The Distinctive Feature of the APOLLO Player Piano

Is the New Automatic Electric Solo

Can Be Operated in Four Different Ways

Here Is a New Instrument Made by an Old Manufacturer

Just as Melville Clark's Apollo, many years ago, was the pioneer player to use the full 88 notes of the piano keyboard, this, the Automatic Electric Solo-Apollo, is the first practical instrument of its kind for home use. It is equipped with a noiseless motor. Tempo and expression are automatically taken care of and the instrument will do by itself all that an expert pianist can manually.

It can be operated in four separate and distinct ways. First, as a completely automatic instrument; second, with the motor doing the pumping and operator putting his or her interpretation on expression and tempo; third, can be operated by foot power as regular Solo-Apollo; fourth, can be played by hand as a piano. Simplicity and completeness mark this instrument. It carries an ironclad five-year guarantee and possesses all the features of the wonderful Solo-Apollo.
