Common Sense Advice by a Distin-guished Specialist.

"Acid" stemachs are dangerous be-cause acid irritates and inflames the delicate lining of the stomach, thus delicate lining of the stomach, thus hindering and preventing the proper action of the stomach, and leading to probably nine-tenths of the cases of stomach trouble from which people suffer. Ordinary medicines and medical medical control of the stomach, and leading to had never been on the stage. Charles Wolgren, a native of the case of the cinal treatments are useless in such cases, for they leave the source of the

cases, for they leave the source of the trouble, the acid in the stomach, as dangerous as ever. The acid must be neutralized, and its formation prevented, and the best thing for this purpose is a teaspoonful of bisurated magnesia, a simple antacid, taken in a little warm or cold water after eating, which not only neutralizes the acid, but also prevents the fermentation from which acidity is developed. Foods which ordinarily cause greatest distress may be eaten with impunity if the meal is followed with a little bisurated magnesia, which can be obtained from any for Coos Bay and San Francisco, were nesia, which can be obtained from any taken at noon today. Stop Falling Hair and Itching Scalp-At Once

There is one sure way that has never failed to remove dandruff at once, and in that is to dissolve it, then you destroy it entirely. To do this, just get about four ounces of plain, common liquid arvon from any drug store (this is all you will need) apply it at night when retiring; use enough to moisten the scalp and rub it in gently with the

finger tips. By morning most if not all, of your dandruff will be gone, and three or four more applications will completely dissolve, and entirely destroy every single sign and trace of it, no matter 100 how much dandruff you may have.

You will find all itching and digging 10 of the scalp will stop instantly and your hair will be fluffy, lustrous, glossy, silky and soft, and look and cel a hundred times better. If you value your hair, you should

get rid of dandruff at once, for nothing destroys the hair so quickly. It not only starves the hair and makes it fall out, but it makes it stringy, straggly, dull, dry, brittle and lifeless, and everybody notices it,-Adv.
