Referring to matters under control of the women it was pointed out that the harmfulness in the dictates of fashion consisted rather in the rapidity and rono and Mrs. Grace De Penning and extent of change than in the actual result presented. Almost any fashion if persisted in would become commonplace and without particular meaning or suggestion but the kaleidoscopic variations arrested attention and at times created undue interest. Again in work ing along the lines of social endeavor he said it is well to bear in mind that results are being steadily and continuously secured and not to be looked for exclusively at the termination of any given campaign.
