NO SINGLE ATTRACTION SUPERIOR TO CRATER LAKE, SAYS SCIENTIST

eign savants and American members of the transcontinental excursion of the American Geographical society returned this noon from Crater lake, where they were taken in 30 automobiles by the Medford Commercial club

"It is the consensus of opinion ong the members of the party that Crater lake is unique among the attractions of the world, so distinct in character that no lover of nature can afford to miss it," said Dr. W. M. Davis of Harvard university, director of the excursion. "Other por-tions of the globe may offer a greater variety of attractions, ach beautiful in itself, but no single scenic attraction anywhere can surpass it." The excursion left this afternoon for San Francisco.

California Water Company Refuses to Allow City to Supply Patrons.

San Francisco, Sept. 18.—All public utilities corporations today are watching with interest the outcome of an au-thority test case against the state railroad commission which is being pressed in South Pasadena by the Glendale Consolidated Water company, Recent-ly the commission received a complaint from the city of South Pasadena that the company had closed down its plant and left 104 consumers without a water

supply. The company contended that the water rate was too low. The city authorities undertook to fur-nish water to the inhabitants in wagons. The commission, believing quick action imperative, wired the city officials and representatives of the company to appear at a hearing before the commission in Pasadena tomorrow morning. The water officials obtained an injunction against the commission but it is understood the commission will go ahead with the hearing and announce its ruling in the case, holding that its authority is above that of the courts in such cases.

ATTORNEY SCHNABEL RETURNS FROM EUROPE

Attorney and Mrs. C. J. Schnabel, 785 Park avenue, returned home last week from a four months' trip to Germany and other European countries. The trip, made partly for business purposes, was an unusually pleasant one, as the Schnabels were with a large party of teachers who were extended rare privileges in the way of visiting the more exclu-sive places and in being entertained at a reception given by the German em-

Investigation we found the fish had swallowed a piece of iron, that was stamped "4 H. P. S." and moulded into what I call a key or wrench for a four-hoursepower Standard gasoline engine. Now the question is, who lost the key and how did the salmon get it? It is an old theory that salmon live only on suction, after they enter the fresh water of a river. If so, this salmon must have swallowed the key when at sea. None of the fishermen here go outside to fish. If anyone from the columbia river has lost such a key, becan secure its return by writing to the Cooperative cannery at Nehalem.
