

**REForesting OF
PUDS NEAR MT.
HEBO RENEWED**

More Than 375,000 Trees Are Being Set Out; a Crew of Thirty Men Is Engaged in the Work.

Work in reforesting the large burns in the vicinity of Mt. Hebo in Tillamook county, has been renewed by the United States forest service now that the snow has left and weather conditions will permit outdoor work. More than 375,000 trees are being set out this spring and they will cover approximately 150 acres.

These will be mostly of the common Douglas fir species, since no other of our common trees grows so fast or yields so much lumber in the same length of time. A crew of 30 men is now engaged in the work which will continue until about the middle of May. This work is being undertaken this spring in conformity with the plan of the forest service to reforest each year a part of the huge burns along the coast until the whole is again covered by a forest.

Thousands of Acres Swept.
Years ago, when the first settlers came into the country, a big fire swept over the coast mountains, destroying the timber on thousands and thousands of acres, and recurring fires since then have prevented a new growth of trees from becoming established.

The area which is now being reforested lies within the boundary of the Sitka national forest and is about 23 miles southeast of Tillamook. Work was first started in the spring of 1910 and since then both in the spring and in the fall it has continued as rapidly as the funds of the forest service allowed.

Two methods are ordinarily used, sowing the seed itself either broadcast or in especially prepared spots, and setting out young trees two and three years old which have been grown in a nursery. Last fall over 2500 acres were seeded but the work this spring will consist entirely of planting young trees. The latter method is more expensive than direct seeding but so far it has given better results.

Trees Grown From Seed.
Before any area is seeded or planted it is examined carefully by a soil expert in order to eliminate any agricultural land for it is a part of the plan of the government in its reforestation work to replant land which is suitable only for growing forests and which is not suited for growing crops.

The trees which will be used this spring have been grown at the government forest nursery in the Wind River valley near Carson, Wash. This is the largest nursery devoted solely to the growing of forest trees in the north-west. It covers an area of ground and contains 2,500,000 little trees. These trees are grown from seed in seed beds for one year, after which they are transplanted to other beds where they are given more room. After remaining in the nursery for two or three years they are taken up and shipped to where they are to be planted.

**INSURANCE COMPANY
PROPERTY TAXABLE**

County Assessor Reed has received a copy of an opinion given by Attorney General Crawford regarding the taxing of personal property of insurance companies. In his opinion Attorney General Crawford holds that the personal property of these companies is not exempt from taxation and it can be collected in addition to the tax levied on the gross receipts of such companies.

The opinion in part follows:
"The constitution of Oregon provides that all property within the state shall be subject to taxation, equally and uniformly, with certain exceptions therein stated, of which this question is not one, and it is well known that where taxation is the rule, and affirmative exemption therefrom clearly and affirmatively appears."
"It is not necessary for the statute to provide affirmatively for the taxation of personal property of foreign insurance companies, but it is sufficient to render such property subject to taxation if no clear and affirmative exemption therefrom appears in the statute."
"We must regard the omitted exemption of personal property and stocks of foreign corporations to be no longer the law, and unless there is some statute exempting such property from taxation the same as all other property, and so far as I am informed, there is no other statute, although such a statute might exist and have escaped my observation."

**COUNTESS SZECZENYI
FLEES TO LONDON**

(United Press Special Wire.)
London, April 21.—Countess Szeczenyi, who was Miss Gladys Vanderbilt, has come to this city to make her permanent home. She is accompanied by the Count Szeczenyi and their two children.
Only their intimate friends know whether he is here in the hope of inducing his wife to change her plans and return to Vienna, or because he has expatriated himself for love of her and their children. It is believed by their close friends that Countess Szeczenyi has become disheartened in her efforts to gain and maintain her entrance to the inner circle of the Austrian court after a five years' campaign.
The millions of the Vanderbilts, spent lavishly in charities and entertainments in Hungary and Austria, have failed to gain the long sought goal. It is true that the Countess Szeczenyi was presented to the Emperor Francis Joseph and the arch-dukes and arch-duchesses, but not in Vienna. The presentation took place in Budapest, the Hungarian capital, and was due to an understanding exacted by Mrs. Cornelius Vanderbilt, before she consented to the wedding, that her daughter should be presented to the emperor.

**SHOOTING JAW AWAY,
IS UNABLE TO EAT**

(Special to The Journal.)
Anacapa, Mont., April 21.—Death by starvation is the fate that hangs over Herbert Lucia, who shot away the entire lower part of his face in attempt suicide.
The bullet did not strike a vital spot and destroyed his lower jaw and the tongue, and he is able to swallow nothing but water and that only with the greatest difficulty.

