I had the good fortune last week to lunch with Miss Collamore and Miss Flint, the young women who each day smilingly answer hundreds of telephone calls and personal inquiries at the Portland Y. W. C. A.

"The peculiar fear that many boys and young men have about even entering the doors of the Association building are very amusing," said Miss Collamore.
"When we had a bell they used to ring
it insistently until some of us answered. Now they often knock and of course we don't hear. Occasionally we will find a girl standing out on the steps talking to her brother or sweetheart as the case Take two or three each of cloves and may be, and when we suggest that they Will you let him go inside?

"Have you ever tried a hot salt ruh?" "And such wonderful things as we hear over the telephone, too," added up and wanted to know if we put new faces on watches, and a little later a woman called up and seemed so astonished to learn that we did not possess an old spinning wheel. A young woman talking over the desk phone the other day said to her friend on the other end of the line: 'O, I've something to tell dripping to baste with.

Do not add water to the pan until you. You know, Ray and I were en-

I told him I did not, but that he had better apply at the Y. M. C. A. He made some excuse and then I referred him to some of the employment bureaus conducted

by charitable and social institutions. He soon assured me that he was a fust class butlah, and could not think of going to such institutions. Then I recemmended an ad, in a local paper and he bowed himself out, thanking me very profusely."

One of the secretaries tells this on "One Sunday afternoon a herself: wretched looking old woman came into the office with a most pitiful tale. She declared the lodginghouse keeper was about to put her out and was going to keep her trunk. She was expecting some money in a day or and if I could just let her have \$2.50 it would mean so much to her and she would pay me back. Her story had been accompanied by copious tears and sighs, so I gave her the \$2.50 and started her on her journey. Weeks and months went by and I saw nothing more

of her or of the money. 'Another Sunday afternoon came, and while in one of the inner offices I thought I remembered the sobbling voice in the general office. I went out and confronted her with her debt. She tried to assure me that she had sent the money to me by money order, but I noticed she soon dried her tears and found the door, and that is the last we have seen of her, and the \$2.50 I still

Fund Raised Will Be Used in Education of Parents as to Children.

With a view to the education of parents, mothers particularly, the executive committee and the advisory countries cil of the Oregon Congress of Mothers and Parent-Teachers' association, will on February 17, inaugurate a week's

child's welfare campaign to raise funds to make such education possible. The funds will come from the sale of small silk American flags, which will be offered from booths to be creeted in the principal buildings, business houses and hotels in Portland. Two thousand dollars is needed to inaugurate this educational system and keep it in operation for at least one year. In that time, it is thought, the good results of such an andertaking will be so evident that the state or city, or both, will be willing to contribute the funds necessary to

maintain it permanently. As set forth in resolutions adopted by the advisory council on January 14, it is intended that the proposed Parents' Educational bureau shall contain literature bearing upon all phases of child-hood, a maternal educational section and a eugenic section, and be so situat-ed that lectures and demonstrations may be given. The intent of this literature and lecture system is to enlighten pa-rents and to help them to see their responsibility and the importance of their giving to the state and nation a better race of boys and girls.

The maternal educational feature will be for the special benefit of prospective and young mothers, and then the work will be carried right along as the child grows towards manhood or womanhood.

#### Hitching Himself to Current Events

"Were do I come in on this new deal?" the Plodder asked himself, as he hung to his strap, pondering on the incoming national administration. "Do I keep on with cold storage eggs for breakfast and round steak for dinner?

The jam in the car jostled him, but he was unmindful. For the first time in his 36 years he was hitching himself to events. "Nineteen-hundred-dollars-ayear sounds good when you say it sharp and quick like that," his brain ran on, "but thirty-six fifty-three a week covers seven days mighty thin now, I tell you, with five in family! It gets harder every week to put by the two bucks for old rainy day. I wonder what a White

Song Numbers of Comedienne in "Rose Maid" Well Received.

After paying due recognition to Alice Lloyd and "The Rose Maid," last night's audience at the Hellig reserved its most hearty applause for the four little "Kute kiddies" who are the center of attraction for a few moments in act two.

"The Rose Maid" is of the most pretentious sort of musical comedy, with the emphasis on the "musical' rather than on the "comedy," which is largely farce. Alice Lloyd, "dainty English comedienne," who joined the company in the west to sing the title role, is growing out of the "dainty" classification. Miss Lloyd is now plump, She was given a hearty welcome at the opening performance last night, and her solo numbers were well received. Arthur B. Clough, who sings the leading male role, was very well received. Leo Stark, as Sir John Portman, an English gentleman with one of "those laughs," has one of the leading comedy parts, which he handles to good effect. The farce end of the comedy, bunched to a considerable extent in the second act, is in the hands of Harry Lester Mason, Edwin A. Clark and Harley Knowles. #### Why He Stopped Telling His Wife

By Edna K. Wooley.

"Haven't you "told your wife about it yet?" one man asked another, referring to a business matter which would mean an increase in the family

"Well-no," said the other. "I've stopped telling my wife much of anything. If this comes through all right I'll tell her, of course. But mean time I don't want to be worried by questions and anxieties and speculations and all that sort of business.

"You know," he went on, "I used to tell my wife all my hopes and plans, practically all my thoughs and actions when away from her. I started out that way and meant to keep it up. I thought it was the right thing for married life. I still think so, if both parties take it in the right spirit.

"But I found that my wife always saw a contrary viewpoint to mine. She was-well, I won't say she was faultfinding. But she was over-critical. always thought I ought to do differ-

"If I was invited out to lunch with anybody, either business or personal, it was a pleasure to me to tell her about it. But when I saw that she feit that I had in some way neglected her by having a good time without her, I stopped telling her that.

"Now this affair that's pending—and upon a time I discussed such matters with my wife. But I discovered that when she knew about anything of that sort, I had two worries instead of one. Every night when I came home I had to listen to a long discussion of doubts, questions of my ability to carry it questions of my ability to carry through, suspicions of those interested in it with me, impatience over delays, et cetera. Every morning I carried away a lot of injunctions about how I should act during the day. This didn't help me any in my work. Instead of viewing it straight I had to see it criss-crossed with all this home interference.

"I don't believe in telling a woman much of anything important, anyway," remarked the first speaker. "She always leaks information."

"I don't agree with you there," spoke the second. "I've found my wife in-tensely loyal and as able to keep things to herself as any man I know of. It that makes me unhappy and uncomfortable. She may be right lots of times, but on the whole I'd rather she'd agree with me once in awhile, even if I'm mistaken, and see the good things occasionally, and not make the bad the most important part to be discussed.
