Improved Types of Plants Raised by Our Grandmothers Popular Once More; Early Varieties Named. -

By Ralph R. Routledge.

The old-fashioned gardens of our grandmothers contained a wealth, of gorgeous bloom throughout the entire er, from early spring until autumn. These gardens are again very popular, and since the advent of the new and highly improved strains of perennial ants, such as Aquillgias, Campanulas, Delphinium, Helianthus, Phlox, etc., It is possible to convert these gardens into veritable bowers of beauty. Beginning almost before the snow is off the ound, early-flowering varieties open their blossoms as welcome harbingers of spring, and are followed, in well as-sorted beds, with a profusion of blooms until winter.

In the eastern states no class of plants enjoy greater popularity at the present time than the hardy perennials, In the west they have made rapid strides into public favor the past few years, until now they may be considered to have a prominent and permanent place in our western gardens. Everywhere they have given the best of satisfac-

Resemblance to Mature. According to the modern idea of land scape gardening, the ideal garden is not whose beds are laid out in geometric lines, but rather one where there is a closer reseblance to nature, and this can best be effected by the use of the perennials and herbaceous plants, which give the greatest range of color and at the same time a continuity of bloom throughout the season. Almost every week, until late in the fall, some new variety bursts forth into entrancing loveliness, blooming so persistently as almost to defy Jack Frost in his efforts to subdue the floral kingdom. start may be obtained at so small an expenditure as not to be counted when measured with the satisfaction and pleasure derived from them. .

Once planted they are there to stay, requiring very little care, increasing in size and bloom and growing better from to year. Perennial plants are those that live year after year, only dying to the ground in winter, the roots remaining alive and dormant in the ground; this distinguishes them from annuals, which must be raised from seeds or cut-

Raising Perennials. Perennials can be raised from seed, but very few of them bloom the first therefore those who wish get immediate results, should get field

Flowering bulbs and roots, such as peonies, tulips, iris, crocus, snow-drops, anemones, lilies, narcissus, dahlias, siadioli, etc., are very desirable in per-

their city and country places.

Portland is so favorably situated and enjoys such ideal weather conditions, that it can have the most gorgeous and beautiful floral display and lovely green

lawns, during the entire year.

Many people will spend thousands
of dollars on the home, inside furnishings, etc., and yet neglect the beau-tifying of the yard and grounds. It is well to remember that there is nothing that adds a greater air of refinement or the real touch of aristocracy to the home than a beautiful lawn, flowers shrubs and trees.

Principal of Ockley Green School Is Endorsed by Riesland for Superintendent.

Commending Guy W. Henderson, principal of the Ockley Green school, as a man peculiarly fitted by his training and talents to supervise the work of the Multnomah county schools, Ben Riesland, who has taken a large interest in school affairs, yesterday told why he favors the election of Hender-son as county school superintendent.

"Professor Henderson has never bee in politics and is prompted to aspire to the position of superintendent by the urgent request of prominent educators, said Mr. Riesland. "The crying need of detailed supervision of the common chools of the county makes it absolutely necessary to select a man who

is energetic as well as capable. "He is a young man who has made his way by his own effort. His educa-tion has been obtained in the practical school of demonstration to others, as well as in the best colleges and universities in the land. He is a public school lowest step to the highest attainable in the county schools. He has had prac tical experience in the superintending of high schol work, and is therefore supervision and development of an ef-ficient high school system in Multno-

an ardent advocate of the 'back to the land' movement, believing that high r country life should be the ideal of our

best citizens. "Multnomah county needs stricter supervision of the suburban This requires careful and indefatigable labor. Mr. Henderson is reputed to be

more interested in the beautifying of of Ohia, was educated in the commo schools of Springfield, Ohio, and later went to high school in that city. His education was continued in the Otterbein university, and after completing the course at this college he took further work in Harvard university, preparing himself for the profession of teaching. As an auxiliary to his academic education he enjoyed a normal ourse at Valparaiso, Ind.

His first experience as a teacher was at the age of 16, and since that time he has been engaged in school work continuously, either as a student or teacher. Among the more important positions which he has filled have been township superintendent in Logan county, Ohio, which position he filled at an early age. Later, principal of the schools at Big Plains, Ohio. He was then principal of the grammar schools at Sidney, Ohio. He next filled the position of head of the department of mathematics in the Urbana high school and later he became assistant principal of the same school.

