Special Advertising Campaign Stock Market Shows Marked to Be Inaugurated Will Be Big Aid; North Pacific Is Needed in Trade.

OF APPLE MARKET

By Hyman H. Cohen.

numerous titles—none of which meant anything. The extra fancy of one district would not be better than a fancy of other sections and all the way through the list a similar condition was showing. This year the apples will be branded No. 1 to No. 3 inclusive. While this is the best plan thus far devised for the marking of the apple crop, still it would likely be better if instead of numbers, the grades would be designated by letters, such as A. B. and C.

There is a natural prejudice among the buying public for anything that is graded under No. 1, therefore stock that comes under No. 2 and No. 3 respectively, will be somewhat handicapped in its sale. By grading the apples with letter designations, this handicap would be removed and still the fruit would be labeled at its proper rating.

Big Organizations Meeded.

Big Organisations Meeded.

It is unfortunate that at this time indications are that the north Pacific distributors will not do business this season. The failure of the promoters to secure the Wenatchee tonnage is attributed as the demoralizing feature and it is not at all sure that Hood River would care to place its fruit with the new co-operative concern.

That the North Pacific Distributors is needed to help solve the problem of marketing Pacific northwest fruit is the conclusion that has been reached by the trade generally, even by its competitors. None less than the North-western Fruit Exchange has gone on record as deploring the fact that the North Pacific Distributors will probably not do business this season.

The tonnage already secured by the North Pacific is fully sufficient to enable it to try out its plans of marketing, therefore there is a general call among the trade for its officials to refusing to go on with the organization.

Spokans Needs Distributors.

Spokane Reeds Distributors.

The Spokane district needs the North Pacific organization for the marketing of its fruit. At the present time that entire section is without a marketing agent. It is understood that the Northwestern has practically decided to close up its contracts for the season, therefore, will not be in a position to take care of other districts, not already affiliated. This will be a severe blow to the smaller districts and especially to the Spokane section.

Two strong organizations could do the work of marketing the apple crop of the Pacific Northwest better than one, This is admitted by all interests. No one or-Spokane Meeds Distributors.

is admitted by all interests. No one or-canization can satisfy all, no matter how efficient its service. Interests are how efficient its service. Interests are too conflicting and sooner or later another organization will be in the field. The opportune moment is now. All the agitation has been gone over and the various districts have picked out which organization they prefer to do business with. There will likely be favorable prices for apples the coming season, therefore, there is no better time than the present for the new organization to try out. It is nonsense to say that a greater tonnage is needed than at present secured because other marketing concerns have started with less than ing concerns have started with less than the North Pacific has already secured.

PORTLAND JOBBING PRICES

Resistance to Bearish Operations; Decreased Rail Traffic Believed Temporary.

By Benjamin B. Bryan.

By Hyman H, Cohen.

Distinctive brands for apples grown in the Pacific northwest will likely prove a very big factor in the marketing of the product, the coming season. Most of the shipping organizations have seemingly come to the conclusion at the same time that a better demand for apples can be created by proper advertising and the establishing of brands.

Pacific northwest apples will not be graded as in former years with their numerous titles—none of which meant anything. The extra fancy of one district would not be better than a fancy of other sections and all the way through the list a similar condition was showing. This year the apples will be branded No, 1 to No. 3 inclusive. While this is the best plan thus far devised for the marking of the apple crop, still it would likely be better if instead of numbers, the grades would be designated by letters, such as A, B, and C.

There is a natural prejudice among the buying public for anything that is graded under No. 1, therefore stock that comes under No. 2 and No. 3 respectively, will be somewhat handicapped in its sale. By grading the apples with letter designations, this handicap would be removed and still the fruit would New York, May 24.—The stock market

BUSY WITH A BIG **ADVANCE IN OPTIONS**

Total Sales-225,800 shares.

