

ALL TEACHINGS OF CHRISTIAN SCIENCE BASED UPON LOVE

"Love Drives Out Hate, Malice, Jealousy, Envy, Contention, Mad Ambition," Says Frank H. Leonard.

Declaring that all the teachings of Christian Science, summed up was, a right knowledge of love in its broadest sense, Frank H. Leonard, C. R. S., of Chicago, spoke twice on the teachings of Christian Science at the First church of Christ, Scientist, yesterday. Each lecture was attended by a large audience. Mr. Leonard who is a member of the board of trusteeship of the First church of Boston, said in part:

"We really sum up all the teachings of Christian Science when we bring out the right knowledge of love. It is love that healed the sick through Jesus of Nazareth. It is love that healed the sick through his disciples. It is love that healed the sick through patriarch and prophet. It is love that was manifested to this world through the leader of the Christian Science movement, Mrs. Eddy. It is love that is the reason of promise to love that comes into our thought, driving out hate, malice, jealousy, envy, striving, contention, and mad ambition.

"It is love that prepares a table before us in the presence of our enemies, teaching us our enemies are not the brethren but the wrong thoughts we have and cling to.

No Law Save Love.
"It is love that establishes in earth his kingdom as it is in heaven. It is love rightly understood that establishes the universal brotherhood of man, wherein there is no way, no will, and no law save God's.

"And it is this love manifested through Christian Science which has drawn Jew, Gentile, Pagan, Agnostic and Atheist unto Christ through lifting him 'up from the earth' into the realm of spiritual reality and consciousness, whereas God is worshipped 'in spirit and in truth.'

"Christian Science has not attained its unassailable position in the religious world through the worship or adulation of personality, but has grown as it has through the elimination of personality through the elimination of the belief that the mortal man which David, writing of his own human birth, tells us is 'shapen in iniquity' and conceived in sin is the God made man, the man that he made in his image and likeness; and the establishment in thought of the individuality of spiritual or real man who is the image and likeness of God.

"This proper comprehension of man comes through worshipping God in spirit and in truth, rendering one immune from any attack of evil, no matter what it may seem to be, giving one a measure of that peace which comes with active, conscious growth in grace unto a right knowledge of God.

Mrs. Eddy's Legacy.
"Mrs. Eddy, the leader of the Christian Science movement, was one of the humblest and meekest followers our master ever had on this earth. She thwarted every attempt to give her adulation, for she realized if the time ever came when personal worship entered the ranks of the instantists that would be the time when they had ceased to worship the one God and had descended to the plans of the children of Israel, where as God, through Moses, led them out of the land of sorrow and was they turned unto the worship of the golden calf. Christian Science teaches that personal worship is abhorrent unto God and an insurmountable barrier between God and himself to any one who indulges in it.

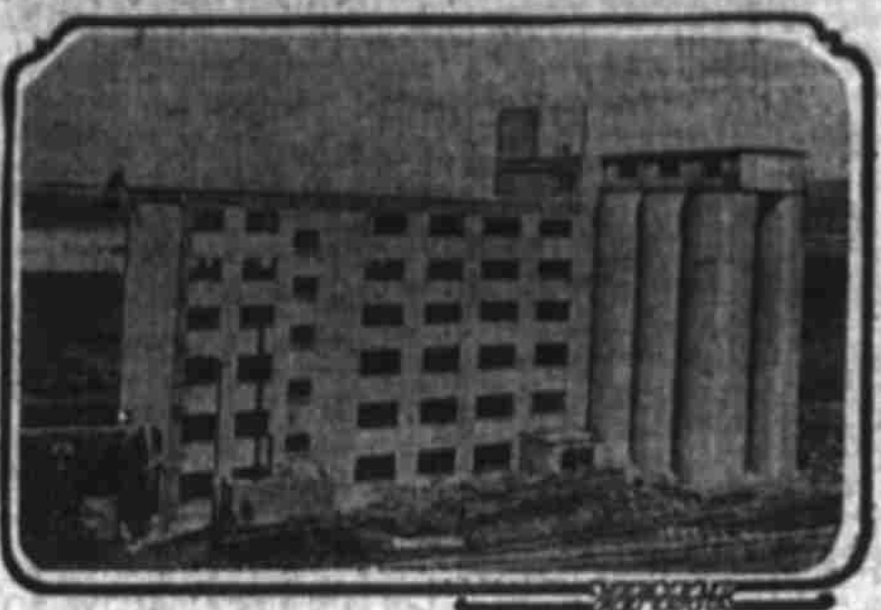

"The Christian Science text book, 'Science and Health with Key to the Scriptures,' Mrs. Eddy's legacy to suffering and sin sick humanity, enables one to find the spiritual truths in the Bible, simplifies and elucidates their teachings and makes practical the example of our master while on earth. It does not supersede her does it take the place of the Bible, but makes it more desired and studied than ever before."

EVELYN NESBIT SEEKS FREEDOM AND \$15,000

(Special to The Journal.)
New York, May 13.—Efforts to cut loose forever from Harry K. Thaw, playmate of Stanford White, are being made here today by Evelyn Nesbit Thaw. Content with the companionship of her 21-month-old baby boy, who was born in Europe, Mrs. Thaw announces her willingness to abandon the \$5000 yearly income she has been receiving from Thaw, provided he gives her a lump sum of \$15,000 and allows her her freedom.

Oaks rink, now skating; big crowds.

Model Flouring Mill at The Dalles Ready for Operation in September

Seven story mill, just completed at The Dalles, Or.

