

SHIK IS SOUGHT AS THE MURDERER OF GIRL WHO WAS THROWN INTO BAY

San Francisco Girl Found Strangled, Body Weighted With Iron and Chains.

(United Press Leased Wire.) San Francisco, Cal., Oct. 6.—Efforts by the Contra Costa county authorities to unravel the mystery of Rosa Dominguez's death centered today around the quest for the 35-year-old girl's woe.

The Shik, said Ali Khan, who worked alongside her in the Metropolitan Match works at Stago.

Physicians said positively that the girl was strangled before her body was sunk at the foot of the California Cap works' wharf at Stago, the bruises on her head and face probably having been made by striking against the piling of the wharf when the loosening of the chain allowed it to rise.

Girl Warned by Father. Mena Khan, said Ali Khan's roommate, either could not or would not throw any light on the case when taken into custody, and all that was definitely known was the girl's father, Manuel Dominguez, a Portuguese resident of Stago, warned his daughter against accepting the Shik's attentions; that the girl left the match factory in consequence last March, stayed first in Oakland, then found employment at Harry Polle's restaurant in San Francisco; told Polle last Wednesday that she was going to Stago to see her mother, and left that night, taking nothing from her room. No one could have found her, he said, seeing her after Wednesday night until her body was found Saturday off the Stago wharf.

The letter, signed "M. Said Ali," asking the girl to join the Shik, which was found in the girl's room and the fact that a man answering the Hindu's description called on her a week ago yesterday, convinced the authorities, however, that when she left her room the night she was found.

Went to Attend Funeral. Though the Shik told other employees at the match factory that he was going to attend a funeral at San Jose, no evidence could be found of his having visited there.

Detectives were not only searching the Hindu camps from Martinez to Elmerston this afternoon for Said Ali Khan, but San Francisco was thoroughly ransacked on the theory that he might have come here.

The murdered girl's father, Manuel Dominguez, collapsed after he had identified his daughter's body at the Richmond morgue, and this afternoon could not even talk coherently.

Transmer Blames Shik.

Richmond, Cal., Oct. 6.—Charley Riley, transmer, friend and associate of Rosa Dominguez, whose body was found in San Francisco bay at Stago, near here, Saturday, was released by police today after being in custody since yesterday afternoon. Riley made a statement which the authorities believe strengthens the charge that Said Ali Khan, the girl's Hindu woe, is responsible for her death. The girl bore an unsavory reputation. Several weeks ago she was arrested by the Oakland police on suspicion of insanity, but was released. In her room at San Francisco the detectives found about 300 post cards from men, and a list of 50 men with whom she had been corresponding.

CHINESE WOMAN IS SENTENCED TO JAIL

Two Chinese women, both the wives of Lee Hong, appeared before Municipal Judge Stevenson this morning, where one of them was sentenced to serve 90 days in the county jail for allowing her son to sell drugs to habitual users. Both women have been living with Lee, who is now serving nine months in the county jail for dealing in cocaine. The Chinese is a merchant at 14 North Fourth street. Six months ago he was arrested by the federal officers. Both women have been in the same quarters. The oldest woman was purchased by Lee 12 years ago for \$1800.

Two years ago Lee decided he wanted another wife, so married the younger woman at Vancouver, B. C. He took her to his home to live with wife No. 1. The second wife is to become a mother soon.

TIMBERMAN'S RESIDENCE ROBBED OF SILVERWARE

Entering the home of F. L. Botsford, a timberman residing at Elizabeth and Chapman streets, burglars rifled the safe of approximately 80 pieces of solid silverware worth several hundred dollars Saturday night. In addition they took a quantity of table linen but disturbed nothing else. Each piece of silverware bore the initials of the owner.

The thieves chose an opportune time for the robbery, as Mrs. Botsford is in San Francisco visiting relatives and Mr. Botsford was absent on a short business visit. He discovered the robbery upon his return home Saturday night and notified the police.

Captain of Detectives Baty is of the opinion that the robbers were not professionals, forming this theory on the fact that nothing beyond the silverware was disturbed. The police believe it is the same gang that robbed the home of F. L. Fuller on Portland Heights.

TWO MEN VICTIMS OF HUNTING ACCIDENTS

Albert Zimmerman and George Moore in Hospital, With Injuries.

