Tomorrow in the Big Basement Store

Be certain to attend the demonstration of the "Universal" Percolators tomorrow. You will learn that the only sure way to make really delicious coffee, with a rich, full flavor, and without acidity or bitterness, is by the percolating method, which causes an even circulation of boiling water to flow over the coffee grains, scientifically extracting every essence of flavor of the coffee bean. "Universal" Percolators are splendid in design and an ornament to any table. Made of aluminum, cannot rust and are easily cleaned. See the demonstration tomorrow.