Later he occupied the position of assistant principal in Attica, Ind. Next he was principal of the high school at Michigan City, Ind. In 1905 Professor Henderson came to Portland and filled the chair of mathematics and Latin in the Lincoln high school of this city, and since that time has been promin-ently identified with the educational system of Multnomah county.

122 Are Republicans and 56 Democrats, Seven Others Having Failed to Complete Petitions, 1 Withdrawing.

Salem, Or., March 30 .- With 174 completed petitions in, the clerical force in the office of the secretary of state at 5 o'clock this afternoon completed the task of checking up and arranging the list of candidates to be certified to the various county clerks in the state. In all 134 Republicans filed original petitions and five of the number failed to file completed petitions. Of the 58 Democrats who filed original petitions all but two filed completed petitions, Besides the five Republicans who did not qualify to have their names placed on the ballot, the total number of candidates is reduced one more by the withdrawal of William A. Carter, candidate for district attorney for Multnomah

Yesterday was the last day in which final petitions could be received at the office of the secretary of state and the office was flooded with eleventh hour petitions. This year has produced the greatest number of candidates that have ever made up a primary election ballot.

The Republicans who did not qualify by filing final petitions are Edward N. Camp of Douglas county, Thomas B. Hooker of Polk county, C. M. Rynerson of Multnomah county, all candidates for delegates to the national convention; Emmett Calahan of Baker county, candidate for judge of the circuit court for the eighth district and G. N. Davis of Multnomah county, candidate for district attorney.

The two Democrats who failed to qualify are Alfred D. Cridge of Multnomah county and Emil T. Raddant of Lincoln county, both candidates for delegate to the national convention.

SAYS CITY SHOULD

While Portland city council considers the adoption of a meat inspection ordinance that will bar from sale diseased, decayed and dirty meat, A. D. Melvin, chief of the government bureau Without warning and with a thud of animal industry, has forwarded to like unto the fall of soggy bread the E. C. Joss, Portland inspector in charge, some pertinent suggestions.

Mr. Melvin's statement contains the information that a little over half of the nation's meat supply now passes Now comes a youth, debonair and under federal inspection. Concerning dolled up with sparkling new the proper extent and effectiveness of

The principal object of meat inspe tion is to protect the consumer from diseased or otherwise unwholesome meat. This involves not only the inspection of the meat for the detection a fall, and whang-'twas an ill placed of disease or other unwholesome constep in the slippery paint, and the suit ditions, but the requirement of sanitary conditions in the abattoirs and packing houses and the enforcement of sion was ill-fitted to a Sunday eve, and sanitary methods in the preparation, curing and handling of the meat.

"To meet the first requirement there should be a competent veterinary inspection of the carcass at the time of slaughter, or, in case inspection at the time of slaughter is impracticable, the inspection may be performed later if certain viscera are retained with the carcass.

"The most important requirement in meat inspection is to protect the consumer against dangers from which he cannot protect himself, and this can be done only by a class of inspection that is not often provided for by local

Mr. Melvin suggests that in order to provide the proper sort of inspection at not too great cost a central abattoir or slaughter house should be erected by the city. He submits a plan for such an abattoir.

COUNT BONI SEEKING ANNE MORGAN'S HAND

Castellane still has hopes of contracting another marriage with a very rich woman, preferably an American. He is also as hopeful as he was the day he sailed for the United States 12 years ago, equipped for the campaign for the hand of Anna Gould, whom he met in Europe and fixed upon as an heiress who would be able to supply money for the career he dreamed of.

Just at present the Count Boni is in Rome. He has called twice at the Grand hotel to see J. Pierpont Morgan. Each time Mr. Morgan has been out. These visits of Boni are being widely discussed. The European press has commented time and again upon de Casteliane's attentions to Miss Anne Morgan, when the banker's daughter had been on the continent and the Roman papers now connect the evident admiration of Boni for Miss Morgan with his attempts at an interview with her father

ALBANY COLLEGE BEAT WILLLAMETTE DEBATERS

lege's debating team won over the Willamette university contestants in the event held at the Presbyterian church last night. "Compulsory arbitration in the settlement of disputes between employers and their workmen," was the question at issue. The affirmative was supported by Messrs. Savage, Smith and McDaniel, of the university and the negative by Miss Jessie Telford, Arthur Hodge and Alex McLean of the college The judges were Professors Joseph Schafer and R. C. Clark of Oregon university and J. A. Bexell of O. A. C. McMinnville and Pacific colleges will debate the same subject and Albany will then meet the winning team for the league championship.
