington, D. C., Nov. 25 .- A flashing white acetylene light and a pow-erful whistling buoy at Richardson rock, in the Pacific ocean, about 20 nautical miles off the mainland of California at Point Conception, the scene of several shipwrecks, have been orrered by Secretary Nagel of the department of commerce and labor, in ac-cordance with the recommendation of Commissioner Putnam of the bureau of lighthouses,

The rock has been the scene of several wrecks, the most recent of which was in September last, when the lumber laden schooner Comet, bound from Grays Harbor to San Pedro, struck the rock in a dense fog, but succeeded in reaching San Miguel island, where she was beached and proved a total loss. A man lost his life in an attempt to the crew established on the island. The light will be a flashing white

clear weather it may be seen about 12 danger of confusing it with any light that may appear in its vicinity or with any of the shore lights in case a mariner may be out of his reckoning.

The flash is operated automatically

by the pressure of the same gas which is burned in the light. The gas supply will be delivered by the lighthouse der, the crew of which will give the jured that he had to be left in the light such other attention as may be

For a sound signal, a whistling buoy sounded by the action of the sea, will be moored off the rock.

ALONG THE WATERFRONT

After an absence of about two weeks as a result of being barbound the gas chooner Della, Captain Casaday, is expected to arrive this afternoon from

The French ship Thiers, which has been discharging general cargo from Beifast, will probably shift to the Linnton ballast dock Monday to get some ballast out and be lined to load wheat Laden with 35,000 barrels of white and fuel oil the Union Oil tanker Oleum, Captain Curtis, arrived at Portsmouth last night from Port Harford and will sail for that place again this after-

When she arrived at 5 last night from Los Angeles and San Francisco, the steamer Bear, Captain Nopander, had 150 passengers and 2100 tons of general freight. Fine weather on the

Clearances at the customs house in cluded the steamer Yellowstone with 800,000 feet of lumber for San Pedro and the steamer Nome City with 700 tons of barley shipped by Kerr, Gifford & Co., and 400,000 feet of lumber for

STORM SIGNALS OUT

Weather Bureau Gives Warning of Disturbance in Alaska.

Southeasterly storm warnings were ordered out by District Forecaster E. A. Beels of the weather bureau at 7:15 this morning for a disturbance in Alaska which is beginning to influence the northern part of this district. The warnings included only Blaine, Bellingham and Anacortes, but Mr. Beels said that other warnings might have to be ordered later in the day. The report from North Head this morning gave the wind as south 35 miles. Rain and fog

'BACK HAUL' RATE DECISION GIVES TO STATES A GUIDE Twohy Brothers Have Work

Oregon Railway Commission's Work Much Simplified by New Interstate Rates Just Set From Coast Points.

(Salem Bureau of The Journal.) Salem, Or., Nov. 25.—"The decision he interstate commerce commission in the 'back haul cases,' fixing reasonable interstate rates between Portland, Se-Though Richardson rock is about 50 attle and Tacoma and eastern Oregon feet high, the sea sometimes sweeps over it and the structure which will support the light will be frequently washed with spray.

The rock has been the scene of sev-Altchison, chairman of the Oregon commission, last evening. The Oregon and the Washington commissions will doubtless hold another conference imcommissions will mediately. The two bodies have been working hand in hand in wrestling with the rate situation in the two states.
"In the first place, the decision of

the interstate commission absolutely swim to the wreck from the camp which fixes interstate rates to certain ruling points to which the state commission must conform in the decision of com clear weather it may be seen about 12 confusion will result. For instance, the miles. It will show a flash every three seconds, which will be visible three tenths of a second. It will, therefore, be so distinctive that there will be referred to the control rates which can be characteristically be so distinctive that there will be referred to the control rates which can be characteristically be seen about 12 control rates which can be characteristically and the control rates which can be characteristically as the control rates which can be characteristically as the control rates which can be characteristically as the control rates which can be control rates. light of about 530 candlepower, and in plaints pending before them or else points immediately the other side of the line, within Oregon; and rates which the Oregon commission can prescribe to Huntington are largely the trolled by the interstate rates to Idaho points immediately across Snake river.

Where Washington Is Helped "Similarly the rates fixed by the inerstate commerce commission Portland Spokane, Walla Walla and other eastern Washington points must govern the possible rates from Seattle and Tacoma to these places.

