## 'VAGS' AT OREGON CITY -LATER FOUND TO BE POSTOFFICE ROBBERS

Battered and Blackened Nickel and Watch Lead to Prisoners' Identification.

Arrested on vagrancy charges by Oregon City policemen Tuesday morning, it was almost 24 hours later that they found out that government officers wanted James Bliss and Frank Morgen for robbing the postoffice at Willam-ette, five miles south of Oregon City.

Biles and Morgen were sauntering across the suspension bridge, spanning the Willamette at Oregon City, in the small hours of the mording. The of-ficers did not think they should be out so late and promptly committed them to the city bastile.

About 8 o'clock Tuesday morning a hurry up call came to Postoffice Inspector E. C. Clement, in Portland, stating that the postoffice at Willamette had been entered and robbed. Clement hurried to the scene and found that the ried to the scene and found that the robbers had tapped the postoffice till, taking \$5 in small change and had also broken into a cash register of the store room adjoining and had taken \$8 in small change. In addition they had also pilfered a woman's gold watch.

The robbers had also attempted to crack the postoffice safe, but refrained because a roung man clerk slept in the

## Stomach Troubles Due to Acidity

So Says Eminent Specialist.

So-called stomach troubles, such as indigestion, wind, stomach-ache and in-ability to retain food, are in probably indigestion, wind, stomach-ache and inability to retain food, are in probably nine cases out of ten simply evidence that fermentation is taking place in the food contents of the stomach, causing the formation of gas and acids. Wind distends the stomach, and causes that full, oppressive feeling sometimes known as heartburn, while the acid infiguration of the stomach. The trouble lies entirely in the fermenting food. Such fermentation is unnatural, and acid formation is not only unnatural, but may involve most serious consequences if not corrected. To stop or prevent fermentation of the food contents of the stomach and to neutralize the acid, and render it bland and harmless, a teasonomic of bistrated magnesia, probably the best and most effective corrector of acid stomach known, should be taken in a quarter of a glass of hot or cold water immediately after eating, or whenever wind or acidity is felt. This stops the fermentation, and neutralizes the acidity in a few momenta. Fermentation, wind and acidity are dangerous and unnecessary. Stop or prevent them by the use of a proper macide, such as bisurated magnesia, which can be obtained from any druggist and thus enable the stomach to do its work properly without being hindered by poisonous see and dangerous acids.—It 7. The terminal question is one the officials have been leaving until the last because of the more important matters involved in the electrification of the old west side line of the Southern Pacific. However, the depot question is now assuming larger proportions as the line is hearing completion.
