Only 50 farm units of 40 acres each will be available for entry in 1912, and about 35 of these will not be available for general entry until the department has acted upon the cases of persons who claim preference rights, and this may require many months.  
Attempted prosecutions for false oaths in relation to the character of the land to which entry is sought or concerning the legal qualification of the would-be entryman, have failed of success because it was held that these oaths were not specifically required by statute, and Land Commissioner Dennett urges legislation to correct these defects.