Chicago Has a Big Bull Trade and lent condition all through the week and There Is a Sharp Upward Move-

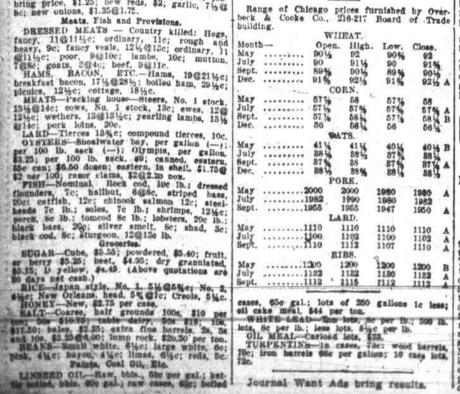

up 14c.
Southwest markets were sharply advanced as they were in closer touch with the sections furnishing the crop damage news for the day. Some little selling pressure on the part of the local trade was noted at the opening, influenced by the easier Liverpool and the bearish feeling carried over from the close.

Scarcely were the first quotations re-corded when it was discovered that big active houses in the trade were well sup-plied with buying orders. Lasalle Street APPLES—Eating apples, 75@\$1.25; cooking apples, 50@60c.

YEGGTABLES—Turnips, 75c; beets 75c; new carbones, 50 green bunches; parsnips, 75c sack; cabbage, \$2.75@3; Florida tomatoes, box, \$5; Mexican lugs (—); green onlons 12½-@15c dozen bunches; perpeets, 51.20@2.25c; head lettuce, \$2.25 crate; celerk, \$1 dozen, \$4.50@6 per crate; egg plant, 25c lb.; cauliflower, \$1.20@1.25 per dozen; shubarb, local littude with buying orders. Lasalle Street quantities, There was, nothing for the stuborn short interests in the local strong swell in prices to do but cover on the advancing market. As the session advanced advices from the southwest became more bullish. The damage complaints covered not only southwest became more bullish. The damage complaints covered not only southwest Kansas on previous days but spread to other portions of that state, came from some sections of Missouri on the southwest Kansas on previous days but spread to other portions of that state, came from some sections of Missouri and Oklahoma and the general tone of the news was alarming enough to develop an excited buil market.

Range of Chicago prices furnished by Overbeek & Cooke Co., 216-217 Board of Trade building.

Range of Chicago prices furnished by Over-beck & Cooke Co., 216-217 Board of Trade building.

Reviews of Portland Market for the Last Week Commission will force the railroads into such an embarrassing situation. Our textile trades are still considerably upset by proposed tariff changes which threaten to injure the fine cotton goods industry and some branches of the woolen trade. The probabilities, however, are that the extreme cuts named in the Underwood bill will be moderated by the senate. Otherwise the moderated by the senate. Otherwise the bill promises to pass in very much the same form as it went through the house. The outlook for a rational banking and currency bill is strengthening daily.

LOCAL STRAWBERRY GRAIN PRICES ARE WOOL MILL MEN IN SEASON ADVANCING

Chicago, May 24.—Wheat—There was the big bull market of the week in the local wheat trade today. There was an advance of 1½c in July and 1½c in September from the bottom figures of the morning and the close was about the tops at Minneapolis the July was up 1½c.

Southwest markets were sharply advanced as they were in closer touch

Market Irregular With Little Stocks Offering at Prevailing Figures; Keep Purchases Quiet.

Boston, Mass., May 24.—Wool buying in Boston is very irregular. The leading feature of the past week has been the opening and sale of some new clip territory wools. These wools are selfing very slowly, the present condition being almost a complete reversal of that prevailing a year ago. No further sacrifice sales of old wools are reported. Few leading houses have any volume of wool to offer. Buyers also have changed their attitude a little. The endeavor to market the new clip wools, however, is so difficult as to prevent free buying in the west at the level of prices recently quoted.

Considerable reticence is observed as to positive transactions in new wool,

Inability of Bidders to Secure Supplies Here.