"Another important consideration fo us is that the rate, as we understand it, is predicated on an approval of the ercentage relation between the various class rates, which has already met the approval of both the Washington and Oregon commissions.
"The fixing of these rates will per

mit the respective state commissions to proceed with the rate adjustments conemplated in the recent hearings, unembarrassed by the fear that a carefully worked out tariff might be entirely disorganized by an order of the interstate commerce commission. due to all concerned to say that the two state and the federal commissions have worked in harmony in this matter, each carefully keeping within its own sphere, with the thought of an ultimate adjustment of class rates, whether distance rates or rates out of large centers which will be entirely logical and which will have attached to t some degree of permanency.

"Idaho Wall" In Abolished "One pleasing feature of the order is he abolition of the socalled Tdaho Wall,' which resulted in practically restricting coast manufacturers to territory within Oregon. This was accomplished by a sharp rise of rates in Ore-gon Short Line territory, which never have been defensible on any theory other than a desire to save certain territory for manufacturers and ducers who could give the Short Line and its connections the long haul from the east instead of the comparatively short haul from its western terminus at Huntington."

FINE COLLECTION OF PENNIES INSTALLED IN FREE MUSEUM

The finest collection of copper cents ever exhibited west of the Mississippi is what numismatists pronounce the Charles L. Parrish exhibit installed in the municipal free muscum at the city hall yesterday.

Mr. Parrish, who is an old Portland resident, has been engaged in picking up odd or rare coins for the past 23 years. values his collection at \$25,000, or rather, he refuses to place a valuation on it, the amount named being a conservative estimate of the numismatic worth of the collection.

The Parrish exhibit contains a copper cent of every mintage, there being just 100 coins dating back to the day when the country was a swaddling infant. Mr. Parrish also owns some half dol-lars of rare value. With the exception of the dates of 1793, 1799, 1804 and 1815 he has a straight run of half dollars of every annual mintage from the first one to the present.

In his foreign collection Mr. Parrish has one coin that dates back to a period 127 years before the birth of Christ, The entire Parrish collection has been loaned to the city museum and has been assigned a prominent position on the third floor of the city hall by Curator C. F.

WOMAN ARRESTED FOR ASSAULT ON SCARECROW

(United Press Leased Wire.) San Francisco, Nov. 25.—Because, sh declared Luigi Lugo's scarecrow looked like its "hated" owner, Mrs. Mary Haman "brained it, beheaded it, and tore it limb from limb." She was arersted for battery. But she'd battered Mr. Scarecrow so completely he couldn't appear against her. The judge couldn't hold her for blood-

less murder, so she was released. What makes Lugo peeved is the fact that Mrs Hammond satisfied her lust for his life by annihilating his effigy. She consid-WILL PLAY TONIGHT of dire penalty.

Rebuilding Mine Mill.

Baker, Or., Nov. 25 .- Another mining roperty in Baker county is preparing for enlarged operations, the Washington Gulch mine, operated by the Kent Ore Reduction company under the manage-ment of H. W. Kent. The property is located about eight miles from this city and near the site of the first placer mines in eastern Oregon. The mill is being entirely rebuilt and increased in capacity and the company is installing process, which has attracted the interthe work his personal attention

EUGENE-COOS BA

men Clearing Right of Way Near Big Tunnel.

(Special to The Journal.)
Eugene, Or., Nov. 25.—After more
than a week spent in preliminaries, build the first 23 miles of the Southern Pacific company's Eugene-Coos bay branch, began actual work on the road today. A small force of men was put to work clearing the right of way sev-eral miles east of the big tunnel at the summit of the Coast mountains. No decision as to whether grading or the prairie between Eugene and the mountains will begin this winter, has been reached, but the present good weather is very encouraging to the con tractors and the work may start within very few days. The last piece of right of way between Eugene and the of land owned by the Lane County Asset company, five miles west of the city, was secured yesterday, when O. Jensen gave the company a deed to a triangular strip of land that adjoins the main line where the new line will branch off, in the porthwestern end of

the city. John Twohy, head of the firm of Twohy Bros., arrived here yesterday from San Francisco and his sons, John D. and Robert Twohy, arrived simul-taneously from Portland. Another son James H., is in Portland, attending to the shipment of supplies to Eugene Several carloads of materials and construction outfit have arrived.

