From the Cool Depths of Bed Rock

The Clicquot Club Ginger Ale Plant is located at Millis, Mass., solely because of the wholesomeness of Clicquot Spring Water. This water flows from bed rock strata, is thoroughly filtered, carbonated at 80 lbs. pressure, and piped directly into the bottles without even an instant's exposure to possible impurities. The water is slightly laxative.

There is true "body" to Clicquot Club, for its rich, heavy syrup is made from the purest sugar and real ginger root, with dashes of lemon and lime. Absolutely no adulterants are used no saccharin, no coal tar products, no preservatives, no soapy foam producers.

Other Clicquot flavors: Birch Beer, Root Beer, Sarsaparille, Lemon Sour and Orange Phosphate