(Special to The Journal.)
The Dalles, Or., May 13.—The new seven-story reinforced concrete building erected by the Wasco Warehouse Milling company is finished, and millwrights are busy putting in the new machinery. This is the only absolutely fireproof mill building in the northwest, it being constructed throughout of concrete. Nor will there be any wood in the building when fitted for use except such as is absolutely necessary in the construction of the machinery. The floors are solid concrete, the doors will be of steel and the window casings and sashes are also of steel, so there will be scarcely anything in the entire structure that is combustible.

The building stands between the tracks of the O-W. R. & N. and the Great Southern railroads, so that its facilities for receiving grain and shipping out its product are the best. Its grain bins are so located that wheat received from cars will go directly from the clearers into the bins with the least possible handling and the same is true with regard to putting out the finished product. Cars are to be loaded directly from the sacking rooms, almost without being touched with human hands.

are two square bins and there is also one large bin inside the mill, making the wheat storing capacity 200,000 bushels.

The mill will be in operation in September. The power used for driving the machinery will be electrically generated at White river, 20 miles south of The Dalles. When running at its full capacity the mill will produce 5500 barrels of flour in 24 hours, besides the usual amount of by-products, and will consume 12,000 to 14,000 bushels of wheat daily. Besides several standard brands of flour the mill will make cereals and package goods.

The cost of the building complete is \$150,000, and the machinery will cost \$20,000, making an investment of \$170,000, very nearly all of which is held by The Dalles people.

The old mill of the Wasco Warehouse Milling company, a wooden structure occupying the ground on which the new mill is built, was destroyed by fire last August, and construction work on the new building was commenced October 1. The builders, Johnson & Keller, local contractors, were delayed about six weeks on account of the heavy snow in January and February. Otherwise the mill would have been ready to start in July. When in full operation it will employ 60 men.

BAKER AUDIENCE SHEDS REAL TEARS

"The Girl of the Golden West" Touching Drama Admirably Presented.

The dull rose of a rising sun dispersing shadows faintly purple on its lovely undulating foothills of the Sierras; a sentinel pine tree in the foreground and by it a primitive camp, a girl and her lover in low toned converse over the embers of a dying fire. Such is the immortal picture that features the last act of "The Girl of the Golden West," being played this week at the Baker theatre. The Baker stock company played the same piece last year to crowded houses. There is no need, therefore, to elaborate on either the story told by the play or the manner in which it is enacted. The story is only too well known in Portland, as is the ability of the competent stock players.

There were just as many soaking handkerchiefs after last night's performance as there were every night of the three weeks the "Girl" appeared before the footlights at the popular playhouse last year. Ida Adair plays the "Girl" and, as she played it last year, no further comment is necessary. Thus we account for the tear-drenched handkerchiefs.

Harry Elliland, as the outlaw reformed by love of the maid of Cloudy mountain, presented quite the most attractive bad man that the Baker has boasted up till now. His portrayal was one that commanded silent attention throughout. The rest of the company, including, of course, Richard Vivian and Marie Baker, gave their usual gratifying characterization for the other parts. The "Girl of the Golden West" will be the attraction for the rest of the week at the Baker.

General Wills Jones of Columbia has decided to retire from the chairmanship of the Democratic state committee of South Carolina, a post which he has held for 20 years.

NATRON CUT-OFF MAY BE RUSHED

Reports at Klamath Falls Indicate Early Resumption of Construction.

(Special to The Journal.)
Klamath Falls, Or., May 13.—Early completion of the Klamath Falls cut-off between Natron and Klamath Falls, which is to be the main line of the Southern Pacific railroad, was indicated today by a report that work is to begin on construction at this end of the line. The report was unofficial.

A work train carrying 40 men is to be put on May 15, completing the 15 miles of track beyond this city which was not thoroughly ballasted when it was laid last year. As soon as this work is well under way, according to the report, a second work train will be sent out and the crew of workmen increased to 100 or more men. When the work begins a steam shovel, now at the end of the track, will be transferred to a new sand pit near Chiloquin. The sand is to be used for ballast.

The favorable impression received by R. G. McCormick, vice president of the Southern Pacific railroad, on his recent visit to Klamath Falls, is believed to have been partly responsible for the railroad's move in ordering work done from this end of the line. He promised to do everything in his power to aid the progress of the city.

Steam shovels and a large crew of men have been at work for some time on the Natron end of the cut-off. With crews working from both ends the completion of the new line is expected within a year.

Alleged Bucket Shop Men on Trial.
(Special to The Journal.)
Chicago, May 13.—Sidney McHie and his five colleagues who did a thriving business under the name of the Capital Investment company until the government officials closed down on them were placed on trial in the United States court today on charges of having conducted a business to defraud in operating a bucket shop.

Tuxedo Tobacco not only doesn't "bite"—it's a safeguard to tongue and throat.

The practicing physician who invented the wonderful process had a sensitive throat himself—that process not only stopped the sting but gives Tuxedo its famous fragrance—10c in the green tin.

PATTERSON'S TUXEDO TOBACCO

The High Cost of Living

crosses to the other side of the street when it meets a Moyer \$15 suit walking arm in arm with High Quality and Low Price — It's ashamed to meet that inseparable trio.

If you always got as much for your money as you do when you buy a Moyer \$15 suit, there would be no more complaint about the high cost of living.

Moyer \$15 suits are not, and cannot be, equaled at the price. They're tailored suits—tailored from good wools in the styles that are now being worn. If you wish to lower the cost of your living, come in and be fitted in a Moyer \$15 suit.
