## WASHINGTON'S COAL MAY MEAN SAVING TO THE GOVERNMENT

New Product Will Be Used at North Jetty if Tests Sustain Heat Units Claimed.

#### DESIGNATED NAVY COAL

Product Is Now Being Mined at Cumberland, Wash., by Mavy Development & Coal Company.

Bids for the furnishing of 3500 tons of coal to the United States government for use at the plant at the north jetty brought out a new coal which, it it proves to be as stipulated, will, it is said, result in the saving of many thousand dollars to the government in a year. The coal is designated as navy coal and is mined at Cumberland, Wash., by the Naval Development &

The bid for this coal was for \$2.24 ton, 66 cents a ton less than any bid for Roslyn coal, which the government has been using for years past. The company guarantees 12,250 heat units for boiler test, a satisfactory figure should the test be as claimed. government will make a thorough test of the coal in hopes that it will meet requirements and lower the cost of operation of the north jetty plant. In the meantime a bid of the Astoria Fuel & Supply Co. for 1750 tons of coal to be delivered at the jetty was allowed at a price of \$2.90 a ton for the Roslyn coal, which has been used before. This coal is graded at 14,000 heat units.
