

### COURSES OF STUDY IN THE FREE PUBLIC NIGHT SCHOOLS ARE CHOSEN

Registration Will Be Commenced Monday; Schools Open on September 29.

Members of the board of education have completed the outline of courses of study for the free public evening schools which will open for the new term September 29.

The courses offer a wide range of subjects and are designed to fit the pupil for almost any walk of life. Registration for the high school evening school will begin Monday and will continue throughout this week. Arrangements have been made for the registration at the Lincoln high school. The official announcement of the opening of this branch of education suggests five main objects of the evening school. The first is to provide educational opportunities for pupils who have not completed the day course, to give special training to help pupils become more efficient wage-earners, through the course in household arts to give instruction in the intelligent administration of the home, to give instruction in English to foreign-speaking people in the gymnasium and to provide physical training and instruction in matters relating to health.

**Must Show Fitness.** The desire to be helped is the main condition for admission in these night classes, aside from the limits of age definitely specified.

Graduates of the elementary schools or the grammar schools are eligible to admission without examinations, but other applicants must give satisfactory evidence of their fitness. The applicants must be at least 14 years old and not connected with the day schools. Day pupils, however, who wish to supplement their work in the night classes, may be enrolled, but only by special permission.

The courses will lead up to diplomas and successful completion of an subject will be recognized with a certificate. The courses are of three years' length and consist of two subjects taken four nights a week. Six courses are now offered as follows:

- General Course—Academic and cultural in scope.
- Commercial Course—Bookkeeping and stenography divisions.
- Industrial Course—Mechanical drawing and applied mathematics. Household arts for women.
- Scientific Course—Chemistry and physics.
- Examination Course—To prepare for admission to professional schools.
- Civil Service Course—To prepare for positions in the government service.

Prospects for a large enrollment this year are unusually bright. The enrollment last year exceeded 300, and this, the third year, is expected to outstrip the two previous years of the evening school's existence, judging from numerous inquiries that have been received at the school headquarters.

**Preference Is Sought.** One of the innovations the department will undertake this year is to induce employers to give preference in promotion to employees who are studying at the evening classes. Much encouragement has been given the school authorities in the inquiries they have regularly made among the employers and this is expected to prove one of the practical features of the workings of the department.

Evening classes at the Trade school, Eleventh and Davis streets, will be opened October 12 instead of September 29, when the other schools resume work. At the elementary school and school for foreigners at the Lincoln school and the Albina Homestead, classes will begin September 29 and be in session from 7:15 to 9:15, Mondays, Wednesdays and Fridays.

The various courses of study in the evening high school include:

- The General Course—English composition, rhetoric and literature, algebra and geometry; German, French and Latin; history and economics.
- Commercial Course Given.
- The Commercial Course: Bookkeeping division; bookkeeping, penmanship, commercial law, commercial arithmetic, commercial English, commercial geography and office practice.
- Stenography division: stenography, commercial English, typewriting, office practice, special speed classes for advanced stenographers.
- Industrial Courses: Mechanical drawing, applied geometry and trigonometry. Sewing, art needlework, cooking and home economics.
- Scientific course—Industrial and applied chemistry with particular reference to its relation to manufacturers; physics, with the emphasis placed on the practical fundamentals, and the application of electricity, magnetism and mechanics to the requirements of mechanical work.
- Examination course—Mathematics, history, literature, Latin, German, science. The direct aim is to prepare for the examinations leading to the professional schools of law, medicine, dentistry and pharmacy. The assignment of

## "77"

A hard stubborn Cold that hangs on, is broken up by Humphreys' "Seventy-seven"

## COLDS

The first sign of a Cold is lassitude; a gone feeling of weakness, as if some serious illness was pending.

If you will get to recognize this first feeling of catching Cold and fly to the cupboard for a dose of "Seventy-seven," you will break up the Cold at once.

