

# NEW TUBERCULOSIS SERUM SAID TO BE PRACTICALLY CERTAIN CURE FOR ALL BUT THE MOST ADVANCED CASES

## Dr. Frederick Franz Friedman of Berlin Discovers Cure for White Plague; Has Been Tested on 1000 Cases in German Hospitals and Cured All but Very Few; Recovery Said to Be Immediate.

**An Amazing Christmas Gift to the World.**

Discovery—A serum, one injection of which kills every tuberculosis germ in the victim's body and immunizes against the disease.

Discoverer—Dr. Frederick Franz Friedman of Berlin, physician and author.

Beneficiaries—Every sufferer in the world from the "white plague."

Cures to date—More than 1000 patients. Every patient treated cured except those in the last stages of the disease. Many victims made whole within a few weeks.

Cost of treatment—Very small. Cures for more than a dozen treatments can be prepared for less than \$1.

Supply of serum—Enough already on hand to treat every tuberculosis patient in the world. The serum, obtained from the turtle, multiplies so rapidly that one small vial sent from Berlin will supply enough for all America.

Credibility of discovery—Leading German physicians accept cure as positive. Trained American newspaper men interviewed patients and goes on record that he cannot help but believe the discovery is the greatest Christmas gift to the world since Christ came to earth.

*(United Press Leased Wire.)*

Berlin, Dec. 2.—Complete and absolute cure for every victim of tuberculosis unless he is in the very last stages of the "white plague" is the Christmas gift to the world announced today by Dr. Frederick Franz Friedman, a young German physician, who claims to have 1000 cures ready to display to the scientists of the world.

By the simple injection of a serum gained from the turtle, Dr. Friedman says, he has immediately killed every tuberculosis in every subject so far treated, and maintains that every case in which the injection was made has resulted in a cure save only those whose vitality was so far gone as to leave physical recovery an impossibility.

Two weeks ago Dr. Friedman announced in a public conference that he had been successfully treating tuberculosis for two years. Many of those present admit that Friedman has conquered the scourge, and several German hospitals

tients," says Shepherd. "I saw a boy, entirely cured, whose leg had rotted away almost to the hip. I saw a man who had hemorrhages, night sweats, fever, and had been in hospitals, who had been cured within a few weeks and had returned to work after only one injection. I saw a girl who was born tuberculous and whose hand had rotted away during 18 years, who was cured by one treatment in four weeks. I saw clean-healed scars on hands, on arms and necks and bodies of children, where once had been terrible and supposedly incurable tuberculosis sores. These patients and many more told me of their marvelous stories. One who has seen what I have seen here must be convinced that Dr. Friedman has given the world the happiest Christmas—except one—that the world has ever known."

**Will Wait for Proof.**

"American physicians will not be disposed to give entire credence to this new marvelous cure for tuberculosis until final proof is furnished," said Dr. E. A. Pierce, well known Portland specialist in the treatment of the disease, this afternoon.

"Every once in a while," continued Dr. Pierce, "some German springs up and heralds the discovery of the cure for consumption—a thing for which all the medical world has been searching through history."

"But the physicians of this country will wait until the German standard medical publications give their evidence as to the value of the discovery, and these followed by the American medical journals, before they accept and believe the proposition."

"That is a precaution which must be taken. The search for a cure has been so long and has been, and is, so greatly needed, that a 'cure-all' when exploited deceives trusting thousands, wins from them their savings for treatment and all without avail. This sort of thing lessens confidence and destroys hope. I, and I am sure, other physicians of this country will be willing to give credence to the announcement when backed by the unquestioned authority of the German and American standard medical journals."

### HARSH WORDS SAID OF MARSHFIELD WATER

*(Salem Bureau of the Journal.)*

Salem, Dec. 2.—Declaring that the water being supplied to its citizens is unfit for human consumption, the city of Marshfield, through Mayor E. E. Straw, has filed the first formal complaint with the state railroad commission under the provisions of the public utility act. The complaint is against the Coos Bay Water Company.

The complaint alleges that the reservoirs used by the water company are mere excavations in the earth, are small and unprotected, without means or facilities of being cleaned out and without means of removing accumulated filth, that they have not been cleaned out for years, and that they are filled with dirt, vegetable matter, the carcasses of animals, and the water therein is infested with leeches, water dogs and other aquatic animals.

It also alleges that the distribution of water is inadequate, the mains inadequate and leaky, that the pressure is too low and that no fire protection is provided for a large portion of the city. The entire system is generally condemned.

### ASK \$500,000 FOR BRIDGE APPROACH

#### County Commissioners Urged to Prepare for Structure Across Columbia.

The expenditure of \$500,000 for an approach to the Oregon and the proposed interstate bridge over the Columbia river from the Columbia boulevard end of Union avenue to the angle in the present approach was urged upon the county commissioners this morning by a delegation of property owners on North Union avenue. The proposed approach would follow the tracks of the Vancouver carline from the boulevard to the point where the present approach to the ferry slip from Vancouver avenue joins the street car right of way.

