How \$1,000,000 May Be Spent Legitimately in One Year.

"Brewster's Millions," that effervescent comedy from the remantic pen of interesting play was uncorked quite a few seasons ago. These bubbles demonstrate the ability of the piece to "come back," but a far more convincing proof of the visible. of the virility of the great story of frensled finance was the enthusiastic greeting play and players received last night at the Baker theatre.

"Monty" Brewster is a young man who has been left an estate of some the main part of the estate he must hers of the Arlington hotel, marking spend \$1,000,000 in a year and not spend the beginning of the end of that famous

story told in the play.
Harry Hilliard, the new leading man of the Baker Block company, might have walked right out of the novel if such a newel feat could take place in those days. He is admirably fitted by nature for the part and he makes of the ordinary pleasure loving young fellow a man with a mania-for spending money. But the transition is so artistic under Mr. Hilliard's capable portrayal that the audience doesn't realize it.

Mr. Hilliard is ably supported by the rest of the company and the coatuming and scenery are in keeping with the standard already set by the Baker's scenic superintendent, "Monty" will go on spending millions all the rest of the week at the Baker.
