All Is Not Gold that Glitters.

This time worn expression is strikingly emphasized in business conditions noticeably in evidence today. People are rapidly becoming aware of the fact that goods displayed in stores in the "high rent" districts where the running expenses and the exorbitant rents are necessarily added to the price of the article, are no better values than the merchandise displayed in the store of the merchant in the low rent district of the east side.

MEANING OF FEMINISM

By Dr. Frank Crane.

(Copyright, 1913, by Frank Crane)

Very few of those engaged in the movements of modern feminism, or of those opposed, realize the depth, the tidal resistiveness, the cosmic character, of the force which is, now quietly and now with turbulence, bringing women into even higher prominence in our civilization.

Most of the things advanced women are striving for are straws, but they show the way the wind blows. Getting the vote, in itself, means little; so also mean little the wearing of trousers, the entrance into the professions or into business, or the capture of any of the superficial privileges traditionally enjoyed by men only.

In a state of nature and of freedom, where society is not continually prevented from normal growth by wars and threatening wars, as has been the case up to this age and everywhere but in America, woman would be naturally the superior and dominant sex.

Ruskin points out that Shakespeare, and Scott, and Dante, and all the greatest masters of literature have not been mistaken in making the heroine always the stronger spiritually. It is she who is queen and disposer, it is for her the hero fights and labors, his reward and his incentive are in her keeping.

Man is the weaker vessel. Only in imperfectly developed races is the strong man master. As culture and intellectual growth advance, the reins of control pass into the woman's hands.

Biologists are now intimating that it is probable that Eve was made first, and that Adam is the after product created to assist in the perpetuation of the race.

That women now "look up" to men, and are usually clinging vines and leaning, dependent creatures, idle dolls or indolent playthings, is simply due to the lingering influence of centuries of artificial conditions caused by the universal presence of war.

In time to come the woman, and not the man, will be the head of the family. Hers are the children more than his; she carries them while they are being formed; her body and soul is poured into them.

In marriage the man will take the woman's name. All that he achieves will be frankly recognized as caused by her direction. Property rights will be vested in her, not in him.

She it is that has the divine beauty of face and form, and when the struggle shall have been transferred from fists and clubs to ideas and spirit entities she will naturally assume leadership.

The farther we evolve from beasthood the nearer we approach to a woman-ruled world.

In all the things that tend to the health and soundness of mankind, and hence to "the outpopulating power" of a nation, woman is superior. She has by nature the strength that lies in chastity, loyalty, and the appreciation of the higher spiritual quantities or reverence, self-control and idealism.

Man is carnal, drunken, and earthy, only kept up to the mark by the enchantment woman casts upon him.

The "mastery" of such men as Napoleon and Bismarck is crude, cheap stuff. The world today, and even more tomorrow, needs and will need another kind of mastery, not that of battle might, of Tammany power, of the brutal efficiency of enormous capital, but the mastery of conscience, of the sense of justice, and of the just estimate of human values.

Here woman is supreme. Hail to her, queen of the coming race! Even today a man does no work worth while except it be to lay it at the feet of the woman he serves.

NEW PUBLIC LIBRARY

BE FORMALLY OPENED ON SEPTEMBER NINTH

Contents of Old Structure Will Require Best Part of Six Weeks to Move.

September 9 is the date set for the formal opening of the new public library on the block facing Tenth street between Taylor and Yamhill. The task of moving the library contents from the present building on Stark to the new structure will consume the greater part of six weeks.

Portland's new public library building is one of the largest, most commodious and modernly arranged structures of its kind in the entire country. There are a few libraries in the east having greater height, but none covering a larger ground area, and not one better equipped with the latest and most approved features designed for the comfort and convenience of the general public as well as the employees.

As it stands the building and ground represents an investment of approximately \$875,000, of which sum \$500,000 was required for the building.

The main entrance is on the Tenth street front from which rises a grand stairway to the second floor where are located the general circulation department, reference room, technical department, information bureau and executive offices.

On the ground floor will be found the periodical room, the children's department, the story hour room, the superintendent of branches and the women's rest room.

On the ground floor, with entrance from Eleventh street is the auditorium, 45 by 80 feet, with seating capacity of 600. Here it is to be a public meeting place where scientific and literary societies and other associations of a such nature may gather for public discussions.

In addition to the auditorium, the library building is provided with several smaller apartments adapted to private consultation or study.

Featuring the general equipment of the new library building are the splendid lighting and ventilating systems. Throughout the structure, the indirect direct lighting system has been installed while the ventilating plant supplies fresh filtered air to all departments every minute. This is accomplished without drafts and without any perceptible lowering of the temperature.

Adequate elevator service has been installed.

HOPPICKERS TO SALLY FORTH TO GARNER CROP

Three thousand hop pickers will sally forth among the blossoms and vines along the Willamette valley early in September, gathering in the hops and, incidentally, shekels for themselves.

Half a dozen employment agencies are gathering up the forces for the annual pick and the Oregon Electric lines, the P. & E., and the Southern Pacific will carry them.

Most of the pickers will be dropped off at Waconda, Chemeketa, Lively and Sidney, but every hop yard throughout the valley will claim some of the recruits gathered in Portland.

Hop picking time this year will be the usual holiday season for many people who will spend their vacations amid the vines. But for hundreds more, it will be a season of hard work for the actual cash they can glean.
