MARSHALL ROASTS MONEY MADNESS IN EPIGRAM

By Fred Lockley. Marshfield, Or., July 26.—It is an unusual story I have to tell. It relates to a basic and fundamental question which society must meet and settle. It has to do with the right of free speech, liberty of conscience and liberty of action. It involves society's right to protect itself. The story has to do with the deportation of Dr. Baily Kay Leach from Coose county. The story is worth the telling and it is worth your reading and you who read it must serve as the jury and bring in your verdict according to the facts. Secretary Fish stated that in his be lief Dr. Leach was an undesirable citizen and should be invit-d to leave the city.

Jack Sullivan, manager of the Hub Clothing company, suggested that a committee be appointed to bring Dr. Leach to the meeting and tell him to leave the city. Volunteers were asked for and about 30 or 40 responded. This committee went to Dr. Leach's home and Jack Sullivan told Dr. Leach he was wanted at once.

Dr. Leach asked for 15 minutes' time but the committee insisted that he come at once. R. E. Bedillion was the spokesman. He told Dr. Leach that in the opinion of the meeting Dr. Leach had insuited the flag and the people of the community and he would have to leave by 2 o'clock the following day.

Dr. Leach was allowed to answer the charges. He said: "I have not insulted the American flag. I stand for everything the American flag represents. I am not an I. W. W. NEW WATER CODE TO SAVE CITY TAXPAYERS NEARLY \$62,000 YEAR

Commissioner Daly Favors a Plan Now Being Worked Out by New York Bureau.

Taxpayers and water users will have the satisfaction of seeing the overhead expense of the city water department cut nearly \$62,000 a year when the ad-ministrative code required by the comministrative code required by the com-mission charter is put into operation. Under the code the overhead expense of the water bureau will not be over \$45,000. It was \$65,880,77 in 1913 and \$63,210.18 for the first six months of 1913, according to figures furnished yes-terday by Winfred B. Holton, expert of the New York Bureau of Municipal Research, which is formulating the code for the administration.

The water bureau is in charge of Will H. Daly, commissioner of public utili-ties. He heartily approves and is ma-terially aiding the work of completing the code in its application to the water department.

department. The figures furnished startlingly show how overhead expense has in-creased in a year in the water bureau. In 1912 it was 8.5 per cent of the to-tal revenues; for six months of 1913 it was 17 per cent of the total revenues. Part of the percentage, it is true, is chargeable against the clerk hire ex-pense of installing the new system of the water bureau. This latter expense, on the same basis as in 1912, is 13.9 per cent, or a difference of 6.4 per cent. In a year.

What Expense Is Included.

What Expense is Included. 4 Overhead expense includes the cost of inspection, office expense, books and stationery. The amounts for six months of 1913 were: Inspection, 316,344,33: of-fice expense, \$45,567; books and station-ery, \$1,398,85. The percentage of overhead ex-pense should become smaller rather than larger as the number of installations in-crease," commented Mr. Helton, "We be-lieve that this 13 per cent overhead charge will not be over 6 per cent, and will be probably less than 6 per cent, under the new code." Mr. Heltom ex-plained, how the change which will save Portland a large amount of money and let cilizens know more clearly how their business is being han-died is to be brought about.