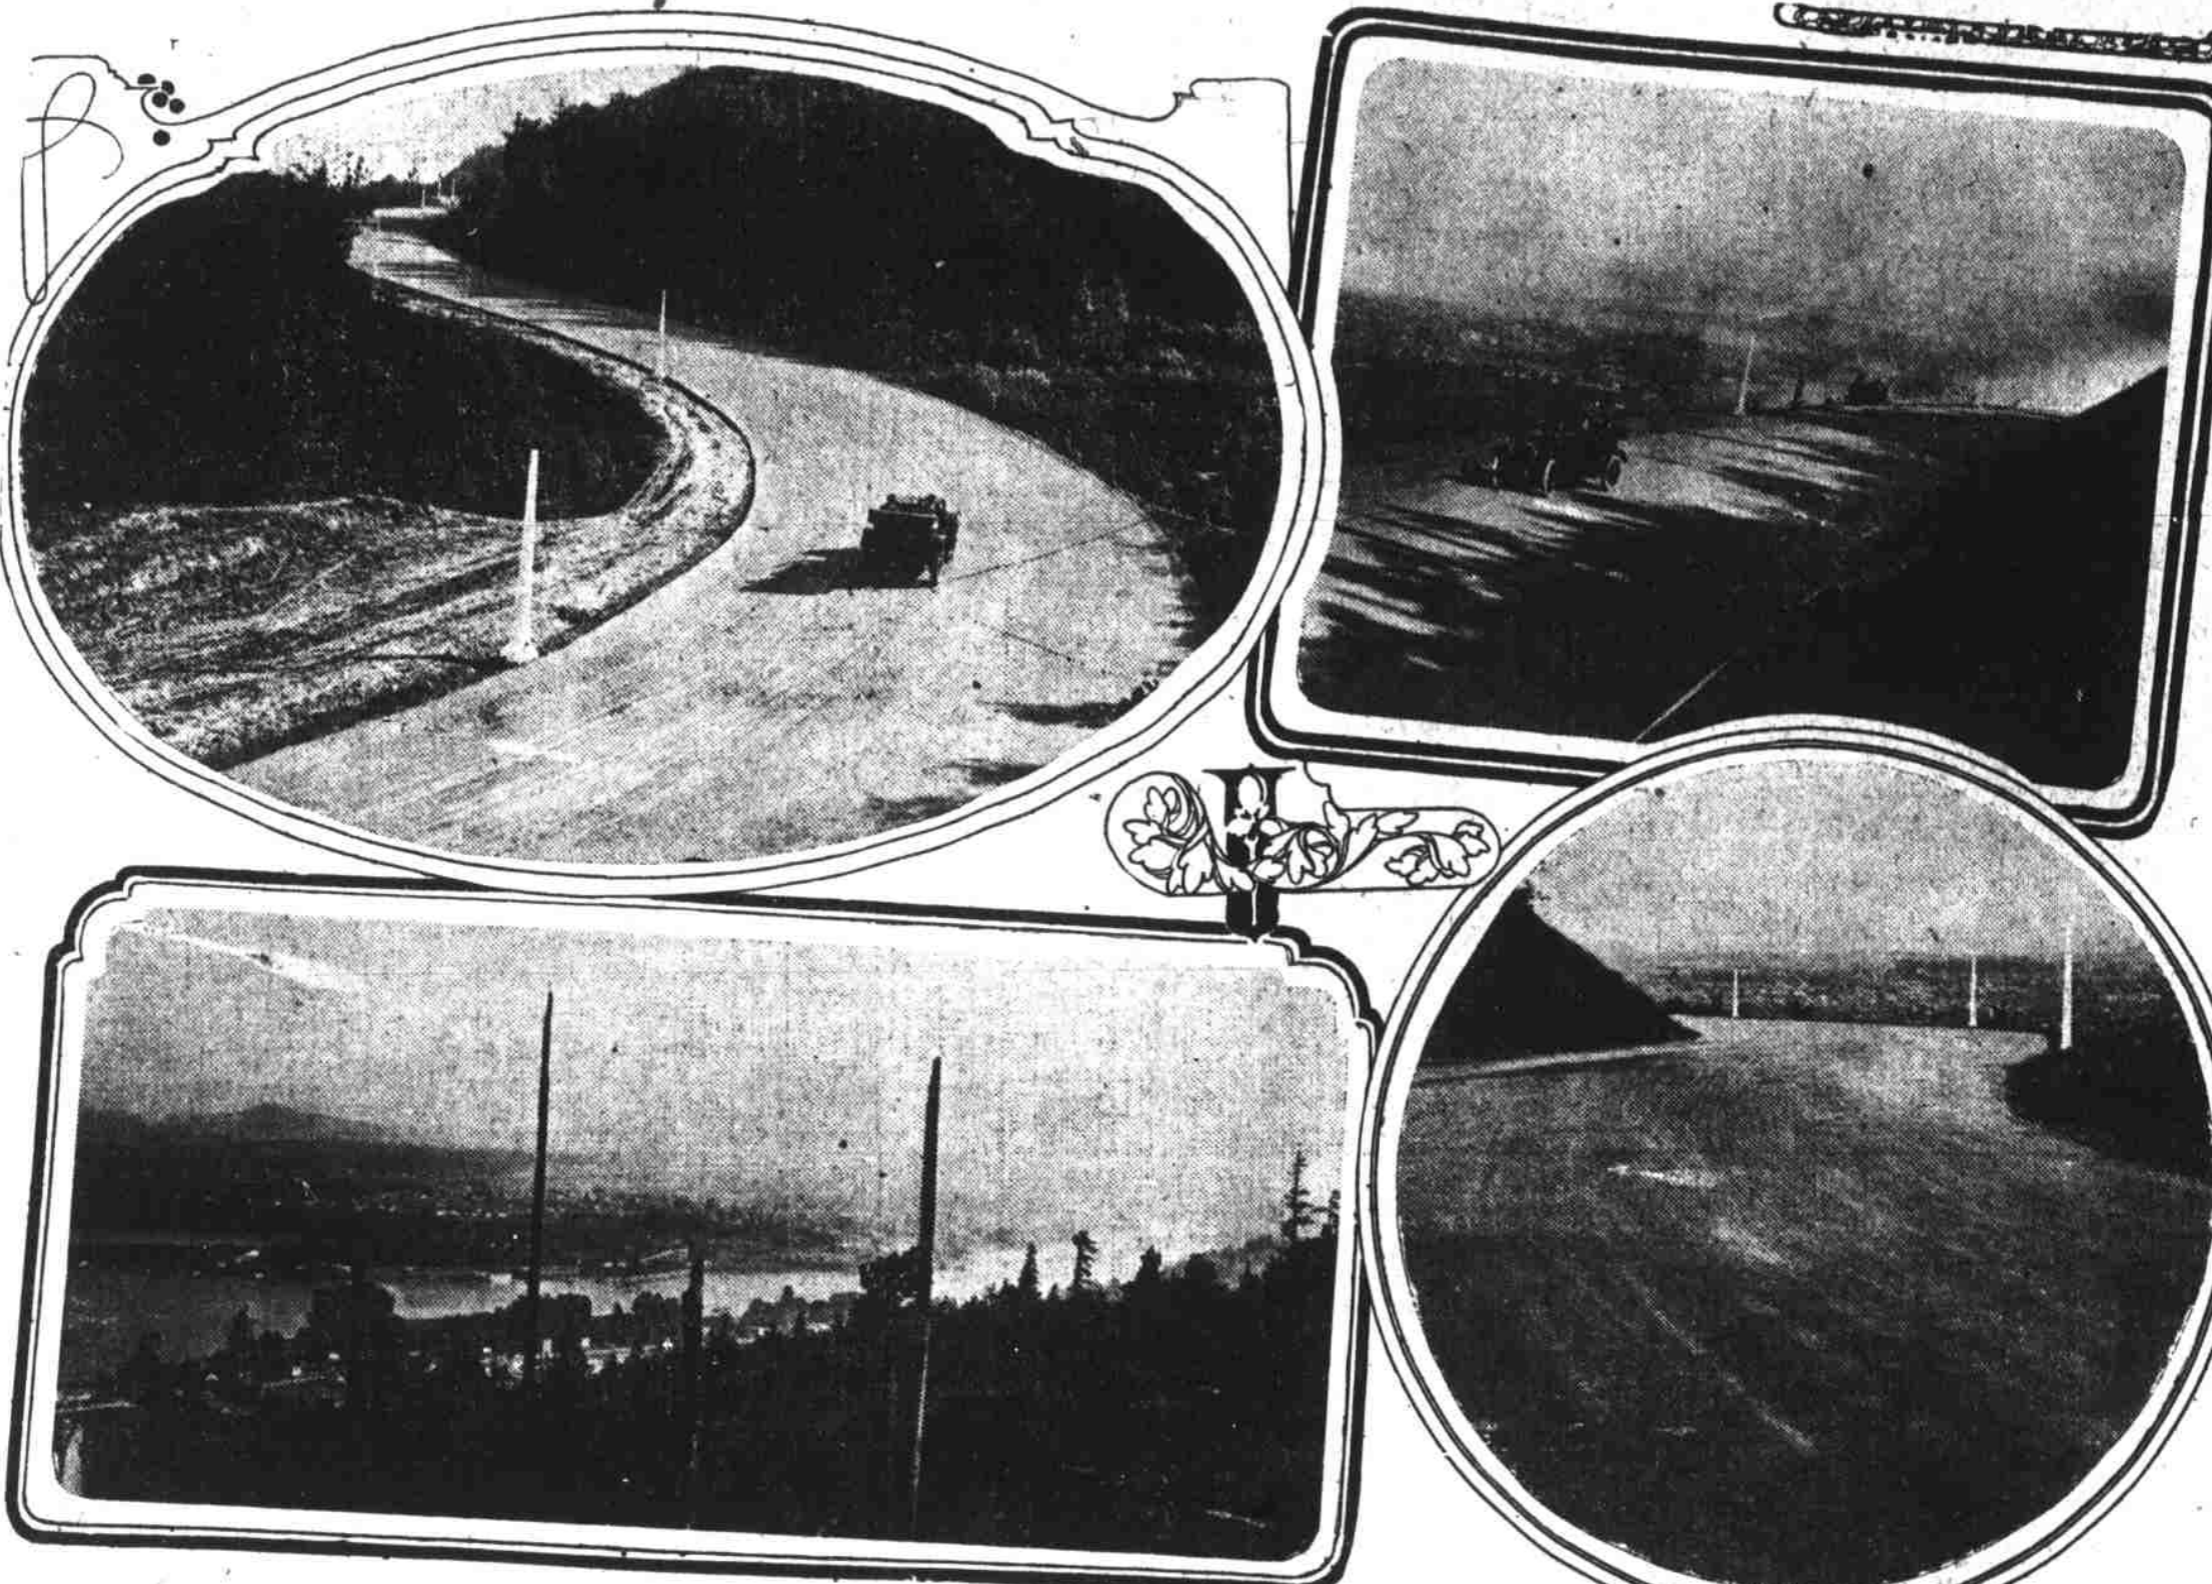

If you wait until your bones begin to ache it may take longer.

"Seventy-seven" is a small vial of pleasant pellets, that fits the vest pocket, easy to carry, easy to take.

Is for sale in every store in America that sells medicines, price, 25 cts. and \$1.00, or mailed on receipt of price.

HUMPHREYS' Homeo. Medicine Co., 156 William Street, New York.

## SCENIC HIGHWAY DESTINED TO BE ONE OF WONDERS OF WEST

Top row, left to right—Attractive section of Terwilliger boulevard, showing easy grades and artistic curves. Long stretch with view of east side of river. Bottom row, left to right—View from road of wooded sidehill, reach of Willamette river and Sellwood, looking southeast. Rounding projecting knoll, looking toward Mount Tabor and east side residence districts.

Work has just been completed on the first link in the proposed skyline highway which may eventually thread its way majestically along the commanding hills west of the city from the southern limits of Portland, northward to Linnton.

