The commission this morning adopted a resolution calling upon the city council to issue \$900,000 in \$0-year, 4½ per cent bonds at once. dealers and agents representing many leading museums in all parts of the civilized world are gathering here to attend one of the most remarkable if not the most remarkable sale of Japanese antiques ever held in this country. This sale, which is to be held with the sanction of the imperial government, has an interesting history. The great temple of Kyoto, being heavily in debt and unable to raise funds among the wor-shipers, found it necessary to resort to desperate means. The temple authorities appealed to the imperial government and obtained permission to sell part of the famous temple treasure, consisting of priceless paintings, ceramics, bronzes and ivories, art works in various metals, wood carvings, jades, tapes-tries and silks, many of them of great antiquity and rarity. Probably never before has there been such an opportunity for collectors to acquire Japanese antiques of undubitable genuineness. It is understood that the imperial government will be represented at the sale, which is to continue through the entire month, by expert commissioners who will see to it that the most valuable and important objects are sold to the government, so as to keep them in the
