Standard Rotary Sewing Machine

On Sale at \$38.00. \$1 a Week, Club Plan

Demonstration in Second Floor Department

Reasons for buying a high-speed two-in-one "Standard" Rotary Shuttle Sewing Machine: It makes both the two-thread lockstitch and the single-thread chainstitch. The "Standard" rotary shuttle never stops when the machine is in operation. Old style shuttles start and stop twice and travel eight inches to each stitch. The "Standard" rotary shuttle revolves continuously without vibration or noise. The rotary shuttle is the vital element of the Standard Rotary which makes it easy, fast, silent and enduring, which is of the greatest importance to the health and comfort of the operator. It is the greatest step in advance ever made in sewing machines. All manufacturers have tried and are still trying to make a rotary shuttle machine. What greater proof of its superiority could be asked? Some have ventured to place their imitations on the market, using in their construction the long-since discarded devices of the Standard. The needle bar has only two motions to every stitch, whereas the vibrator bar has four. No heavy balance wheel required to carry motion over the stops and starts. The momentum of each stitch helps to make the next. Less noise than any other machine. Sold on the easy payment \$1.00-a-week club plan at \$38. Ask for demonstration.
