

BRITISH COLUMBIA AND THE NORTHWEST WILL WELCOME MILLIONS

Large Percentage of World's Increased Population to Be Cared for in U. S., Canada.

By P. A. O'Farrell. Vancouver, B. C., Sept. 6.—Domenio Burns has chosen a site on Shaughnessy Heights for a great cathedral, which he desires his co-religionists to build.

Often have I heard the warning, "don't prophesy unless you know," and I am not unmindful of the advice, but in my mind's eye, I see a million people gathered here five and twenty years hence, and ere this century ends, I see Vancouver greater than Paris or Berlin, and far more glorious and richer and more populous than ancient Rome.

During the past five and twenty years the world has made more and more progress, grown more in population, gained more in wealth, and accomplished more wonders than during all the ages from "A little ere the mighty Julius fell" until the downfall of Napoleon, the centuries of Julius Caesar and Napoleon and all the span between, and then weigh well the fact that the progress of the last five and twenty years exceeds the progress of that long period of well nigh two thousand years.

The world's population will increase five hundred millions in the next 25 years. That is the great cardinal fact, the great danger, the great peril, the bankers and statesmen to study. Is it not marvelous to think that in a generation a population is to be added to the world's present population, greater than that of ancient Rome?

Beyond argument over a hundred millions of additional population will have to be cared for in Canada and in the United States during the next five and twenty years. That is why the Panama canal is building, and that is why western Canada is now rushing the construction of the most complete network of railroads ever built.

Canada would not be true to her mission were she to halt her developments and stop the building of her railways, or the sanitary improvements of her cities, or the felling of her forests, or the creation of new farms, or the harnessing of her great waterfalls, or the building of mills and factories, or the development of her mines, till Wall Street or Lombard Street gave the signal to go ahead.

As well might the mother be asked to halt the provision for her unborn babe, as ask the states and provinces of the Pacific northwest to halt their development and activities to suit the convenience of the bankers of Paris, New York and London.

Financial Independence Prevails. As well might the mother be asked to halt the provision for her unborn babe, as ask the states and provinces of the Pacific northwest to halt their development and activities to suit the convenience of the bankers of Paris, New York and London.

These Hairs Will Be Gone in 3 Minutes. "Hairs Gone Forever!"

NEW MUNICIPAL REPAIR SHOP IS NOW OPEN

Municipal garage, storeroom, repair shop and blacksmith shop. Top, left to right—Corner of repair shop showing men working at lathes and other machines. Blacksmith shop and forge. Bottom—Section of storeroom, at left. Men working on a city automobile in repair shop, at right.

Portland's municipal repair shop, garage, storeroom and workshop at East First and Madison streets is now in active operation and the men in the repair shop had their first real work when the city automobile, formerly used by the mayor, was overhauled last week. Although the shop is in operation, all of the equipment is not installed. A few weeks more, however, will see everything ship shape.

The municipal building is under direct supervision of J. R. Wood, municipal purchasing agent. All orders for repairs, supplies and other necessities for the city are handled through his department.

The basement of the building is fitted up with a blacksmith shop, containing a forge and other necessities. All of the horses owned by the city, except those used by the fire department, are to be shod there.

Freight Elevator Used. The horses are to be brought into the building and taken to the basement in the big freight elevator.

On the first floor are located the automobile repair works. The shops contain lathes and all other machines necessary to do the work. It is estimated that repairs can be done at this shop a great deal cheaper than any place else in the city.

Part of this floor is used as a garage. All of the machines owned by the city have to be turned in at this shop each night and a check is made of the hour the automobile comes in.

Big Saving Made. On the second floor is located the storeroom for supplies used by the city. When finally in working order everything from a pin to a springing wagon can be obtained there.

The building is so situated that freight cars can be drawn right up to the doors and unloaded without trouble. According to Mr. Wood, there is to be a place for everything and requisitions will be required for all supplies, material or work.

INDIANS BALK AT MENTION OF TAXES

Yakimas Did Not Participate in Flag-Raising Through a Misunderstanding.

North Yakima, Sept. 6.—Through clumsy interpretation of the address of Dr. Joseph Kosmuth Dixon, head of the Rodman-Wanamaker expedition to the American Indians, says L. V. McWhorter, the Yakimas at Toppenish refused to take part in the flag-raising ceremonies which are a feature of the visit of the members of the expedition to the various tribes.

In explaining the purpose of the expedition and the erection of the monument at Fort Wordsworth in New York harbor, Abraham Lincoln, the interpreter, McWhorter says, laid emphasis on the fact that the government is anxious that the Indians as soon as possible take up the duties of citizenship and pay taxes like the white people.

"CHERRIANS" WILL SHINE AT PENDLETON SHOW

Salem, Or., Sept. 6.—A grand ball was given in the Armory here last night in which at least 250 couples took part. It was given for the purpose of raising funds to send the band along with the "Cherrians," an organization similar to Portland's "Rosarians," to the Round-Up at Pendleton next Thursday.

