SPECIALIST Modern Specialists, Portland, Or. Gentlemen—I wish to thank you for the benefit that you have done me in restoring my health. It is hard for one who has been in poor health for three or four years to truly show his apprecia-tion to a doctor that has done for him what you have done for me.

During the last three years I have doctored with doctors that were highly recommended to me, in Denver and Purble, Cole, and also here in Portland, but for some reason they did not seem to benefit me any, although I think they were sincere and tried to do their best.

Allow me to say that if in return for our kindness I can recommend or bring my new patients to your office, I will to it gladly, feeling that I am obligated you in immeasurable terms.

With best wishes for your said that I am obligated you in immeasurable terms.

With best wishes for your continued success, I remain, Respectfully, B. D. HENDERSON. If you are sick and ailing consult with us free today.

I know my experience with it is far greater than any other physician or specialist in Portland. I have given this remedy a severe test, having met in my experience some extremely bad cases, and I can say without fear of contradiction that it is the greatest discovery of the age and the nearest absolute and permanent cure for Blood Poison, regardless of the stage of the disease or the symptoms present. Every

disease or the symptoms present. Every symptom of the disease from the small cruption to the worst kind of running sore, are checked in their progress at once and completely healed within ten License days. There is no longer any doubt about the wonderful curative power of this remedy, and when given by an ex-pert there is absolutely no danger of

pert there is absolutely no danger of any kind from its use. I introduce it DIRECTLY INTO THE BLOOD by the INTRAVENOUS METHOD, the only proper method of administering it, and the one recommended by Prof.

Ehrlich himself, as the following extract from his letter shows:

"Judging from all the reports received by me, it appears that the intravenous injection is to be preferred to all other modes of administration, as far as permanency of effect is concerned. Although I have to admit that this method of administration will prove an obstacle to the introduction of the remedy in general practice, on account of certain technical difficulties. I believe that the interests of the patient demand that only the most efficient form of treatment should be decided on. * * I should feel much obliged to you if you will—as heretofore—assist me in this direction and in the future employ as much as possible the intravenous method for the administration of the remedy.

My equipment is as fine and in the future employ as much as possible the intravenous method for the administration of the remedy.

My equipment is as fine and in the future employ as much as possible the intravenous method for the administration of the remedy.

I also treat with remarkable success all allments, such as ENLARGED VEINS, NERVOUS DEBILITY, BLADDER AND KIDNEY TROUBLE and CONTRACTED DISORDERS. I GIVE INDIVIDUAL TREATMENT I wish to make one point distinct and emphatic. The remedies employed in treating my patients are prescribed and compounded to meet the exact requirements of each individual case. Every patient of mine can rest assured that the treatment he receives is not of the "ready-made" kind. I make a special study of every case I treat, note all conditions in the beginning, note all developments as the cure progresses, and so alter my remedies as to accomplish just what my knowledge and trained perception tell me must be accomplished. After diagnosing your case I will know just what you need.
