BOARD OF HEALTH IS GIVEN POWER TO DESTROY DOGS

State Law Contains No Clause Giving Board Authority to Muzzle Canines — Keep Close Watch.

According to the act of 1903 of the state laws by which the state board of health was created, the board has the authority "to make sanitary investigations, especially of epidemics, including those of domestic animals." It shall make, and is hereby empowered to enforce, such quarantine regulations as seem best for the preservation of the public health, and it shall be the duty of all police officers, sheriffs, constables, and all county officers and employees of the state, to enforce such regulations, subject to the authority of the health officer.

This law is construed to give authority to the state board of health to order all dogs destroyed, but Dr. Calvin S. White, state health officer, does not wish to enforce the stringent provisions unless absolutely necessary. A conference was held yesterday in Salem by Dr. White with Acting Governor Olcott to determine the power of the governor to order all dogs muzzled and nowhere in the laws of the state could such authority be found. The entire control as far as the state is concerned lies with the health board.

SALEM CHINESE SAYS WIFE ROBS HIM; ARREST

(Special to The Journal.) Roseburg, Or., Aug. 2.—Quong Hing, a wealthy Salem Chinaman, came to Roseburg this morning and swore out a warrant charging his wife and her sister with stealing \$500 from him. Mrs. Quong, her four children and her sister arrived here at midnight last night. They were in the waiting room of the depot when the husband arrived. Mrs. Quong says the party was going to San Francisco to visit friends. The husband says she did not intend to return and that if she returned the money she could go and not return.

Take Many Precautions.

"Everything possible is being done to curb a possible epidemic of rabies and Dr. J. F. More, state veterinarian, and Assistant City Health Officer, I. T. Beeman are spending the greater part of their time at present investigating all reported cases of bites by dogs and of mad dogs. Even the slightest bite is at once looked into as we want to be absolutely sure the person bitten is in no danger.

"Should more stringent measures be necessary there would be no reason for merely placing dogs in the pound as one dog affected with the rabies might infect many others and an owner could not be allowed to rescue his pet. It would be necessary to destroy all dogs so taken.

"Three cases are now being treated with the Pasteur treatment on account of bites from dogs affected. Yesterday a big bulldog was taken down with the malady on Rodney avenue and died from the effects. His body was at once taken to the crematory and burned and we are examining his head for traces of rabies.

"The killing of a dog affected destroys a great deal of the liability of discovery of the presence of rabies and if possible we allow the animal to die. The brain is the proper place in which to find the negri bodies which are evidence of the rabies. They are also present in the scrapings of the teeth and in the eyes. To the present we

Teach Your Boy How to Save

Has your own life been a financial success? If it has, you know the value of saving—and can point the right road to your boy.

If it hasn't—start your boy right now. Show him that it is what he saves that makes a surplus—it makes no difference what he earns if he spends it all.

If you get him really interested in saving now, he won't be nearly so liable to get into bad habits later—for he'll find a better way of using his money than to spend it in a way that is harmful to him.