Two men were accidentally shot while hunting yesterday. Both are at the Good Samaritan hospital. Albert Zimmerman and a neighbor were hunting near Tigard, Or. The neighbor fired at a pheasant near Zimmerman, who received the discharge of the shotgun, the shot lodging in his abdomen and chest. Zimmerman lives at 347 East Sixtieth street.

George Moore and two companions were hunting pheasants near Barton on the Estacada line. Moore was holding the barrel of the shotgun in one hand while the other hand was on the stock of the gun. In some way the gun discharged, the shot tearing off his left hand at the wrist. He lives at the Grand hotel.

While working on the S. P. & S. track yesterday afternoon, Vancouver, W. M. Duncan, 565 Princeton street, got in the way of a switch engine, both legs being cut off immediately above the ankles. He died an hour later at a Portland hospital. The ambulance service company brought him to the city.

Edward Blackwell, 945 Northwick street, was found dead Saturday evening in a car standing in the Northern Pacific parking yards. He was working in the car, death being due to heart trouble, according to the coroner.

ASSERTS ATTORNEYS' FEES WERE TOO HIGH

A complaint, charging Attorneys George A. Hall, H. J. Parkinson and Harry Yankwich with making excessive charges for legal services to Lillie M. Trigg, and with a breach of confidence between attorney and client in the case of the estate of William Mohrmann, who died March 3, 1912, and that the attorneys defended a contest against the property, a house in Arleta valued at \$1400, started by a son of the deceased, for which they took half the property. Later, it is claimed, the defendants traded the woman \$0 acres of alleged valuable land in Oklahoma for the other half of the property, and that on investigation it was found the attorneys had no title to the Oklahoma land, which was in possession of the woman.

Another excessive charge is alleged in a bill, presented by Yankwich, for \$58.35 for a trip to Seattle, which is said to have been unnecessary. Summing up the charges, Meschan declares the attorneys secured \$498 and all the woman's property, and that the woman has nothing of value to show for what these attorneys did for her.

PHEASANT WANTED AS EVIDENCE DISAPPEARS

From a report received by Judge Gattens of the juvenile court from the police station it is evident that some person about the station has a leaning toward going to the police to get a pheasant. The juvenile court has been asked to answer to a charge of shooting within the city limits. Judge Gattens could not find a Chinese pheasant taken from the boy and held as evidence. It is believed that someone ate the evidence.

"We didn't know exactly where the city limits were," said the boy in explanation this morning. A patrolman whom we asked about the location of the limits said he didn't know where it was either.

Humphries, with William Ross, 29 years old, yesterday chased a pheasant rooster over the line near East Seventy-second and Harrison streets, and killed it. The boy had the bird in his possession. He was released last night. The bird, which he had killed, was confiscated. He didn't know whether he or his companion shot the bird. He resides at 169 East Seventy-fifth street. He will be held to answer to the juvenile court next Saturday.

"ALFALFA SPECIAL" IN EASTERN WASHINGTON

Professor F. G. Holden's "alfalfa special" concluded its trip over the O. W. R. & N. lines in western Washington Saturday at North Yakima. He and his party are touring the Yakima valley under the auspices of the North Yakima Commercial club. Tomorrow, the Northern Pacific will take the party to Ellensburg, for three weeks through Washington.

John Scott Mills, who conducted the train for the O. W. R. & N. returned to Portland yesterday after 10 days along the route. He said fully 14,000 actual farmers had heard the lectures told why dairy cows should be fed on the alfalfa that should be raised and given to the meat in conservation of soil fertility.

SANDY SEES THINGS IT NEVER SAW BEFORE

Sandy Or, Oct. 6.—Sandy and the visitors to the fair enjoyed a novel and interesting exhibition Saturday afternoon, when V. O. Brown, otherwise known as "Happy Jack," who won first place at the Pendleton Round Up, was passing through here to attend a fair to be given at Madras in eastern Oregon.

Hearing that a fair was in progress here, he hastily got together a number of horses noted for their bucking propensities and gave Sandy an afternoon of real fun. Local bronchos were unable to dislodge the rider.

Pleads Guilty, Fined \$25.

