William Heister Scored by the Prosecutors Who Secured White Slaver's Conviction.

(Oreg. Press Leased Wire.) REQUEST PORTS TO SPEND \$525,000 UPON NORTH JETTY

(Continued From Page One.) member of Commerce trustees, who passed the resolution this afternoon. It is the idea that of the \$525,000 the Port of Portland would provide \$500,000 and the Port of Astoria \$25,000. The resolution adopted reads as follows: "Whereas, we are convinced that each year's expenditure for the completion of the improvement now being made at the mouth of the Columbia river is worth millions of dollars to the states of Oregon, Washington and Idaho, and particularly to the city of Portland, and whereas, we are informed that the present monthly expenses for the north jetty construction work is about \$150,000, and whereas, there now remains available but about \$300,000 of funds for this work and whereas, we believe that the next river and harbor bill will probably not be enacted before July at the earliest, and possibly not until September, of next year, and whereas, we understand that the district engineer's preliminary estimate for the fiscal year ending June 30, 1915, is but \$850,000, and whereas, at this rate it would probably take six to seven years to complete the north jetty, and Double Shift Wanted. "Whereas we believe that given the \$6,000,000 estimated by the engineers as the cost of this work, the project might be completed three years sooner because we have already ascertained that the daily tonnage of rock cast increased from 2500 to 6000 tons per day and double shifts worked during the summer months instead of single shifts as in the past and at present, and whereas, we deem it of the greatest importance to the state and to this city particularly, that this work should be pushed towards completion as expeditiously as possible, realizing that with the small unexpended balance of \$300,000 now available that even under the present method of procedure the government will be entirely without funds for the work before the passage of the next river and harbor bill, necessitating a temporary cessation of the work. "Whereas, the district engineer, under the law, is required to have his final report and estimate in the chief of engineers' office not later than October 1, we urgently invite the cooperation of all the commercial organizations in the territory interested in this project, and respectfully suggest to the Port of Portland that immediate attention be given the matter and the earliest possible determinative action taken by them.
