Discusses Many Topics .-- The asso ciated Woodlawn Improvement associa-

at its regular meeting Friday night discussed the sewer problem from the standpoint of the "Dredging of Co lumbia Slough" as being the only feasible plan for disposing of the sewage as recommended by City Engineer Hurlburt and strongly indorsed his recommendation, which is really the plan passed by this association over one year The association also deprecates the action of certain officials who have recently rushed into print criticising the plan as outlined by the city en-gineer for solution of this difficult problem. The association noted with pleasure the destruction of the old cars on Plaza block which have long been considered an eye-sore. The meeting closed the second year of the Woodlawn Improvement "association under the ad-

ministration of President Charles York and Secretary W. Manley Cook In reviewing the work of the association for the last two years it was noted that this much had been accomplished, increased car service, water main extension, street improvements, electric street lights, gas mains extended, and fire protection with strong prospect of early consummation of plans for the establishment of a branch library for the Woodlawn district. At the next regular meeting of the association Friday. 1, the annual election of officers March will be held.
