

STOCKMEN COME TO TEL. OF FINANCE IN BAKER BANK CASE

Defense Is Expected to Attempt to Prove That Cashier Lindsay Victim of Scheme.

Traveling 1100 miles, F. C. Oxman, a wealthy eastern Oregon stockman and one of the heaviest stockholders of the Citizens National Bank of Baker, has come to Portland to testify that a "scheme of high finance" is responsible for the technical charge of misappropriating certain notes from the bank on which Guy L. Lindsay, formerly cashier, is now being tried before Judge Bean in the United States district court.

It is understood that Mr. Oxman will declare on the witness stand for the defense, that W. E. Bodinson, president of the bank, stated after he had sold his bank stock to Lindsay last year, that he (Bodinson) would within two years buy stock back at 100 the stock he sold for \$140 a share. Bodinson's alleged actions which culminated in Lindsay's indictment and trial under way, the defense will assert, was a part and parcel of the alleged scheme to regain the stock at a low price by involving Lindsay in difficulties, and thereby depressing the stock.

The transaction which forms the basis of the charges against Lindsay was the abstraction of two notes aggregating \$10,000 from the bank, which it is alleged were used as collateral to secure an additional loan for a lumbering concern. The notes were returned to the bank later and paid.

Bodinson at that time was president of the bank and denies that he knew anything regarding the abstraction of the notes in question. He later sold his stock to Lindsay, resigned as president, and went into the furniture business. That he did not pay him as well as his salary as bank president and he wanted to get back his stock and position in the institution is asserted by Oxman, who says that Bodinson said as much to him, Bodinson was reelected president recently.

The trial this forenoon was given over mostly to the introduction of technical evidence touching upon bank bookkeeping and the recording system pursued in the Citizens' Bank.

NOTICE TO CITIZENS OF PORTLAND. The greatest life-saving apparatus invented in recent years is the PULMOTOR. It is invaluable in cases where animation is suspended as a result of asphyxiation, electric shock or drowning. The inhaling and exhaling of air is made automatically; therefore, it is invaluable for the restoring of life that depends on a revival of the faculty of breathing. The Pacific Telephone & Telegraph Company has purchased a Pulmotor and has placed it at their Main Office, corner West Park and Alder streets, where it can be secured at any time—day or night. It is the desire of the Telephone Company to make this apparatus available for use in any case where it may be of service in saving human life. The public is invited to call up Main 8800, Local 54, and notify the attendant of any accident where the Pulmotor may be of service. An experienced operator will be dispatched at once with the Pulmotor to the scene of the accident and every effort will be made to assist in the saving of life. A regular physician should also be called at once.