Art and nature have combined to make this magnificent scenic driveway one of the wonders of the west. The road was built under the direction of the park board.

With its graceful, undulating curves, subjects is adapted to the individual needs of the pupils.

**OSTEOPATHIC SOCIETY IN MONTHLY SESSION**

The regular monthly meeting of the Portland Osteopathic society was held in the assembly room of the Journal building last night. Among those who spoke were Dr. H. F. Leonard, who has just returned from a post-graduate course at the Harvard Medical school; Dr. Otis F. Akin who discussed bone transportation in tuberculous spines; Dr. J. E. Anderson of The Dalles, a member of the last legislature, who spoke on legislative topics as pertaining to the practice of osteopathy; and Dr. J. A. Van Brakle, recently appointed health officer of Clackamas county.

A report on the recent convention of osteopaths held at Kirksville, Mo., was given by several delegates, including Dr. H. C. Moore, Dr. M. E. Gillis and Dr. Van Brakle.

The association, which has a membership of about 40 osteopathic physicians, also passed resolutions supporting Dr. Van Brakle in his fight for the place of health officer of Clackamas county.

### MONEY CAN'T COAX HIM TO RETURN TO RUSSIA

Despite the fact that a fortune awaits him in Kiev, Russia, Charles H. Shapiro, a local inventor of 805 Kelly street, has decided to stick by his adopted land. Faith in the utility of his inventions and his ability to carve his own way have brought him to this determination.

### LEWIS COMMISSIONERS TALK NEW ROADS

Centralia, Wash., Sept. 20.—The Lewis county commissioners spent the greater part of this week in the eastern end of the county in the interest of a proposed road to be built from Elate Aid Road No. 5 to the new bridge at Nesika. A meeting was held at Nesika Thursday night at which the Lewis county commissioners expressed their enthusiastic interest in the road in these towns. In the party were Commissioners Teaschner, Gray and Long and County Engineer John Ward.

### KENNEDY WILL RETURN TO WORK ON MONDAY

Deputy County Assessor J. P. Kennedy, who suffered an attack of heart failure yesterday, is much improved and expects to return to his work tomorrow morning. Mr. Kennedy has been subject to attacks of the character of the one yesterday for a short time. He is 64 years old.

### GREATER PROTECTION FROM DISEASE, PLAN OF HEALTH OFFICER

Complete Reorganization of Department Urged by Dr. M. B. Marcellus.

Dr. M. B. Marcellus, city health officer, has planned a complete reorganization of the Portland health department.

By means of it he believes that protection of public health in Portland can be made more efficient than in Seattle at little more than half the cost.

If the city commission approves the plan and authorizes its institution at the beginning of the year it will mean an annual expenditure of \$100,000 to prevent contagious and epidemic, maintain sanitary conditions, inspect the milk supply and carry on an educational campaign systematically and continuously.

Though the \$100,000 expense seems large compared with the \$39,000 present annual budget, it dwarfs in comparison with the \$20,000 spent annually in Seattle. \$150,000 of the latter sum, however, being spent in the Puget Sound metropolis for the disposition of garbage.

Portland now spends 12 cents per capita for health protection, says the city health officer, and only one other city in the country spends as little. If the plan is adopted it will increase the per capita health protection expense to 40 cents.

A chart has been prepared to illustrate the plan. It shows three main divisions under the city health officer—the main division, medical inspection division and sanitary inspection division.

In the main office would be a chief clerk at \$1200, two other clerks at \$950 each, a stenographer at \$900 and a telephone girl at \$180.

On a clear day the waters of the Columbia may be seen, and Vancouver and Oregon City come under reach of the eye from almost any part of the boulevard.

The skyline highway is designed, it is said, to be one of the greatest assets of the city of Portland. Expert road engineers who have viewed the place already constructed declare that in no part of the western hemisphere is there a highway so ideally situated.