By Hyman H. Cohen. ward in more liberal supply to the local market during the coming week, in quotations over last week's high fig-

With stocks of wheat exceedingly light at all Pacific Northwest points, and only a very limited portion of this being of No. 1 quality, there was little for the market to do during the week. Exporting interests and buyers for Callfornia account were the principal factors in the trade. As a rule even the leading Northwest millers were uninterested in either the market or supplies. Present price ruling for wheat at Pacific Northwest points is considerably in excess of what grinders can get out of the grain, even without counting their normal profits. There still remains an unusually heavy supply of patent flour at practically all Pacific Northwest milling centers; therefore this, together with the absence of higher prices for the product, precluded any possibility of milling interests becoming excited over the present price or condition of the

Coarse Grains Higher.

Not only was the extreme strength of last week's coarse grain trade retained the current period, but additional strength was forced and this brought out a higher price range. Stocks of barley available for the market at Pacific Northwest points are now so limited that bids have at last been placed upon a nominal basis. There is a strong demand, but no stocks are available to supply this.

What supply of oats was offered during the last six days was quickly snapped up at higher prices than during the last six days was quickly snapped up at higher prices than during the preceding week. The demand for oats is perhaps the best of the cereal market. As high as \$32 per ton was offered and paid for supplies during the week and the offerings at no time kept pace with the requirements.

Interest in the flour market is nominal. What orders are now coming forward from the Orient are of insignificant amount and are usually for established brand for filling in. Patent flour trade is extremely dull with prices stationary.

Exilistuffs Eule Higher.

iffice sales of old wools are reported. Few leading houses have any volume of yould to offer. Buyers also have been changed their attitude a little. The entry of the property of the property

RULING MORE FIRM A BEARISH POSITION

Business But Many Plants Enlarging Facilities.

The wool market is still of unsatisfactory character. Efforts of eastern mill interests to depress the trade are according to information compared the earlier sections.

While the volume of shipments to the Front street trade during the week was somewhat greater than during the preceding six days, the total offering was limited. Most of the fruit handled was from California.

The strawberry market was in excellent condition all through the week and even though the season was more advanced, total offerings were not as liberal as during the preceding six days.

The strawberry market was in excellent condition all through the week and even though the season was more advanced, total offerings were not as liberal as during the preceding six days.

The strawberry market was in excellent to do during the week's high fig still having their effect. The continuance of talk of the shutting down of factories in the east is one big facto still having their effect. The continu-

only a very limited portion of this being of No. 1 quality, there was little for the market to do during the week. Exporting interests and buyers for California account were the principal factors in the trade. As a rule even the leading Northwest millers were uninterested in either the market or supplies. Present price ruling for wheat at Pacific Northwest points is considerably in excess of what grinders can get out of the grain, even without counting their normal profits. There still remains an unusually heavy supply of patent flour at practically all Pacific Northwest milling enters; therefore this, together with the absence of higher prices for the product, precluded any possibility of milling interests becoming excited over the present price or condition of the wheat trade.

Coarse Grains Eighes.

Pessimism Is Still Strongest in North Portland Market Weak-New York and Other Eastern Points; General Trade Remains Quiet.

By Henry Clews. The great foreign banks have par-

tially succeeded in strengthening them-selves, and considerable assistance has

tially succeeded in strengthening themselves, and considerable assistance has been rendered by recent exports of gold from the United States but the evident financial strain at Berlin and the unsatisfactory tone shown at London and Paris are suggestive of further caution at those centers.

The banking situation at home is slowly improving. Bankers have been pursuing a much more conservative course during the last few weeks Loans and collateral have been carefully scrutinized, and more or less liquidation in both securities and merchandise has followed. As a result bank reserves are beginning to rise and a slightly better feeling is developing in banking circles, particularly in the west.