**PERFECT FOOT'S
OWNER WANTS TO
SECURE DIVORCE**

Lady With Prettiest One in the World Says She Has an Unappreciative Husband in Nat Houston.

♦♦♦♦♦
Mrs. Clara Smith Houston's foot is 8 1/4 inches long and 9 inches around the instep. It is the most perfect foot we ever saw. — Resolution unanimously adopted by the International Association of Chiropractors.
♦♦♦♦♦

(Special to The Journal.)
Chicago, April 21.—Sculptors and artists echoed with enthusiasm the verdict of the pedal surgeons. They went further and declared that Mrs. Houston's foot was not her sole claim to extraordinary beauty; they said her face was one of rare loveliness. And to prove it they painted her face in many moods and attitudes, and reproduced it on some thousands of calendars so that all the world might see it.

Nat C. Houston of Omaha is the husband of that woman. And, according to the allegations in a separate maintenance bill filed today, he does not appreciate her at all. Mrs. Houston says Nat is secretary of the Western Livestock Commission company of Omaha; that he is a banker, a broker, a rancher, a man of wealth. Then she alleges that he slapped her and was extremely cruel.

Nat Houston is a nephew of the celebrated Sam Houston, who was president of the old republic of Mexico. Mrs. Houston's perfect foot started the verdict, according to the bill. After the verdict of the chiropractors had been made public Nat is said to have given evidence that he was pained. He sent his wife a telegram, it is alleged, saying:
"Why don't you send a picture of that foot of yours to the Police Gazette. Maybe the Sporting News could also find space for a picture of it."

Mrs. Houston's attorney says she has a prenuptial agreement to receive \$5000 from her husband in case of marital unhappiness. She claims the time has arrived to execute the contract.

**ALL DAY IN TAXICAB;
THINKS HE CAN PAY**

(Special to The Journal.)
New York, April 21.—Henry C. Lehmann, an artist and inventor, and Miss Yvonne Deblaux, an artist's model, engaged a taxicab at 7 o'clock yesterday morning and, surrounded with blankets, a hammock, several bottles of milk, a quantity of food and numerous other articles, cruised about the city until late last night, when Andrea Le Bras, the chauffeur, drove up to a policeman and requested him to make Lehmann settle the bill of \$24 for the hire of the machine.
"I think they have moved in for the summer," said the chauffeur. "I have been driving this man and his friend about all day, and he refuses to settle."
"This is an outrage," said Lehmann. "I have not refused to pay the driver. I owe him the money, and will pay it if not tonight maybe tomorrow or the next day."
The policeman scratched his head and decided that the matter would have to be settled in a civil court.

The chauffeur drove off with his two passengers inside, and the last heard from the machine was that Lehmann had not yet settled and was still riding.

**FREE SUGAR TO MAKE
HAWAII ASIATIC COLONY**

(United Press Special Wire.)
Washington, April 21.—With the agitation aroused by their respective passage of the anti-Asian laws in California and the war mutterings in Japan, the Asiatic situation in Hawaii takes on added importance, according to Harry Irwin representing the board of trade of Honolulu and a candidate for governor of Hawaii.
Mr. Irwin sees in the changing of the sugar duties a colonization of Hawaii by the Asiatics and the driving out of all the Caucasian labor.
"Free sugar would ultimately make Hawaii an Asiatic colony and a mere outpost of the Japanese empire," said Mr. Irwin today.
Mr. Irwin was a delegate to the Baltimore convention.

**DR. FRIEDMANN VISITS
INOCULATED PATIENTS**

(Special to The Journal.)
New York, April 21.—Dr. Friedmann declared today that he returned to New York in accordance with his plans to continue the treatment of tuberculosis patients who have already received one inoculation with the turtle serum, and that his return was in no way hastened by the letter from the government.
Dr. Friedmann today examined 20 of the 35 patients treated by him recently at Bellevue hospital. All information regarding the conditions of these patients was refused. It was learned that some of the patients have gained in weight, but not to a greater extent than several other patients who have not received the Friedmann treatment.

**AVIATOR CRAWFORD GIVES
FIVE FLIGHTS AT TACOMA**

(United Press Special Wire.)
Tacoma, Wash., April 21.—Aviator Harvey Crawford yesterday carried two women and two girls, one of them his 15-year-old sister, in a biplane. One trip was also made by Crawford alone, bringing the day's flights to five. At the conclusion of each flight the young aviator was surrounded by the enthusiastic crowd of more than 6000 that assembled on the titeria to watch the sky trips.
Crawford announced he would resume his daily flights Wednesday, when he expects to have his new machine ready for action. This machine is said to be the most modern in the United States and was built by Crawford and his father at Puyallup.