The estimate of \$500,000 was put upon the project by Ralph Modjeski, engineer, who estimated the cost of the proposed bridge and includes the filling of the route from the boulevard to the river. The committee of 19 which appeared stated that the people of that section of the city would see that Union avenue is placed in the best of condition south of the boulevard.

The county commissioners are not in favor of building the new approach, as \$15,000 has been spent recently in placing the present approach in good condition, and they say there appears to be little necessity of additional routes to the river. They favor leaving the matter until the bridge becomes a certainty. The new approach would total about 7000 feet in length if the street car right of way is followed and would be about a fourth longer than the present approach.

### TO BEGIN WORK ON SCENIC ROAD MARCH 1

Actual construction work on the Multnomah county end of the Portland-Hood River road will not begin until about March 1. If plans made today by the Multnomah county commissioners, after consultation with Road Supervisor Chapman and County Surveyor Holbrook, are carried out. As told in "The Journal," the commissioners last week authorized the expenditure of \$100,000 on the project. Right now, however, surveys for the road and the locations of camps for convicts who are to work on the road are in progress under direction of County Surveyor Holbrook. The only remaining portions of the route to be surveyed are strips where the right of way of the O.-W. R. & N. Co. and of the new road conflict. The commissioners offered the services of Road Expert Lancaster to Mr. Chapman and Mr. Holbrook, but both stated that they felt equal to the task of handling the operations. They reserved the option of calling him into consultation at a later date if his services were needed.

### STURGEON LAKES TO BE DUCK REFUGES

For some time State Game Warden W. L. Finley has been endeavoring to get Big and Little Sturgeon lakes on Sauvie's island between the Willamette and the Columbia rivers set aside as a wild game refuge for the protection of ducks. In order to do this, it is necessary to have all the owners of lands surrounding these lakes sign a contract making the lake shore and the lakes a game refuge. All of the persons who own this land have signed with the exception of two.

They are holding out because they are hunters and one of the men claims that the ruling will injure his property, which he rents for duck shooting purposes and which is good for nothing else. Game Warden Finley has agreed to pay these men a small rental if they will sign up and it is likely that in a few days an order will go forth that duck hunting on a major portion of Sauvie's island will cease.

It is very likely that Little Sturgeon lake will be set aside even if Big Sturgeon cannot be secured, since the owners of lands surrounding the former, have signed contracts agreeing to the same.

### SLIGHT FLURRY ON WALL STREET

#### Stocks Soon Rally and Close of Market Is Reactionary.

*(United Press Leased Wire.)*

New York, Dec. 2.—The decision of the United States supreme court today that the Harriman merger of the Union Pacific and the Southern Pacific should be immediately nullified caused a slight flurry in the market today but stocks immediately rallied.

Southern Pacific, when the decision was announced, at once fell from 111 1/4 to 108 1/4 and then recovered to 110 1/4. The sales were \$100 shares in the first half hour. Union Pacific dropped from 171 1/4 to 169 and then recovered to 171 1/4. The sales were 60,700 shares for the first half hour.

Union Pacific preferred advanced 6 1/4 points to 66 1/4 on the theory that a readjustment of the security holdings as the result of the decree would cause a retirement of the preferred stock.

Southern Pacific 4 per cent bonds advanced from 89 to 96 on the theory that the decree would restore the independence of the Southern Pacific and thus would enhance the value of its bonds. The market's close was reactionary.

### LOVETT REFUSES TO COMMENT

*(United Press Leased Wire.)*

New York, Dec. 2.—Judge Robert S. Lovett, chairman of the Harriman lines' board of directors, refused here today to discuss in any way the decision of the United States supreme court in dissolving the merger of the Union and Southern Pacific railroads.

### NORTHWEST FORESTERS IN SESSION IN SEATTLE

*(United Press Leased Wire.)*

Seattle, Wash., Dec. 2.—Two hundred delegates assembled this morning to begin the first session of the annual northwest conference of the Forestry association. Besides delegates from the Western Forestry and Conservation association, a number of delegates representing the national organization were present.

President A. L. Fluwellling made the opening address. The treasurer's report followed. Forester E. T. Allen gave a review of the association's work in checking forest fires. Short speeches were then made by delegates from various states.

### 'TIN PLATES' MUST BE IN ENGLISH

#### Grant Interprets Vice Ordinances to Govern Police Action.

For the benefit of those directly concerned as well as for the guidance of police officers, City Attorney Grant today submitted to Chief of Police Sloyer a letter interpreting the provisions of the two ordinances recently passed by the city council for the regulation of hotels, rooming houses and similar places. The questions passed upon by the city attorney have all been brought up since the laws became effective. Concerning the "tin plate" ordinance Mr. Grant says:

"Where two persons each own half a building, each shall put his name on a sign over the entrance to his half. Even should there be two or three saloons in one building the name of the owner over the main entrance to the building is sufficient. There can be no objection to a non-resident owner having the name of his agent placed over the entrance to the building of such non-resident."

One point made by the city attorney is that the characters used on the sign plates must be in English. The ordinance does not state what language shall be used and at least one owner proclaimed his intention of using Hebrew in printing his sign. The city attorney's ruling will serve as a warning to any who may try to evade the law by such subterfuges.

