Secs Field for Auto Trucks. L. W. Holland of the Carnationville has been describing to acquaintances while here the growth of the auto trucking business in England.

Year ago," he said, "a man got a truck, fitted it for refrigeration and began carrying frozen meat from London south 30 miles to Portland.

After three hours of grind, crank and turn, the cream began to thicken, and presently appeared to be almost normal, though a trifle thin.

After making remarks about the cream, the housewife called up the grocery again.

"What was the matter with that salt you sent me today," she asked.

"The grocer looked at the book, but could find no order for salt, madam."

"I did not take long for the housewife to get the freezer crank turning merrily. But again she was wrong. The cream wouldn't freeze.

She turned until her arms were weary. The freezer never acted like that before.

drawal of the chaplain to the local "Mission to Seaman," according to Mr. Kilpack.

"The Portland seaman's institution is now handled by local people," said the visiting chaplain.

As many people had visited Crater Lake last year, a party was made that trip at the end of the month last year and this despite a late season, according to Captain T. H. Dillon, United States Engineer, who has just returned from the park.

Captain Dillon reported to his chief, Major Jay J. Morrow, that by the end of the season the 60 mile road project being constructed by the government through the park would be open and that the summer season would be the heavy tourist travel expected next year in conjunction with the San Francisco fair.

The failure of the proposed congress to pass the sundry bill is embarrassing the engineers now as their appropriation for the season's work is very nearly exhausted.

Little Stories for Bedtime

Second Adventure of Little Mite.

"The world is so large and I am so small I should never, no never, have left home all."

"The time when Little Mite should have thought of that was before he started. It was too late now. He had left home and the worst of it was he hadn't the least idea in the world how to get back there again."

As little Mite lay in the tall grass trying to get his breath he wondered if ever before a Meadow Mouse had had such a terrible adventure.

Now, where he had fallen there was no nice little path, and he had to work his way through the thick growing grass.

happened, and so after a little he grew less and less afraid.

With that he marched along up the Lone Little Path quite as if he owned it.

American women have brown hair. The modern rule in choosing colors seems to be to match either the color of the eyes or the hair, and while this is better than our grandmothers' system, it has its pitfalls.

With a Poor Complexion. As women grow older the natural pink of the cheeks is apt to be less clear and it often takes on a bluish or magenta hue.

Mrs. Isabelle HUCKSTER GIRLS

I've just heard of two teachers who have made a nice success in huckstering, and this is the way of it.

Nothing daintier nor more attractive could be imagined. They charged good but not exorbitant prices, delivered nothing that was not first class, and they made a huge success of the venture.

LEMONS IN SUMMER

Lemons are important in the hot days of summer, and we would all like a tree in the back yard.

Lemon extracts and flavorings may be easily made at home. If lemons begin to spoil, wipe the skins with wet cloth and then with a dry one.

Small Harold wanted an excuse to remain at home from school.

"Mamma," he queried, "is there any kind of illness that a fellow doesn't have to take any medicine for?"

"What kind of a present shall I bring you for your birthday?" asked a father of his five-year-old daughter.

"Oh," she replied, "bring me some holes for my ears so I can wear earrings."

may be used by itself, is made as follows: Steep two ounces of gelatine in one half pint of cold water for one hour; then mix it with one and one half pints of boiling water through a sifter or sherry wine, the thinly pared peel of one and the juice of three lemons, and sugar to taste.

This jelly may be used in combination with candied or fresh fruits to make a pudding which is very pretty to look at. Cut fresh strawberries or cherries in two, with slices of orange and pineapple; melt the jelly slightly so that it will pour like a syrup. Put in layers of fruit and jelly in jelly. Set away on the ice to harden and serve with a lemon flavored custard.
