## Health and Beauty Helps

The Perfect Hand Is Both Shapely and Graceful.

By Abigail Moore, It is pretty generally the accepted theory that beautiful hands are born and not made, and their beauty is short

Neither theory is altogether true. If the God-given framework is badly proportioned, it is naturally more difficult to train the hand into shapeliness, but unless there is actual deformity, it can be done by daily attention.

After 25 the hand that has not received proper care begins to grow thin and bony, the skin to turn a sickly yellow, and the nails to become so brittle that they are constantly breaking; joints stiffen and the fingers crack every now and then. All of things, declares Therese Conover Maxwell, whose beautiful hands are renowned wherever she has appeared on he stage, can be deferred many years, and even in the majority of cases pre-vented, if intelligent, painstaking care is given before the ravages have commenced. "And by taking care," she hastens to explain, "I do not mean wrapping the digits up in cotton wool, as the belles of long ago did, nor of re fraining from manual labor of any kind, as many a modern belle does out rather to keep them in condition for both-use and ornamentation."

Whether the hand is large or small matters not, but slenderness as com-pared with breadth is essential. Now, o acquire slenderness, practice stretching the hand, always keeping the fingers lightly together. It is a mistake to allow the fingers to spread apart. Not only does it enlarge the apparent of the hand, but it makes usage of it awkward, and no one, however symmetrical or graceful otherwise, can afford to be awkward in the use of her hands,

Three things are necessary to a fair treatment of the hands-absolute cleanness, massage to keep them soft and pliable, and exercise to make and keep he muscles supple so that the hand itself may be able to respond readily to the dictates of the will.

I need hardly point the way to cleanliness, but perhaps a word or two of warning is necessary. Remember that scap and water are drying, and unless the hands are in a perfectly healthful water will make a skin break and liable to crack, and impede circulation, so only luke-warm water should be used, and with the aid of a good flesh brusa will be entirely efficacious. For massage, the strokes should be

### ECZEMA ON BACK ARMS AND CHEST

Broke Out in Pimples. Itching and Burning Seemed Unbearable. Hair Fell Out Terribly, Cuticura Soap and Ointment Cured.

Pierson, N. Dakota. - "The eczema started on my scalp. It finally went on to the back of my neck, then on to my back, arms and chest. It broke out in pimples first and then seemed to run together in some places, making a sore about the size of a dime. At times the Itching and burning were so intense that it seemed unbearable. The more I scratched it the worse it

became, and there would be a slight discharge from it, especially on my scalp, so as to make my hair matted and sticky close to the scalp. The hair was dry, lifeless and thin. My hair was falling so terribly that I had beg to despair of ever finding relief.

My cloth irritated the eruption on my back. The affected parts were almost a solid scab.

"I tried using -- at first, then I tried using ——and after an hour or so washed it off with good - Soap. Neither of the remedies gave any relief only for the time being. I had been bothered with eczema for about a year and a half. Then I began using the Cuticura Soap and Ointment. I first bathed the afflicted parts with the Cuticura Soap and then applied the Cuticurs Ointment, I used them daily for two months and I was cured." (Signed) Miss Mildred Dennis, Apr. 30, 1913.

trend of manipulation up toward the wrist. Vaseline, yellow or white, is the best lubricant, since it sinks into the skin and feeds it, and it is a whitener

As for exercise of the hand and fingers, plano practice is excellent. It strengthens the fingers, and at the same time trains them to act both independently and in concert, which is very necessary to grace. After that the hand must be taught to turn readon the wrist, for strong, flexible wrists, rendering the hand movable, independent of the arm, is another essential of the hand graceful and beau-

The king and his courtiers equally mystified and enraged at this strange behavior, but the envoy sat as calm and still as an image, and it soon became plain that they would get no explanation from him. The ministers were hastily summoned to a council, but not one of them could throw any light upon the subject. This made the king more angry than ever, and he told them that unless before sunset they could find some one capable of solving the mystery he would hang them all.

The king was, as the ministers knew.

man of his word; and they quickly mapped out the city into districts, so that they might visit house by house, and question the occupants as to whether they could fathom the action of the ambassador. Most of them received no reply except a puzzled stare; but, luckily, one of them was more observant than the rest, and on entering an empty cottage where a swing was swinging of itself, he began to think it might be worth while for him to see the owner. Opening a door leading into another room, he found a second swing, swinging gently like the first, and from w he behald a patch of corn, and a willow which moved perpetually without any wind, in order to frighten away the sparrows. Feeling more and more curious, he descended the stairs and found himself in a large, light workshop in which was seated a weaver at his loom. But all the weaver did was to guide his threads, for the machine that he had invented to set in motion the swings and the willow pole made the loom work. So without more ado the minister
