Swayne & Hoyt to Start Portland-San Francisco Run January 1, With Five-Day Service and Cut to \$12.

That the new steamers of the Swayne & Holt line are to compete strongly for the passenger traffic between Portand and San Francisco and Los Angeles is indicated by the fact that they have definitely announced the first of the year as the time when they will begin their five day service with three steamers, while it has been decided to cut the first class rate to \$12 for San Francisco and \$20 to Los Angeles. At San Francisco the steamers of the line will connect with the turbine stteamers Yale and Harvard for Los Angeles and San Diego.

Frank Bollam, who will be their passenger agent here, is in California and has telegraphed that the new steamer Paraiso was to be launched today. She will have accommodations for 76 passengers, while the Camino's accommodations are for more than a hundred and accommodations will be placed on the Navajo for 96 people. Sne will us to know the metal of which he is probably not be fitted. up for passen-made. We know him to be a man of gers until after the new steamer is ready for service.

The Swayne & Hoyt line is to take over the American-Hawaiian service between Portland and San Francisco after the middle of October, and C. D. Kennedy, local agent for that line, will be freight agent for the Swayne & Hoyt boats, Frank Bollam, general freight agent, and H. L. Bancroft will be dock

agent. W. S. Scammell & Co. of San Francisco announced yesterday that their five day service between that port and Portland would begin October 15, with the sailing of the steamer Yellowstone to be followed by the Leelanaw. The company also operates the steamers Washington and Homer. Baumgartner & Baker will be the agents here.

LAUNCH INJURED

Submerged Piling Damages Customs Patrol Boat.

A submerged pilling under the new steel bridge damaged the customs patrol launch H. W. Scott to such an extent yesterday tht she was taken out of commission temporarily. The customs officials are investigating the matter of the piling, apparently left there by the contractors when the false work of the bridge was torn out, The Scott picked up the piling, getting a kink in the shaft, strut and rudder and her propeller was all bent up.
