How Build Today To Replace the Worn-out Parts of Yesterday?

Each day thinkers use up cells of the Brain. Each day active workers destroy cells in the nerve centres. If the food lacks the things Nature demands for rebuilding, Nervous Prostration and Brain-fag result. Suppose a bricklayer tried to build a wall and the boss furnished brick, sand and water, but left out the lime? Suppose you eat plenty of albumin and take sufficient water, but neglect food which contains Phosphate of Potash? Nature cannot rebuild gray matter in nerve centres and brain without Phosphate of Potash which binds together albumin and water to make it. Phosphate of Potash, as grown in the grains by Nature, is more than half the mineral salts in Grape-Nuts.