Edward C. Johnson, president of the Portland Seed company, in the federal court this morning pleaded guilty to an information made charging his company with check charging violation of the insecticide act. He was fined \$25. Charges were made in the information that a shipment of "aphicide," made from Portland to Vancouver, had been misbranded. Assistant United States Attorney Summell handled the case.

Municipal Information Clerk.

Miss Mina Smith, information clerk at the city hall, assumed her new duties this morning, occupying a table and chair in the hall near the Fifth street entrance. The first question she was asked was by an ex-sider who wanted information about a lateral sewer in his neighborhood. He was referred to the sewer department, where he got the desired information.

BUDGET FOR COMING YEAR PROVIDES LONG WAITED IMPROVEMENTS

Public Market and Police Sub-Stations on East Side Included.

With the mayor, city commissioners and employees under them working over time, the annual budgets for 1914 have been rounded into tentative shape preparatory to submission to the budget committee, headed by C. A. Bigelow, commissioner of finance, before 5 o'clock this afternoon. The estimates include the cost of a number of new municipal improvements, long promised.

The budget committee, which corresponds to the old ways and means committee of the city council under the old form of government, will immediately start pruning, and in some instances add to estimates already made. The estimates are to be combined into one general budget from which the tax levy for 1914 will be determined.

As the figures at the present time are only tentative, to be changed in numerous instances, just what the tax levy will amount to is a matter of conjecture, at this time.

IMPROVEMENTS LONG PROMISED

Among the appropriations for the new improvements, long promised, are \$15,000 for a public market, \$15,000 for an industrial and detention home for women and several other improvements. Mayor Albion's budget of two sub-stations for the police department and a jail on the east side are planned for 1914, the cost not having been fully determined.

The mayor's budget calls for the expenditure of \$175,956 for the police department, \$25,000 of which is to be used in the installation of new signal system. The estimate for the fire department calls for \$65,956, which includes the new apparatus and a berth for fireboat, George H. Williams, besides the regular running expenses.

An appropriation for the city fund is estimated at \$60,000. The budget of the health department calls for \$109,870, which includes the cost of equipping the Emergency hospital in the new city hall and its maintenance. The estimated cost of the health department, alone, for 1914, amounts to approximately \$185,000.

The cost of maintaining the municipal court is estimated at \$7,681; while the cost of the mayor's office is estimated at \$11,545.55, which amount includes the salaries of the mayor, his secretary, stenographer, chauffeur, repairs and office supplies.

A total of \$1,718,656 is asked by Will H. Daly, commissioner of public utilities, to handle the affairs of the water bureau for 1914. Of this amount \$250,000 is asked for installation of meters on all services, \$50,000 for the installation of new fire hydrants, interest on charging this amount to water consumers, \$250,000 for maintenance and operation, \$750,000 for construction of new extensions, \$207,120 to pay the interest on outstanding water bonds, and \$151,560 for a sinking fund for water bonds.

Commissioner Daly in his budget estimates the cost of the street cleaning department for 1914 at \$400,000, which includes the cost of constructing a new city barn at Sixteenth and Jefferson streets to cost \$65,000. The estimate calls for street-cleaning apparatus to be purchased for \$100,000. At present this work has been done by contract, but has proven unsatisfactory.

The estimate also calls for the increase of the force by eight more men and 14 more horses. Last year's budget estimate for this department was \$348,171, but then there were no new build-lings to construct. As there were there as many paved streets to look after.

The cost of the lighting system for 1914 is estimated by Commissioner Daly at \$215,000, which, under his new plan of rearranging the lights will cost \$5000 less than the amount allowed for 1913. The cost of running the incinerator for 1914 is estimated at \$24,000.

A levy of 4-10 of a mill will be necessary, according to Commissioner Bigelow's estimate, to provide a sinking fund for the retirement of bonds. About \$250,000 is necessary to pay interest on bonds falling due the coming year. The revenue for the year to come into the general fund through licenses and other sources is estimated at \$165,949.

The cost of the park department for 1914 is estimated at \$367,000, of which \$175,000 is asked for new work, \$100,000 for salaries and \$92,000 for supplies and maintenance.

Approximately \$22,798 is asked for in the care of the city hall. This amount calls for insurance on the building, salaries, supplies and other necessities. In Commissioner Brewster's budget \$1187.50 is asked for to maintain the temporary auditorium, \$500 for the free museum, \$1849 for the free employment bureau and \$25,140 for the city attorney's office which amount includes several increases in salaries, and the cost of codifying the ordinances.