The skyline highway is designed, it is said, to be one of the greatest assets of the city of Portland. Expert road engineers who have viewed the place already constructed declare that in no part of the western hemisphere is there a highway so ideally situated.

The projecting knolls have been tiffened with the sweep that holds the observer in a spell. Sharp turns have been obliterated. Clinging serpent-like to the green hills, the road will make possible a scene, as one speeds in auto or carriage, that is ever changing.

The type of road used is that known as Warrenite, which can be further described as a two inch layer of asphaltic concrete with the voids in the aggregate eliminated, and with a surface finish of asphaltic cement and fine stone chips.

While the scenic beauties of the road are its chief features, the boulevard is bound to be of immense practical value. It will give easy and quick access to the city for the country traveler and the suburban dweller.

The construction of this boulevard was made possible in part through the public spirit of the abutting property owners, who donated a strip 200 feet wide for the right of way.

ard Oil plant, except that the latter road was laid by the county over the surface of the old macadam as a redress proposition. This type of road is an application of the Bitulithic pavement to the country road. The Bitulithic has stood the traffic of Fifth street for nine years. The maintenance of these roads is practically nothing, while that of the old style macadam road is between \$500 to \$1000 per mile per year. The contract price for paving Terwilliger Boulevard is approximately \$20,000; the contractor being Harry Howard.

### LOAN ASSOCIATION'S STOCK IN DEMAND

Remedial Plan Aimed to Benefit Small Borrower; Making Good Start.

With a stock subscription of \$51,000 as its aim, the committee soliciting subscriptions to the recently proposed Remedial Loan association, promulgated by the Associated Charities, has secured nearly a quarter of that amount in the first week of its campaign.

The plan of the association is to loan money at a legal and fair rate of interest to worthy people on chattel mortgages. As outlined in the prospectus of the association, it is "to promote means by which money can be loaned to persons in need of small amounts, so that such persons may secure the same on reasonable terms without being charged usurious rates of interest, bonuses, commissions, or being oppressed by any other device resorted to for the purpose of exacting an unreasonable rate of interest."

The committee in charge of the project consists of R. S. Howard, Ladd & Tilton bankers; Wilfrid P. Jones, Merchants National bank, and V. R. Manning, Associated Charities.

James Hamblen, who has had considerable experience in remedial loan work in Astoria, Battle and Kansas City, will have charge of the association's interests.

### ICE HIPPODROME CO. ELECTS ITS OFFICERS

Officers and directors were elected Friday at a meeting of the stockholders of the Portland Ice Hippodrome company in the office of Marion F. Dolph. Those chosen were: President, Edward H. Savage; vice-president, J. George Keller; secretary-treasurer, Fred A. Wilson; directors, Samuel Solomon and James M. Welborn. It was reported that \$100,000 worth of stock had been subscribed and that contracts for the ice making machinery had been let. The contract for the building at Twentieth and Marshall probably will be awarded early next week.

### CENTRALIANS FILE TWO BIG DAMAGE SUITS

Centralia, Wash., Sept. 20.—Two big damage suits were filed in the Lewis county superior court yesterday. Mrs. L. F. Maxam, a prominent resident of Centralia, filed suit against the Washington-Oregon corporation for \$15,041 damages for injuries alleged to have been received when she fell from a traction car on Tower avenue on the night of April 3. W. F. Thompson, also of this city, filed suit for \$12,750 damages against the Chachalis River Lumber & Shingle company for injuries alleged to have been received in an accident at the mill on January 5, 1911.

## No Pain No More Fear of the Dental Chair No Pain

"NOR A HIGH DENTAL BILL"

### EXPERT SERVICE LOWEST PRICES

All work warranted 15 years. Best bank references.

We replace teeth without plates which can not be told from your own. We give absolutely reliable and up-to-date dentistry which will please you not only in looks but in active service. Our artificial teeth are guaranteed to fit, to stick to your mouth and to feel comfortable.

### Crown and Bridge Specialists

- Good Plates ..... \$5.00
- Porcelain Crowns ..... \$3.50 to \$5.00
- Gold Fillings ..... \$1.00