POSTOFFICE OFFICERS BARRED BY CARRIERS

Closing Act of Convention Is to Limit Membership to Active Letter Carriers.

San Francisco, Cal., Sept. 6.—Postmaster Arthur G. Fisk of San Francisco expressed entire sympathy with the aims and accomplishments of the National Association of Letter Carriers. In an address at the close of the nineteenth biennial convention of the organization, he gave entire approval of the eight hour day for letter carriers, and declared that it is entirely practical and violates none of the government's standards of economy.

National President W. E. Kelly, in a closing address, voiced deep gratitude for the warm welcome extended by San Francisco to the visitors, and characterized the convention just closed as the most successful ever held by the letter carriers.

One of the most radical steps taken by the carriers was in the adoption of a provision submitted by the resolutions committee that hereafter members who are not in active service may be denied a voice in the deliberations of the association if objection is made. The motion was bitterly contested before it carried. In line with this policy, a resolution was adopted specifying that no supervising official of the postoffice department may become an active member.

W. C. Bouck, secretary of the Omaha convention committee, thanked the delegates for the honor conferred upon his city, in naming it for the 1915 convention, and assured all who attend a hospitable welcome.

PLANS APPROVED FOR FIRST LAP OF HIGHWAY

Walla Walla, Wash., Sept. 6.—Plans and specifications for the first five miles of the Inland Empire Highway, between this city and Walla Walla, have been approved by the state highway commissioner, and returned to this city. The specifications call for a water-bound macadam, notwithstanding the fact that good roads committees of the various commercial clubs of the county have asked that a more satisfactory surface material be put on the road.

Two parts of ammonia to one of turpentine will soften old paint or varnish and make its removal easy.

New Fall Suitings, New Trimmings, New Neckwear, New Ribbons

Rids Skin of All Hairs, Try It, Free

Wonderful New Preparation, Unlike Anything Ever Known Before.

I want every man and woman who wants to get rid of superfluous hair, anywhere on the body, to see the extraordinary results of my new Electro-trol, the most remarkable preparation. You have never used anything like it before, and you will never use anything else when once you've tried it. Unlike other preparations, Electro-trol absolutely and forever destroys the life of the hair roots.

Moreover, Electro-trol is safe, absolutely. No irritation, no itching, no redness, no smarting. In three minutes all superfluous hairs are gone. The skin, no matter how thick, is left refreshed, soft and beautiful.

Heavy growths and light growths vanish. Any woman can now grow her hair, neck, face and bust of all downy or heavy hairs and her beauty enhanced a hundred fold. I am going to prove it to you, and send you a liberal trial package of this new Electro-trol, if you will simply send me your name and address on the coupon below, with a 2-cent stamp to help pay cost of mailing. The full size package of Electro-trol is \$1.00. I will send you the \$1.00 package now, if you prefer, on receipt of price, and refund your money if you are not satisfied.

FREE TREATMENT

Fill in your name and address on dotted lines below and send it to me, Anna Burton, 211 E. 43d St., Room 1407, Chicago, Ill. I will send you a help coupon, and a trial package of the remarkable new Electro-trol.

DANGER OF FOREST FIRES IS PASSED

State Forester Elliott Says This Year's Damage Less Than in 1912.

(Salem Bureau of the Journal.) Salem, Or., Sept. 6.—Declaring that reports received from wardens in the field indicate that the recent rains were statewide in their scope, State Forester Elliott today gave it as his opinion that no fears need be entertained as to any serious forest fires during the remainder of the season.

He also stated that while the forest fires this season have been more numerous than last year that they have been less destructive, the damage this season to the timber being very small, while last season it mounted into thousands of dollars. All of the fires this season, says the state forester, were put under control before they could do any damage.

The fire fighting organization of the federal government, the state and the timber companies were superior this year, and to this end the increased number of wardens in the field, he attributes the small damage. There were about 150 more wardens in the field this year.

PLENTY OF CARS FOR SHIPMENT OF CROPS

(Salem Bureau of the Journal.) Salem, Or., Sept. 6.—According to Railroad Commissioner Campbell, the danger period for a car shortage in the state has passed, and from now on shippers will find it easier to get cars.

All of the sugar beet crop in California, says Commissioner Campbell, has been harvested and this will release for use in this state hundreds of cars. The car shortage season becomes most serious in the months of August and September, and a few complaints were received from shippers last month. These, however, were inconsequential when considered with those received last year. With all these cars available from California no fears need now be entertained by shippers as to cars, says the commissioner.

Montesano High Dedicated. (Special to The Journal.) Aberdeen, Wash., Sept. 6.—Dedication last night of the high school at Montesano, which cost \$75,000, was a notable affair, being attended by Governor Lister, State Superintendent of Public Instruction Josephine Preston and several instructors of the state university. The building is of brick and concrete and \$10,000 has been spent for its equipment.