Purchasing Department Estimates. The cost of the purchasing department is estimated at \$12,562, of which \$2220 is for salaries, \$10,000 for supplies, and \$394.58 for miscellaneous supplies. The estimate of City Auditor Barber calls for an increase of about \$5000 more than last year.

For help the estimate totals \$47,700 while the estimate for supplies and incidentals calls for about \$5000.

Commissioner Dieck plans several improvements for work in his department which are included in his budget. His budget calls for \$30,000 to be used to cut down corner curbs at street intersections, \$4000 or the establishment of bench levels, \$2000 for the survey of all underground systems, \$10,000 for the elimination of curves and jogs in streets, \$1500 for the completion of the detailed sewer survey for the Peninsula district, \$5000 to remodel the Fifth street entrance to the city hall and behind.

The estimated expense of the civil service commission is \$4490, which includes the addition of more help and increase in salaries of those at present working.

The budget committee, which begins working on the pruning, will hold a public hearing, and all will be given an opportunity to find out what their taxes are for. When the budgets leave the hands of the committee they will go to the city council, which will hold another public hearing. Final action must be taken before the third Monday in November.

Suicide of Colonel E. J. Tate. New York, Oct. 6.—Colonel E. J. Tate, 51st Baltimore, committed suicide in a hotel room yesterday, because express company stock he held had declined since the establishment of the parcel post.

RAILROAD UP MOSIER CREEK MAY BE BUILT

Line From The Dalles South Would Tap Rich Timber Belt.

That a steam railroad from The Dalles through the Mill Creek or Cheno-valley to tap the rich timber at the head of Mosier creek in the meaning of a number of surveys run from the Columbia river southward during the last few months, is the subject of numerous rumors in Portland lumber circles during the last few days. C. D. Wise, said to be one of the promoters of the project, this morning refused to make any statement whatever regarding the road, but intimated that there was ground for the reports.

Mr. Wise and S. S. Fair of Detroit, Mich., recently visited The Dalles and are said to have discussed the railroad situation with a number of lumbermen. The reported plan involves the erection of a sawmill at The Dalles to work up the timber taken out from the inner country.

What the new road actually will be built will depend, it is said, upon the conditions of the lumber market and the financial situation. It is known that large bodies of timber along Mosier Creek are available and that capitalists are favorable to the project of getting it out.

The road would connect with the O. W. R. & N. at The Dalles and though independent of that line, would thus open a new territory tributary to Portland.

CHIEF SAYS HE HUNTED ON HIS WIFE'S LAND

(Salem Bureau of The Journal.) Salem, Or., Oct. 6.—Chief of Police F. L. Sheddick of Salem was arrested by special game wardens for hunting within the limits of the Salem game reserve.

Yesterday was a great day here for hunters. The woods and fields were full of them. The woods and fields were also pretty well filled with deputy game wardens. The result was that eight arrests were made. Some were arrested for killing China hens, some for killing Bob White quail, some for bagging more than the limit, and some for shooting within the newly created Salem reserve.

Chief Sheddick was in the latter class. He says he was hunting on his wife's place, and what is hers is his, and he had a perfect right to hunt there. His car has been set for Friday in the justice court. He declares he will fight it vigorously.

MEET TO DEVISE MEANS TO AID STEAMER LINE

For the purpose of devising means to secure more cooperation in the work of raising subscriptions to the proposed bonus of \$100,000 in aid of the Portland-New York steamship line, a meeting of interested citizens will be held in the assembly hall of The Journal building tomorrow forenoon at 11 o'clock.

The meeting has been called by A. H. Averil, Julius Meier, F. B. Beach, Frank H. Ransom and F. C. Knap, who have sent out a number of written notices of the meeting to the largest taxpayers, business men and friends of the enterprise.

In the letter it is stated the central purpose of the meeting is to devise a method by which a body of men, capable and willing to subscribe to the fund can be brought together. At present Richard Chiffert is working up the subscription list.

GREAT BOND ISSUE BY FEDERAL GOVERNMENT FOR GOOD ROADS, PLAN

Ex-Senator Bourne Outlines His Scheme for Securing National Highways.

