Lecture On Precious Stones.—Prof. G. Montague Butler of the School of Mines of Oregon Agricultural college, will lecture in Room A of the Central library at 7:30 this evening. Prof. Butler will illustrate his lecture with over \$3000 worth of real gems and models, some of unusual size, and will discuss the following topics as well as many others: "Facts About Birth-"Ancient vs. Modern Gems;" "Diamonds As An Investment;" "The Truth About Artificial Rubies and Sapphires and So-called 'synthetic' Emeralds;" "Supposed Medicinal and Medical Properties of Gems;" "Do Pearls Die?" "Precious Stones of Oregon;" "Origin of the Opal Superstition;" "The Largest Diamond Ever Found," etc.

Defendant Wins Case.—The Abbott, Forrester company Wednesday lost its suit against F. E. Bowman and M. D. Hawes to collect \$500 on an oil burner heating plant installed in an apart-ment house at Seventeenth and Tillamook streets owned by the defendant, a jury in Circuit Judge Gatens' court returning a defendant's verdict. The defendants alleged that the plant made so much noise it drove tenants from the building and caused trouble in the neighborhood. They asked for \$186.53 damages, which were not allowed.

Attorneys Withdraw From Case .-"We disappear from this case as at-torneys for the defendants," is the new method for withdrawal of defendants, according to a notice of withdrawal of the legal firm of Hardy, Woodley & Behrends as attorneys for Mrs. F. #### 35-Foot Channel Is Aim for the Season

Government Dredge Chinook Doing Good Work on Columbia Bar-Capacity Is Increased by Pumps.

The government dredge Chinook has been at work on the Columbia river bar since July 8. Her pumping capacity has been increased by adding two 30 inch pumps to the two 24 inch pumps originally installed. It was expected that the capacity of the vessel would be more than doubled by the installation of the new pumps. Reports will be made at the end of the month showing what the exact results have been. Before the Chinook was placed at work on the bar she was thoroughly tested in quiet water. The dredge deepened the bar channel last South American explorer and re- year an average of three feet, or from storer of the ruins of the ancient 25 to 28 feet.