HALF HOLIDAY ON FARM EACH WEEK URGED BY HOLDEN

(Continued from Page One.)

have running water piped to your barn stock sheds and poultry houses, but now many of you have such modern conveniences in your house? I tell you gentlemen, that in the march of progress you have forgotten your wives and have taken better care of your hogs and your cattle than you have of your life partner, who has done a good big share of building up the home." Mr. Holden and other speakers who

have, so far appeared before the congress, contend that next to the country home, the country school and country church come in line as leading factors in the consideration of country life, but that these are on the wrong track. "Instead of fitting boys and girls for their life work on the farm, they are serving to make them discontented, Mr. Holden said.

Country boys and country girls must be brought up to speak in terms of ac-tion, of their career as landed gentlemen and gentlewomen of a great commonwealth. They must be taught to 'make good' on the farm or you will

For Men Who Have Lost It

For the betterment of school con tions in the rural districts, school is being taught today in a model school room. A more inviting place of study would be hard to find and at noon warm would be hard to find and at noon warm luncheon was served to the children, just as it is every day in district 29, known throughout this part of the state as a model country school.

Along educational lines, L. R. Alderman, superintendent of public instruction in Orangon who was honored struction in Oregon, who was honored with the chairmanship of Friday morning's session, is today giving the most valuable pointers. Oregon's plan for the consolidation of school districts and establishment of country high schools is proving of great interest and

may be adopted in many districts represented at the congress. in an address, illustrated with an imposing array of exhibits, figures and data, Mr. Alderman showed today that under Gregon's compulsory educational plan and the law that provides for the payment by the county of high school tuition, foun out of every five eighth grade graduates in Lane and one or continuous and sink again. two other counties are entering high school at this time.

Country Righ School With 35, He cited the instance of the Pleasant Hill district in Lane county, from which only three pupils were sent to high school in the city the year before a high school was established at Pleasant Hill, while 16 entered the new high school district the first year. There school during its first year. There are now \$5 pupils attending this country high school, which was opened in

The value of the country high school and county tuition payment plan was further illustrated by financial facts, showing that it cost the fathers of the three pupils \$200 each to send their children to the city high school and that the total of that amount was enough to pay the salary of the coun-try high school teacher the next year, when 16 pupils attended. Country Manual Training Urged.

Mr. Alderman urged greater effort along manual training lines in the country schools, showing the benefit to be gained by teaching domestic science and economy both to boys and girls in these institutions as well as places of higher education of higher education.

Valuable demonstrations in good road making have awakened the farmers at-tending the congress to possibilities in this line for their own communities, and it is being proposed that each devote one day a year toward improvement of highways.

Country Life Congress, while s child of the northwest, is by no means destined to be confined to this section, according to the belief of prominent men in the eastern and middle western agricultural world, and it is indicated that before many years farmers of the whole United States will be leagued to-

\$3.50 Recipe Free For Weak Men.

Send Name and Address Today-You Can Have It Free and Be Strong and Vigorous.

men and gentlewomen of a great commonwealth. They must be taught to make good on the farm or you will never be able to keep them there.

"Fathers, let your sons help you plan is the work on the farm, place confidence in them that they may take an interest in the place. Mothers should plan the week's work and the year's work with their daughters.

Guide Their Fun on Farm.

"Heads of farm families should direct the amusements of their children. Boys should not be permitted to go to town and learn to smoke, swear and drink and take their first lessons for the penitentiary, thinking they cannot have any fun on the farm.

"We need more life in the sermons preached on Sunday in our country churches. Our pastors as a rule put us all to sleep when we do go to church. But if they would stop four or five times during a sermon and shout 'corn,' wheat' or 'barley,' they would keep us all awake and interested."

Great stress is being laid upon the improvement of sanitary conditions in the farm homes and in country schools, much money having been expended in exhibits showing the old unhealthy, germ-breeding and gloomy farm house beside of which stands a model, modern farm home, with its hot and cold water, plumbing, large, light, airy rooms, electric lights, flowers beds and

genuine playgrounds for the little chil-dren. gether in a great country life organi-dren.

Among those attending from distant points are Frank G. O'Dell, secretary of the Nebraska Rural Life commission; B. H. Crocheron, Sparks, Md., Warren Dunham Foster, member of the Massa-chusetts homestead commission, and P.

G. Holden of the lows State college Frank G. O'Dell, secretary of the Nereska Rural Life commission, rouse enthusiasm with his story concerning the Nebraska farmer's long, hard fight for better market conditions, for a bet-ter tax system, for modern educational facilities; how they learned to produce two bushels of grain where one formerly