Former Senator Jonathan Bourne Jr., speaking before about 50 citizens of Portland interested in the Good Roads movement at the Commercial club this morning, outlined in brief his plans for the federal aid of good roads. Frank Branch Riley, vice president for Oregon of the Pacific Highway association, presided.

"My scheme," said Senator Bourne, "involves a practical expenditure of \$3,000,000,000 during a period of 50 years by the states and the federal government in the construction, improvement and maintenance of good roads. It was originally presented April 25 of this year to the joint congressional committee on federal aid in the construction of post roads.

"The national government would issue good roads bonds bearing 3 percent interest, the principal to be paid in 50 years. These bonds would not be taxable on either principal or interest. I would issue them in as small sums as \$20, and multiples thereof, that every citizen might have an opportunity to subscribe, for nothing makes for better citizenship than participation in the government by its citizens. The sale of these bonds would form the nucleus of a fund which would in turn be loaned to the states.

"To cover the federal loans each state would be required to issue bonds bearing 4 percent interest. The amount of federal aid would be apportioned among the states on a pro rata basis, according to population and assessment valuation. The states would be permitted to receive 20 percent of the total amount apportioned to them in one year. At the end of five years it would have received its total apportionment.

"Upon the maturity of the state's bonds deposited with the treasurer of the United States and the payment of the interest the bonds will be cancelled and returned to the states.

"To provide a maintenance fund the government would appropriate 2 percent of the bonds on deposit and the state 3 percent likewise.

"I regard maintenance fully as important as any other feature of the good roads movement.

"To supervise the administration of the good roads funds I would have a United States highway commission, to be composed of the chairman of the two congressional committees on post roads, and the director of the office of public roads, either a bureaucratic or cabinet official.

"I would found a National Good Roads Academy in Washington for the education of good roads engineers. Each state would be permitted to send one student from each congressional district. The federal government would allow four cents per mile in mileage and \$50 per month expenses. Such an national university would make an esprit de corps and workable stage of good roads engineers such as no other country could boast.

"My plan would insure that work between the federal government and states and it would be merely a loan of funds to the states, not an original transfer of the superior credit of the federal government. The states would have the most splendid incentive for good roads activity. My plan protects and conserves the rights of the states and eliminates any possible element of subservience.

"Without egotism I believe that my

plan is concrete, practical and workable and that if put into operation will save this country billions of dollars."

NEGRO ARRESTED FOR MRS. GAY'S MURDER

Piece of Gas Pipe Found in Room; He Is Partially Identified.

(United Press Leased Wire.) San Diego, Cal., Oct. 6.—That enough circumstantial evidence to convict Burr Harris, the Los Angeles negro suspected of having murdered Mrs. Rebecca P. Gay in Los Angeles 10 days ago, already has been gathered by the Los Angeles detectives working on the case, was the semi-official opinion expressed this afternoon after Harris had been pined with questions for more than two hours at the local police station.

Detectives Hickok and Eiven of Los Angeles would have little to say of the case. They admitted, however, that Harris was confronted this morning with Mrs. Cecilia Curry, who declares she saw a negro prowling around the office building where Mrs. Gay was later found murdered. It is known that Mrs. Curry partially identified the negro. It was admitted also that there are half a dozen witnesses in Los Angeles who are counted upon to make identification certain.

Detectives working on the case admitted that Harris, though at first elusive and obstinate, had at last agreed to talk.

Harris Has Bad Record. Los Angeles, Oct. 6.—Burr Harris, a Los Angeles negro arrested at San Diego in connection with the murder of Mrs. Rebecca P. Gay, left Los Angeles the day after the murder. The confirmed today a report that a section of gas pipe resembling the pipe with which the woman was killed, was found in his room.

Harris was arrested here in March, 1913, on suspicion of killing Mrs. Melvina Higgins, on a ranch near Compton. At his preliminary hearing he proved an alibi, although six witnesses testified that they saw him near the Higgins ranch the day of the murder.

In 1907 Harris was accused by Miss Helen Mathewson, proprietor of an apartment house here, of sending poisoned candy to children. Later he was accused of trying to kill Mrs. Mathewson by sending her, through the mail, a dynamite bomb. He was acquitted on these charges.

Fire Destroys Residence. A fire of unknown origin broke out at 11:30
