CELEBRATE FEB. 12 AS EARTH EDUCATION DAY

Professor L. R. Alderman has written to each of county school superintendents of Oregon asking them to aid in preparation of programs on February 12, Earth Education day. He believes that the schools and school authorities should support senate bill 72, which provides state approval aid of the scheme of industrial practical training, which was supported by contributions of citizens last year. He says in his letter to the superintendents:

"It is desired that we have exercises in the schools February 12, on industrial education, the day to be known as Earth Education day. Last year thousands of our Oregon children had gardens and made exhibits of their products as well as of other work of their own hands. These contests showed that our boys and girls can do things. This year we want to show the people what we can do when we all take part. It is most fitting that we do this on the

birthday of Lincoln, who knew how to work with his hands as well as his brain, and had a heart made sympathetic with humanity by work."

He had spent several months there, and had organized the band and was acting as instructor. He was brought to Hillsboro, and when it was found he filled the description of the deserter and was closely questioned he admitted the charge and told of leaving his regiment in San Francisco in 1909.