In reference to the bonding ordinance, the city attorney's letter says:

"Rooming houses or lodging houses, whether known as apartment houses or flats, maintaining ten or more rooms for sleeping or lodging purposes, as distinguished from houses, keeping rooms for rent or from apartments, must furnish a bond; a lodging house, rooming house or flat containing more than ten rooms, but in which a less number is used for sleeping or lodging purposes, is not required to execute a bond; the mayor shall be the judge of the sufficiency of all bonds furnished under the law."

### JAPANESE WAR MINISTER RESIGNS

*(United Press Leased Wire.)*

Tokyo, Dec. 2.—Lieutenant Oyehara, minister of war, tendered his resignation today because of the decision of the cabinet rejecting his plan to increase the military forces in Korea.

### GOOD ROADS WILL BE THE TOPIC AT SEASIDE

Good roads will come in for protracted discussion at the second annual convention of the Oregon State Hotel association at Seaside, December 4 and 7, and the association in 1913 will join the good roads movement officially, according to Phil Metechan Jr., president of the organization.

"At the last meeting of the association's executive committee," said Mr. Metechan today, "the legislative committee was instructed to gather data to submit to the legislature for the purpose of securing an appropriation for a state road from Grants Pass to the Josephine county caves."

"In addition to this, I expect the convention will endorse the good roads movement and join in active agitation to secure them. Good roads are directly beneficial to hotels. With better roads existing, more people take auto tours, and this means a profitable hotel business which results come during the summer months, usually our dullest period."

The convention this year will meet next Friday and Saturday at the Hotel Moor. Delegates will leave Portland for Seaside at 8 o'clock Friday morning, and arrive early in the afternoon.

The first session will be held Friday afternoon. A dance will be held in the evening and business matters, speeches and election of officers will be the order of Saturday morning.

The officers of the association are: Phil Metechan Jr., president; L. Q. Swetland, vice president; F. W. Beach, acting secretary; E. D. Jorgensen, treasurer. They all reside in Portland.

### WHOLESALE KILLING OF WILD DUCKS TO STOP, IF PLANS CARRY

From the stand that has been taken by some of the members of the game and fish commission it is quite likely that before spring there will be a radical change in the laws governing the shooting of ducks in this state. Commissioner C. F. Stone of Klaskan Falls, who is leader of the movement to cut down the daily limit, has taken a stand that is approved by many people of the southern part of the state and by members of the legislature.

"I am in favor of reducing the limit on ducks to 10 birds a day or 25 in seven consecutive days. I do not believe it is right to shoot ducks along the Columbia river as they are killed today by first baiting the lakes heavily and then slaughtering on one day of the week. The present law in regard to the protection of ducks allows the hunter 35 birds a day in any seven consecutive days."

Several other members of the board agree with Mr. Stone's opinion in this matter and it is not unlikely that a stand will be taken by the commission which will be widely opposed by Columbia river shooters.

### EXCUSED PREACHER FROM 'CUSSING'

While Rev. William Spira, pastor of the Marshall Street Presbyterian church, did not repeat the profanity this morning before the municipal judge he heard G. B. Fendegast use Saturday afternoon, the minister gave the court a pretty good idea of what was said.

"It was vile and profane language," said the minister in giving his testimony. Judge Tazwell nodded his head that he understood, thereby saving the witness from using the profane words. Ordinarily witnesses are required to repeat as near as possible what they hear in such cases.

Fendegast was a hack driver for the Central stables. He was sent to a 1 o'clock funeral, but stopped at a saloon on Seventeenth street, the team running away. Mr. Spira stopped the team, whereupon Fendegast indulged in abusive and profane language. It is charged that he forbids the obstruction of sidewalks by outswinging doors and that such doors should be built into recessed niches so that when open they will not interfere with traffic.

### STATE AND CITY DOOR LAWS ARE CONFLICTING

Acting Inspector of Buildings R. E. Kremers has asked the mayor's office to stop the enforcement of the state law providing that doors of all public buildings must swing outward, until the police can investigate the law further. Mr. Kremers says there is a city ordinance that forbids the obstruction of sidewalks by outswinging doors and that such doors should be built into recessed niches so that when open they will not interfere with traffic.

**You Beer Drinkers**

**Read THIS!**

"Beer acted upon by light soon takes up the very disagreeable so-called 'light taste,' and also a repulsive skunk-like odor.\*\*\* Beer so affected is offensive to the palate of most consumers.\*\*\* Beer should not be exposed to light, especially to direct sunlight, as it will thereby be detrimentally affected, the light having an influence upon the albuminoids in beer, causes the beer to become hazy.\*\*\*\*"

Extract from "The Beer Bottlers' Handy Book," by Philip Dreesebach, Bottling Expert and Instructor in the Wahl-Henius Institute of Fermentationology.

The Brown Bottle is not a fad. Its use by Schlitz is based on scientific principles.

The first Schlitz was brewed in a hut, over sixty years ago. Now our agencies dot the earth. Our output exceeds a million barrels a year.

Why don't you make Schlitz your regular beer? It's pure beer.