Pessimism is still strongest in New York and other eastern points. This is because all depressing factors tend to concentrate at these points. The east not only feels financial pressure more keenly than the west but it has also find to contend against tariff, labor and political troubles which bear more directly upon eastern business conditions than upon the interior.

The west is comparatively free of these difficulties, and has the compensating advantages of a good crop outlook and larger opportunities for development of natural resources. New England has been particularly depressed by proposed tariff changes and the heavy declines in some of her best securities which are widely held throughout the New England states—notably New Haven, Boston and Maine, and many cotton and woolen mill shares.

The home monetary situation appears to be gradually righting itself. It is true that dear money usually means cheap stocks, but securities are now selling upon a very low basis, even allowing for any possible reductions of dividends.

General trade continues comparatively quiet. The steel industry reports a

dends.

General trade continues comparatively quiet. The steel industry reports a slackening of orders, which was to be expected in view of declining real estate operations and the inability of the railroads to raise sufficient new capital to carry on improvements. The petition of the latter for higher rates is now likely to receive serious consideration, for it is quite evident that unless the roads are allowed to place themselves in a position where new capital can be raised the public is bound to suffer in transportation service. It is hardly credible that the interstate commerce commission will force the railroads into such an embarrassing situation.

same form as it wen' through the house. The outlook for a rational banking and currency bill is strengthening daily. The above ideas summarize the favorable factors affecting the financial situation. There are, however, other elements that must not be overlooked. Confidence is not strong, and the politico-social tendencies of the day tend to stimulate distrust and check enterprise quite as much, if not more than financial restraints. There is still an undue and unreasonable disposition to government interference with business of all sorts. Business men, especially those leading large enterprises, cannot tell what thew may have to face, and they are obliged to wait for more settled conditions. This enforces a further slowing down of business, lessened employment for all concerned.

The only remedy for this state of affairs is a return to sane thinking and sane doing, and turning our backs upon the latest fads and isms of untried and visionary leaders. There is one other possibility of disturbance in the stock market, and that is the friction with Japan In the present dispute there is absolutely nothing that warrants war. Japan could not finance a war with the United States, which would end in only one result—that of disastrous defeat to Japan. But Japan is proud nation, and may easily feel offended at our treatment, which has been unnecessarily brusque and inconsiderate.

It would be far better for the United States, and especially the Pacific coast, to cutivate friendly relations with the

Pendleton, Or., May 24.—Hot weather has prevailed in Umatilla county for the past week and as a result the grain the past week and as a result the grain has been growing apparently several inches a day. A month of such weather is needed, the farmers agree, for the best development of the grain. However, there is a danger that, with the great amount of moisture in the ground and with hot weather, there will be an exceptionally heavy straw which will detract from the size and weight of the grain.

By Hyman H. Cchen.

By Hyman H. Cohen.

Livestock values showed considerable change in the North Portland market during the week. There were smaller runs of hogs and cattle, and greater supplies of calves and sheep than a week ago.

The market for sheep showed a furthere sharp break in values, due to both the greater arrivals and the lack of quality among most of the offerings. Real good quality of mutton, while selling at a lower price than last week, was in quite good demand. The decline in the better class of stuff was the direct result of the pressing of so much poor stuff on the market. Shippers of half fat mutton were entirely responsible for the major portion of the week's break in sheep yard prices.

Conditions in the sheep trade at points east of the Rockies were not nearly as favorable as during the preceding six days. At practically all points lower prices resulted and the outlook is seemingly for another downturn of values.

ingly for another downturn of values.

 Hog Trade Shows a Loss.

Further loss in price is shown in the swine trade for the week. Values were not at all uniform, there being an erratic tone most of the time. Buyers picked out individual lots and for some of those better prices ruled than for others, although there was little, if any difference in the quality.

Hog market offerings in the local yards during the week were over 1000 head less than during the proceeding six days, but even with this, killers had their full needs.

Hog market prices east of the Rockies were somewhat firmer during the week
